Renewal Letter 2021-2022

G.4. Approval to Award a Contract to Gold Star Foods for providing Fresh and Processed Produce (Action Item)

Rationale:

On March 2, 2021 the District issued a RFP (request for pricing) for Fresh and Processed Produce for all cafeterias. The RFP was done in cooperation with Menifee Union School District, Lake Elsinore Unified School District, Temecula Valley Unified School District and Perris Union High School District and Perris Elementary District.

The RFP includes distribution of food products from July 2021 through June 2022 with the right to renew the contract for a period of two (2) additional years.

Three vendors submitted pricing based on estimated annual usage. Results of RFP#03022021 are shown below. Totals reflect all participating districts. Murrieta Valley Unified purchases represent approximately \$175,000 of the

total.

- 1. Gold Star Foods \$825,039
- 2. Sunrise Produce \$1,190,543
- 3. Sysco (Riverside) \$949,929

Providing quality produce with student meals contributes to learning and student success.

Financial Impact:

This contract is being funded with cafeteria funds.

Actions:

Motion

Passed with a motion by Paul Diffley and a second by Oscar Rivas.

Vote:

Yes Kenneth Dickson.

Yes Paul Diffley.

Yes Linda Lunn.

Yes Oscar Rivas.

Yes Kris Thomasian.

Gold Star Fresh and Processed Produce

G.5. Approval to Award a Contract to Gold Star Foods for providing Frozen, Refrigerated & Dry Food Distribution (Action Item) Rationale:

On March 1, 2021 the District issued a RFP (request for pricing) for distribution of frozen, refrigerated and dry food products for all cafeterias. The RFP was done in cooperation with Menifee Union School District, Lake Elsinore Unified School District, Temecula Valley Unified School District, Perris Elementary District and Perris Union High School District.

The RFP includes distribution of food products from July 2021 through June 2022 with the right to renew the contract for a period of two (2) additional years.

One vendor submitted pricing based on estimated annual usage. Results of RFP#03012021 are shown below. Total reflects all participating districts. Murrieta Valley Unified purchases represents approximately \$1,680,425 of the total.

1. Gold Star Foods - \$7,638,295

Providing quality student meals contributes to learning and student success.

Financial Impact:

This contract is being funded with cafeteria funds.

Actions:

Motion

Passed with a motion by Oscar Rivas and a second by Paul Diffley.

Vote:

Yes Kenneth Dickson. **Yes** Paul Diffley.

Yes Linda Lunn. Yes Oscar Rivas. **Yes** Kris Thomasian.

Gold Star Frozen, Refrigerated and Dry Foods

G.6. Approval to Award a Contract to Allison Mechanical, Inc. in the amount of \$293,400.00 for the Thompson Middle School Portable HVAC **Project (Action Item)**

Rationale:

On April 30, 2021, the Murrieta Valley Unified School District conducted a bid opening for the portable HVAC Project at Thompson Middle School . Staff received five complete bids ranging from \$293,400.00 to \$373,819.00. Allison Mechanical, Inc. is the apparent low responsive and responsible bidder and will be awarded a contract upon review and approval by the Board of Education and legal counsel.

Financial Impact:

This contract will be funded using general obligation bonds.

Actions:

Motion

Passed with a motion by Kris Thomasian and a **Yes** Kenneth Dickson. second by Kenneth Dickson.

Vote:

Yes Paul Difflev.

Yes Linda Lunn.

Yes Oscar Rivas.

Yes Kris Thomasian.

G.7. Review of Investment Report for the quarter ended March 31, 2021 (Information Item)

Rationale:

For information purposes, it is not the Murrieta Valley Unified School District's intent to invest surplus funds with agencies outside of the County Treasury. However, through debt financing for Certificates of Participation and General Obligation Bonds issued in prior years, the district was required to set aside a portion of the initial financing proceeds in reserve accounts until the debt is retired. These funds are currently invested through a trustee on the district's behalf.

Per Board Policy 3430 - Investing, the Superintendent or Deputy Superintendent is required to report to the Board the status of the district's investment of surplus moneys not required for immediate necessities or funds otherwise invested in the course of normal business operations such as financing debt issued for Certificates of Participation, General Obligation Bonds, etc.

The report should include:

1. The state of compliance of the portfolio to the statement of investment

NOTICE INVITING REQUEST FOR PRICING (RFP)

I. GENERAL CONDITIONS AND INSTRUCTIONS:

RFPs are requested for furnishing food products, from July 1, 2021 through June 30, 2022.

This RFP is being issued cooperatively by the Riverside County School Districts listed below. Each School District acting by and through their Governing Boards request pricing for procurement and delivery of fresh and processed produce items. Participating DISTRICTS below will be referred to as DISTRICTS in this RFP.

Murrieta Valley Unified School District Temecula Valley Unified School District Lake Elsinore Unified School District Menifee Union School District Perris Elementary School District Perris Union High School District

The following table provides a synopsis of the DISTRICTS business. Attached you will find district maps/addresses and school calendar for each of the DISTRICTS schools. The awarded vendor will be provided with delivery sites; manager's name, telephone number, email and fax number.

- A. The DISTRICTS reserves the right to purchase more or less of the units specified.
- B. Proposals: RFPs shall be written in ink or type written. Send to Murrieta Valley Unified School District, Jill Lancaster, Director, Nutrition Services, 41870 McAlby Court, Murrieta, CA 92562. Proposals are to be verified before submission, as they cannot be corrected after RFPs are opened. RFP opening will be non-public. The signatures of all persons signing shall be in longhand. Vendors shall fully inform themselves as to all existing conditions and limitations. No allowance will be made because of lack of such examination, inquiry, or knowledge. For information about RFP procedures, contact Jill Lancaster at MVUSD Nutrition Services.
- C. Pricing shall be entered into spreadsheet (fruit and vegetable tabs) and submitted with proposal on a data storage device in excel format. Electronic storage devices will not be returned.
- D. Addenda or Bulletins: Any addenda or bulletins issued by the DISTRICT during the time of RFP processing to the Vendor for the preparation of this RFP shall be covered in the RFP and shall be made part of the contract. Addenda or Bulletins will be posted on Murrieta Valley Unified School District's website with the original RFP.
- E. Withdrawal of RFPs Prior to due date: Any Vendor may withdraw his RFP, either personally or by a written request, at any time prior to the scheduled due date.
- F. Withdrawal of RFPs after due date: A Vendor may not withdraw his RFP for a period of sixty (60) days after the due date.
- G. Interpretation of Documents: If any person contemplating submitting a RFP for the proposed contract is in doubt as to the true nature of any part of the RFP documents or finds discrepancies, in or omissions from, he/she may submit to the MVUSD, Nutrition Services Director, Jill Lancaster, a written request for an interpretation or correction hereof. Requests must be received a minimum of 3 days prior to close. Any interpretation or addendum duly issued by said Nutrition Services Director and a copy of such addendum will be posted on the Murrieta Valley Unified School District's website with the original RFP. The DISTRICT will not be responsible for any other explanation or interpretation of the RFP documents.
- H. Award or Rejection of RFPs: The award of the contract, if made by the DISTRICT, will be to the lowest responsive and responsible Vendor. Product quality, student acceptability of product and dependable service will be main factors in the determination of this award. It must be clearly evident that a Vendor is capable of promptly delivering all items on the RFP list. A Vendor's past delivery and performance practices relating to any previous and existing contracts will be examined. Vendors who have demonstrated unsatisfactory performance will be subject to disqualification as a responsible Vendor, disqualifying the Vendor for contract award. This RFP will be awarded to one vendor. The DISTRICT shall not be obligated to accept the lowest priced proposal, but will make an award in the best interest of the DISTRICT. The DISTRICT reserves the right in its absolute discretion to accept RFPs as deemed necessary for the best interest of the Nutrition Services

Department. The DISTRICT may take into account the performance of the Vendor with respect to any recent contract(s) with the DISTRICT and other school districts. The Governing Board of the DISTRICTS, reserves the right to reject any one or all RFPs, to waive any informalities in the RFPs or in the process, to judge the merit and qualifications of the materials, equipment, and services offered, and to accept whatever RFP is deemed to be the lowest responsible RFP MEETING ALL THE CRITERIA SPECIFIED IN THE RFP. All Vendors will be notified in writing of the award.

II. TERM OF AGREEMENT:

The term of this agreement will be from July 1, 2021 through June 30, 2022.

III. CONTRACT RENEWALS:

If mutually agreeable, the DISTRICTS reserve the right to renew the contract for a period of two (2) successive years. This renewal is contingent upon competitive pricing and upon all terms and conditions of the original contract having been met to the satisfaction of the DISTRICT. Such renewal will be made by notifying the Vendor in writing, thirty (30) days prior to the expiration of the contract.

IV. PRICING:

- A. Pricing for items listed is to be firm for the period of July 1, 2021 through June 30, 2022.
- B. All proposals must be quoted delivered to the designated sites. No additional freight, labor or fuel surcharges will be permitted or allowed.
- C. Prices must be listed by pack size as indicated on spreadsheets.
- D. In the event of severe market changes, a price escalation may be requested to the DISTRICT No later than fifteen (15) days prior to the price change. Any request for escalation in price shall be in writing, and include written proof of cost increases or other justification supporting the request for the escalation. Justification must be based on documents approved by the DISTRICT. The DISTRICT reserves the right to cancel any contract if price escalation is unacceptable, and to solicit other Vendors for any part or portion of the RFP.
- E. Pricing should reflect best annual price for times product is seasonally available.
- F. Evaluation of pricing: Annual pricing will be evenly weighted, multiplying annual pricing by estimated usage. Adjustments will be made for different pack size and non-like items will be removed and not considered in the evaluation of pricing.
- F. Geographic preference: the DISTRICTS reserve the right to purchase up to 10% of produce from local farmers. DISTRICTS have the discretion to determine the local area to which the geographic preference option will be applied.

V. QUANTITIES:

The quantities listed herein are estimates only. The DISTRICT reserves the right to purchase more or less than the quantities stated.

The DISTRICTS shall not be obligated to purchase or reimburse the Distributor for any inventory of any products should purchases vary from the anticipated purchase patterns or if agreement expires or is terminated.

Additional goods: DISTRICTS may add up to 10% of the value of the contract in additional goods after the contract is awarded.

VI. PREPARATION OF RFP:

- A. The RFP must be signed in the name of the company and be in longhand of the person authorized to sign the RFP.
- B. Prices must be in ink or typewritten. No pencil figures permitted.
- C. Erasures or Alterations: All information, prices, notations, signatures, and corrections must be in ink or typewritten. Mistakes may be crossed out and corrections typed or printed adjacent to the mistake and initialed in ink by the person signing the RFP. Any change of the printed portion of the RFP form itself constitutes alteration and is cause for immediate rejection of the RFP.

VII. SANITATION PRODUCT QUALITY:

All products shall be produced and handled in accordance with the best sanitary practices. Employees, equipment, and plant shall meet state and county health department requirements to assure clean, sound, and sanitary products. A copy of the Vendor's Food Safety Plan and Health inspection reports are required. Third party inspection of facility is recommended.

Food Products shall be handled on Vendor's premises under such controlled temperatures and conditions as are required by state and local statutes and regulations. The DISTRICT shall have the right to inspect Vendor's premises without prior notice, it being agreed that the Vendor's full compliance with all legal requirements is of the essence of this Agreement and that the Vendor's failure to abide by such legal requirements shall result in the termination of the Agreement. Moreover, the Vendor agrees to immediately inform the DISTRICT in writing of the result so any inspection of its premises and food preparation locations by governmental inspectors or others which resulted in other than an "A" rating and of any claim by any party that food products of any nature provided by the Vendor resulted in sickness, death or other injury to the claiming party.

VIII. PRODUCT QUALITY

The Vendor agrees to present Food Products purchased by the DISTRICT in an appealing and appropriate manner. Vendor shall be responsible for quality control with respect to the Food

Product to assure consistent quality of Food Products served to individual consumers. In connection therewith, the Vendor shall comply with the regulations established in Section 113700 et seq. of the California Health and Safety Code. Cold food must be delivered at 41° degrees or less upon delivery. The DISTRICT shall have the right to reject any or all food products furnished to the DISTRICT which in its opinion do not meet standards of quality and/or proper temperature.

If it becomes necessary during the term of this contract to test any food product for ingredient content, wholesomeness, food borne bacteria, contamination or other cause, the Vendor will be responsible for any cost incurred by the DISTRICT for this. The cost will be deducted from the balance in accounts payable due to the Vendor

All products must follow the specifications as indicated. All products must be fresh and U.S. Grade 1 or better unless otherwise specified. All processed vegetables should be sealed in airtight plastic bags. In the event of off flavor, damage, or otherwise unusable product, provisions must be made for pick up, exchange, and issuance of proper credit.

IX. PRODUCT FORMULATION REQUIREMENTS

Required Documents for each Product:

- A. In order to accommodate the computerized menu system utilized by the Nutrition Services Department, the successful bidder shall be required to provide or make available, electronically, a complete nutritional analysis of all processed products including Nutrition Fact Label and/or Product Formulation Statements. USDA Food Fact Sheets are acceptable for unprocessed produce.
- B. Nutrition Facts Panel. Required nutritional information: weight of product, total calories, total fat, saturated fat, trans-fat, cholesterol, protein, carbohydrates, calcium, iron, fiber, vitamin A, vitamin C, sodium.
- C. All processed foods should not contain artificial trans fats.
- D. All ingredients must be declared on the product label and conform to the Food Allergen Labeling and Consumer Protection Act as required by the Food and Drug Administration. Labels must list the presence of ingredients which contain: protein derived from milk, eggs, fish, crustacean shellfish, tree nuts, peanuts, wheat, or soybeans.
- E. In order to meet the fruit and vegetable requirements whole fruit and vegetables and processed packaged fruit and vegetables must meet the ½-cup requirement.
- F. Contractor shall notify Nutrition Services whenever there is a product/ingredient change in any item provided to the District. If any product changes occur, new ingredient statements and nutritional information shall be provided to the Nutrition Services Department.
- X. CODING: The date of production must be clearly stamped on each case or unit.
- XI. PACK: If a pack is other than stated on the proposal, Vendor shall specify pack.

XII. PRODUCT SUBSTITUTIONS:

The DISTRICT will not allow substitutions without prior approval. In the event contractor is Unable to deliver an item as specified in this contract, notification of shortage must be made orally, by facsimile or by electronic mail at least 72 hours prior to scheduled delivery to the Nutrition Services Department. An equal or better substitute product must immediately be made available to the DISTRICT for approval and subsequent distribution to the cafeterias, at no additional charge to the DISTRICT for product, freight, or redelivery. When substitutions do occur, Contractor shall provide nutritional statements, ingredient listings and the product formulation statement of the replacement product to the Nutrition Services Department.

XIII. DELIVERY:

- A. Successful Vendor agrees to make deliveries, as requested by DISTRICTS Nutrition Services. All prices offered by the proposers must include onsite off loading and inside delivery.
- B. Vendor agrees to furnish and deliver at all times during the period of the contract, upon request of the Director of Nutrition Services or his/her designee, the items which may be awarded to the Vendor, in such amounts and quantities as ordered and within the specified delivery schedule.
- C. All products are to be delivered in refrigerated trucks and placed in a refrigerator, freezer or dry storage areas.
- D. The maximum speed limit for any vehicle on school campuses is 10 MPH. The Vendor will ensure that all employees are informed of this limit before entering a school campus. Employees of the Vendor who are found to exceed this limit may be banned from school property. Delivery vehicles shall be of size to safely navigate delivery area and not require loading docks for delivery.
- E. All costs for delivery, drayage, or freight, or the packing of said articles are to be borne by the proposer.
- F. Credit will be required on unused products delivered with less than seven (7) days to expiration.
- G. A legible delivery receipt signed by the Nutrition Services personnel must accompany each delivery.

XIV. PRODUCT SAMPLES

- A. Product samples may be requested by the DISTRICT and must be provided at no cost to the DISTRICT. Samples must be the exact item that the Vendor proposes to furnish and in the same packaging in which they will be delivered if the Vendor is awarded the contract. Samples will be used in testing and will not be returned.
- B. Samples will be taste tested for freshness and quality. Poor quality samples will be considered as a failure to meet RFP specifications (including production formulation).
- C. Failure to submit samples on the date and time requested will invalidate the RFP.

XV. ACCOUNTING:

Invoices shall be furnished in duplicate and include delivery site, product name, quantity, unit size, and unit price. One copy is to be kept by the distributor.

- A. The original invoice must be signed by the individual receiving the merchandise and is to be left for the cafeteria manager. An invoice signed by the cafeteria manager or designee is required in order for the invoice to be processed for payment.
- B. Statements for all goods purchased within a calendar month shall be on an individual school basis.
- C. Statements shall be submitted no later than the fifth day following the close of each calendar month.
- D. Statements shall be addressed to DISTRICTS Nutrition Services Department.
- E. The DISTRICT will pay for goods on a monthly basis. The DISTRICT agrees to pay all such monthly summary invoices (less any credits to which it may be entitles) within thirty (30) calendar days of receipt of each monthly statement provided. Should the payment date fall on an official holiday observed by the State of California or on a weekend, the payment shall be due on the next business day after such holiday or weekend. DISTRICT will not be charged a late fee.

XVI. PRODUCT RECALLS:

A. The Contractor shall bear all costs incurred by the DISTRICT resulting from product recall, including, but not limited to, any costs initially incurred for storage and transportation; pickup, transportation and storage of recalled product; and price differential for replacement product, if necessary, as determined by the DISTRICT. Payment for all costs directly related to product recall shall be made within 30 days of submission of invoice by the DISTRICT.

XVII. WEIGHTED FACTORS:

The vendor should:

- A. Have been in the produce business or provided delivery of produce to schools for not less than one (3) years prior with satisfactory quality and service.
- B. Have refrigerated truck(s) and must be able to provide delivery to all district locations assigned at a time convenient to the district, as noted in the RFP package. This is to include special deliveries when required.
- C. Past performance will be evaluated and could subject an RFP to be rejected.

A Vendor that is awarded the DISTRICTS business for the first time will be on trial during the first year. The awarding of any additional business or the continuation of the trial arrangement will depend upon the evaluation of the first years' service.

XVIII. TERMINATION:

- A. Failure on the part of the successful Vendor to meet contract requirements shall be cause for cancellation. Either party may cancel contract upon a thirty (30) days written notice to the other party.
- B. The DISTRICT reserves the right to terminate the contract at any time for due cause which shall include such reasons as unsatisfactory service, unsatisfactory product; or upon annual review of weighted factors, performance of service and/or provision of quality product.
- C. The DISTRICT shall hold the successful Vendor liable and responsible for all damages which may be sustained because of failure to comply with any conditions herein. If the successful Vendor fails to furnish or deliver any material, supplies, equipment, or services at the prices quoted, or at the times and places stated, or otherwise fails to comply with the terms of the documents in their entirety, the DISTRICT may purchase the items herein specified elsewhere, without notice to the successful Vendor. Additional costs accrued by DISTRICT through this purchase may be deducted from unpaid invoices or must be paid to DISTRICT by the successful Vendor. Prices paid by DISTRICTS shall be considered the prevailing market price at the time such purchase is made.

XIX. DISTRICT INSPECTION:

All items shall be subject to inspection. Inspection of the items shall not relieve the successful Vendor from any obligation to fulfill the contract. Defective items shall be made good by the successful Vendor, and unsuitable items may be rejected, notwithstanding that such defective items may have been previously overlooked by the DISTRICT and accepted. If any item shall be

found defective at any time before final acceptance of the complete delivery, the successful Vendor shall immediately remedy such defect in a manner satisfactory to the DISTRICT.

XX. PRICING DISCREPANCY:

Should successful Vendor overcharge DISTRICT for any item, successful Vendor agrees to immediately reimburse DISTRICT the full amount of the overcharge.

XXI. EQUAL EMPLOYMENT OPPORTUNITY:

In connection with the execution of the contract, successful Vendor shall not discriminate against any employee or application for employment because of race, religion, color, sex or national origin. The Vendor shall take affirmative actions to insure that applicants are employed, and that employees are treated during their employment, without regard to their race, religion, color, sex or national origin. Such actions shall include, but not be limited to, the following: employment, upgrading, demotion or transfer; recruitment or recruitment advertising, lay-off, termination; rates of pay or other form of compensation; and selection for training, including apprenticeship.

XXII. PUBLIC LIABILITY, INDEMNIFICATION AND PROPERTY INSURANCE:

Successful Vendor shall maintain during the life of this contract Public Liability and Property Damage Insurance to protect themselves and the DISTRICT from all claims for personal injury, including accidental death, as well as from all claims for property damage arising from the operations under this contract. The minimum amounts of such insurance shall be as hereinafter set forth. Successful Vendor will be required to furnish certificates of insurance prior to start of work.

- A. Amounts of Insurance: Bodily Injury and Accidental Death Liability Insurance including auto (both owned and non-owned): Not less than \$1,000,000/\$1,000,000 aggregate.
- B. Property Damage Liability Insurance including auto (both owned and non-owned): Not less than \$1,000,000 aggregate.
- C. Insurance Certificate must name Murrieta Valley Unified School District, Temecula Valley Unified School District, Lake Elsinore Unified School District, Menifee Union School District, and Perris Elementary School District, Perris Union High School District and their officers, agents and employees as additional insured under said policy.

XXIII. HOLD-HARMLESS CLAUSE:

To the fullest extent permitted by law, the successful Vendor agrees to indemnify, defend and hold DISTRICT entirely harmless from all liability arising out of:

- A. Any and all claims under Worker's Compensation Acts and other employee benefit acts with respect to successful Vendor's employees or successful Vendor's employees arising out of successful Vendor's work under this RFP; and
- B. Any loss, injury to, or death, or persons, or damage to property caused by any act, neglect, default or omission of the successful Vendor, or any person, firm or corporation employed by the successful Vendor, either directly or by independent contract, including all damages due to loss or theft, sustained by any person, firm or corporation including the DISTRICT, arising out of, or in any way connected with the successful Vendor's work under this RFP, including injury or damage either on or off DISTRICT property; but not for any loss, injury, death or damages caused by the sole or active negligence, or willful misconduct of the DISTRICT.
- C. The successful Vendor, at the Vendor's own expense, cost, and risk, shall defend any and all claims, actions, suits, or other proceedings that may be brought or instituted against the DISTRICT, its officers, agents or employees, on any such claim or liability, and shall pay or satisfy any judgment that may be rendered against the DISTRICT, its officers, agents or employees in any action, suit or other proceedings as a result thereof.

XXIV. ASSIGNMENT OF CONTRACT:

The successful Vendor shall agree not to assign, transfer, convey, sublet, or otherwise dispose of the items appearing on this RFP form, any rights accruing there under, title or interest therein, funds to be received hereunder, or any power to execute the same without the consent in writing of DISTRICT's Governing Board. Notice is hereby given that the DISTRICT will not honor any assignment made by the successful Vendor unless the consent in writing, as indicated above, has been given.

XXV. FINGERPRINTING:

Successful Vendor agrees to comply with all provisions of Education Code Section 45125.1. Successful Vendor will conduct a criminal background check of all employees, agents, and representatives assigned to DISTRICT that will enter the campuses and other DISTRICT facilities for purposes of providing services covered by this RFP, and will certify in writing that no such employees, agents, and representatives who have been convicted of serious or violent felonies as specified, will have contact with pupils. Successful Vendor will provide the DISTRICT with a list of all employees providing services pursuant to this RFP.

XXVI. BUY AMERICAN PROVISION

Per Section 104(d) of the William F. Goodling Child Nutrition Reauthorization Act of 1998 (Public Law 105-336), Section 12(n) to the NSLA (42 USC 1760(n)). Schools must purchase to the maximum extent practicable, domestic commodity or product. Section 12(n) of the NSLA defines "domestic commodity or product" as an agricultural commodity that is produced in the United States and a food product that is processed in the United States using substantial agricultural commodities that are produced in the United States. Brand and processor information must be identified on case labels and specification sheets. DISTRICT reserves the right to cancel any contract and/or solicit other vendors for any part or portion of the RFP that does not meet the Buy American Provision.

The successful bidder shall be required to inform DISTRICT in advanced of delivery of any non-domestic food product. Notice shall indicate reason for supplying non-domestic product. Acceptable reason include product not grown domestically either year around or by season, insufficient supply, unsatisfactory quality of domestic product or significantly higher cost of domestic product. Information may be provided electronically.

XXVII. DEPARTMENT OF EDUCATION-CHILD NUTRITION DIVISION FORMS

Per the California Department of Education, Child Nutrition and Food Distribution Division, School Nutrition Programs Unit attached forms (Suspension and Debarment Certification U.S. Department of Agriculture, Certificate Regarding Lobbying, Disclosure of Lobbying Activities, Iran Contracting Act Certification Form, Non-Collusion Affidavit and Drug-Free Workplace Certification) must be completed and submitted with proposal. Proposals received without these forms/certifications will not be considered.

XXVIII. CLEAN AIR ACT

Clean Air Act (42 U.S.C. 7401-7671q.) and the Federal Water Pollution Control Act (33 U.S.C. 1251-1387), as amended- contracts and subgrants of amounts in excess of \$150,000 must contain a provision that requires the non-Federal award to agree to comply with all applicable standards, orders or regulations issued pursuant to the Clean Air Act (42 U.S.C. 7401-7671q) and the Federal Water Pollution control Act as amended (33 U.S.C. 1251-1387). Violations must be reported to the Federal awarding agency and the Regional Office of the Environmental Protection Agency (EPA).

XXIX. ASSURANCE OF COMPLIANCE WITH CIVIL RIGHTS LAW AND AMERICANS WITH DISABILITIES ACT

The contractor hereby assures that it will comply with subchapter VI of Civils Rights Act of 1964, 42 USC Sections 2000e through 2000 €(17), to the end that no person shall, on the grounds of race, creed, color, sex, or national origin be excluded from participation in, be denied the benefits of, or be otherwise subject to discrimination under this agreement or under any project, program or activity supported by this agreement. The vendor(s) agrees to comply with applicable Federal and California laws including, but not limited to, the California Fair Employment and housing Act, beginning with Government code 12900, and Labor Code 1735. In addition, the Vendor agrees to require like compliance by any subcontractors employed on the work by him/her.

The Vendor hereby assures that it will comply with the Americans with Disabilities Act of 1990, 42 U.S.C Sections 12101 et sag., to ensure that disabled individuals shall be reasonably accommodated in accordance with the Act, and the contractor shall not exclude from participation in, or deny the benefit of, or otherwise subject a disabled individual to discrimination under this Agreement, or under any project, program, or activity supported by this Agreement.

XXX BID PROTEST PROCEDURES

Appeal: If the protesting bidder or the apparent low bidder is not satisfied with the decision, the matter may be appealed to the Director of Purchasing, or his or her designee, within two (2) business days after receipt of the District's written award notification. The appeal must be in writing and sent via overnight registered mail with all accompanying information relied upon for the appeal and an e-mail address from which questions and responses may be provided to: 41870 McAlby Ct. Murrieta, CA. 92562.

Appeal Review: The Chief Business Official or his or her designee shall review the decision on the bid protest from the Purchasing Director and issue a written response to the appeal, or if appropriate, appoint a Hearing Office to conduct a hearing and issue a written decision. The written decision of the Chief Business Official or the Hearing Officer shall be rendered within five (5) business days and shall state the basis for the decision. The decision concerning the appeal will be final and not subject to any further appeals.

Reservation of Rights to Proceed with Procurement Pending Appeal: the District reserves the right to proceed to award a contract and commence the work/purchase pending an Appeal. If there is a State Funding or a critical deadline, The District may choose to shorten the time limits set forth in this Section if written notice is provided to the protesting party. E-Mailed notice with a written confirmation sent by First Class Mail shall be sufficient to constitute written notice. If there is no written response to a written notice shortening time, the District may proceed with the award.

<u>Finality</u>: Failure to comply with the Bid Protest Procedure shall constitute a waiver of the right to protest and shall constitute a failure to exhaust the protesting bidder's administrative remedies.

XXXI. FORCE MAJEURE

Both vendor and DISTRICTS shall be exempt from their contractual obligations if the failure to meet their contractual obligations results from Force Majeure, labor dispute, Acts of God, or any other causes beyond their reasonable control.

MURRIETA VALLEY UNIFIED SCHOOL DISTRICT

REQUEST FOR PRICING

Fresh & Processed Produce

In compliance with the request for RFPs, the undersigned, acting for the firm named, hereby proposes and agrees, if this proposal or part of this proposal is accepted, to furnish the items at the prices opposite each item, within the period indicated, and in accordance with general conditions, and specifications set forth in these documents.

MURRIETA VALLEY UNIFIED SCHOOL DISTRICT **VENDOR QUESTIONNAIRE**

Fresh and Processed Produce RFP#03022021

Please complete this qualifying criteria questionnaire and submit with your proposal.
1. Will you be able to meet specified delivery hours? Yes 🔀 No 🗌
Yes, Gold Star Foods, Inc. (Gold Star) will be able to meet the specified delivery hours per the RFP.
2. Will you be able to meet the number of deliveries per week? Yes No 🗌
Yes, Gold Star will be able to meet the number of deliveries per week. Gold Star currently delivers to the districts listed in this solicitation. If changes are necessary during the school year Gold Star will work with the district to come up with a mutually agreed upon delivery schedule.
3. Will there be a minimum case or dollar value required per stop? If so, what is the minimum number of cases or minimum dollar value? \$ per delivery site.
No, there is no minimum case or dollar value required per stop for fresh produce.
4. What system do you have to provide monthly summary documents?
Gold Star has a secure online ordering system that is available and searchable by appropriate District personnel 24 hours a day. Monthly summary documents, also known as the District Item Usage report, is available on the website to those granted viewing access.
Invoice and credit memos are visible on the Gold Star website to those granted viewing access. Gold Star's monthly billing statements are emailed automatically to the district designee. These statements are also available Weekly, or Bi-Weekly if the District payments clerk prefers more frequent billing statements.
5. How many days lead time do you require for an order?

There are no firm lead time requirements for customers to place an order. Given the fragility of the supply chain as a result of the COVID-19 pandemic and the unique nature of the foods required to meet meal pattern requirements, Gold Star recommends customers place produce orders with a five (5) calendar-day lead time to ensure the highest fill rates.

6. How many refrigerated delivery trucks do you have?

Gold Star's current delivery fleet consists of: 52 bobtail trucks, 3 vans, 91 tractors, and 129 trailers. Our bobtails and vans can maintain both frozen and refrigerated temperatures. Our trailers are multi-temp trailers that can handle both frozen and refrigerated temperatures. Our fleet is maintained to meet the highest standards for safety, energy efficiency, and environmental compliance. All aged vehicles are removed from our fleet.

7. How many refrigerated trucks have lift gates?

All of Gold Star's refrigerated trucks have lift gates.

8. What is your procedure for notifying the customer of shortages and/or substitutions?

Gold Star takes a proactive approach for minimizing shortages and/or substitutions. When there is a shortage or substitute, the dedicated K-12 Account Specialist will communicate with the District directly via phone and email. Gold Star will never send substitute items without an authorization by the District. To minimize the impact to the District and ensure that menus meet meal pattern requirements, we find substitutes with similar pack sizes, price point, and meal/nutritional contribution.

9. What systems do you have in place to fill emergency orders?

In the event of an emergency/unscheduled delivery, the District would contact their dedicated K-12 Account Specialist by phone or e-mail and each individual school district request would be handled on a case-by-case basis. In the last two year's Gold Star has been able to successfully deploy resources to support schools facing emergency situations such as fires, earthquakes, and intermittent power outages. Most recently with the Coronavirus pandemic, Gold Star has been able to modify delivery days for school closures and secure ample supplies of individually wrapped items, fresh meal kits, and shelf-stable meal kits.

10. How many years has company been in the produce business?

Gold Star is a nationally recognized supply system solving the complex needs of our specialized food service partners. Founded in 1978, Gold Star has forty-three (43) years of experience in the food service business. Gold Star has eleven (11) years of experience selling fresh produce to K-12 public school districts. We currently deliver fresh produce to over 150 school districts throughout California, providing the fresh fruit and vegetable component for nearly 2 million meals per day. We complete 1,100 fresh produce school site deliveries weekly or more than 43,000 deliveries annually.

11. What percentage of items in Table 1 & Table 2 do you currently carry?	100%
12. Is vendor an approved distributor for USDA Foods? Yes No	
12. 13 Vehicol all approved distributor for OSDA 1 Cods: 163 [2] 140 [

13. Please provide an overview of your reporting system. Does vendor have the capability to provide sales reports via website/online or electronically?

Gold Star has a secure online ordering system that is available and searchable by appropriate District personnel 24 hours a day. Access to GSF online is approved by District management and access can be limited through designated security levels determined by the District. Full access to the website provides customers with the ability to place orders via customizable order guides, to view and print reports, to review invoices, and to search for nutritional specifications. Once an order is placed, the District designee will receive an automatic email order confirmation including a list of items and quantities to ensure overall order accuracy. Customized order guides can be created by district or by site.

14. Please describe your product recall procedures.

Food safety is a top priority at Gold Star Foods. Our operation is safe, compliant, and has full traceability of all products we receive and deliver. Gold Star is certified as Global Food Safety Initiative (GFSI) Safe Quality Food (SQF) Level 2 operation. The SQF program allows us to respond quickly in the event of a recall. We collect hold/recall contact information from our partner districts and contact those team members via email and phone with information pertaining to the recall. Time is of the essence when a recall occurs; we have a dedicated recall team who respond 24 hours per day- 7 days per week. We typically notify District personnel impacted by a recall within 2 hours or less of the recall announcement and provide the following information to districts:

- Affected Lot Numbers
- Delivery Date/Received Date
- Sites Affected
- Number of Cases Received by Site
- Instructions on How to Proceed with Affected Product

During the 2019 calendar year, Gold Star successfully responded to five (5) recalls with zero impact to district customers or the children they serve. Included in our response is our Food Recall Policy.

U. S. DEPARTMENT OF AGRICULTURE

Certification Regarding Debarment, Suspension, Ineligibility

and Voluntary Exclusion - Lower Tier Covered Transactions

This certification is required by the regulations implementing Executive Order 12549, Debarment and Suspension, 7 CFR Part 3017, Section 3017.510, Participants' responsibilities. The regulations were published as Part IV of the January 30, 1989, Federal Register (pages 4722-4733). Copies of the regulations may be obtained by contacting the Department of Agriculture agency with which this transaction originated.

(BEFORE COMPLETING CERTIFICATION, READ ATTACHED INSTRUCTIONS)

- (1) The prospective lower tier participant certifies, by submission of this proposal, that neither it nor its principals is presently debarred, suspended, proposed for debarment, declared ineligible, or voluntarily excluded from participation in this transaction by any Federal department or agency.
- (2) Where the prospective lower tier participant is unable to certify to any of the statements in this certification, such prospective participant shall attach an explanation to this proposal.

Gold Star Foods	RFP 03022021

Signature	Date

INSTRUCTIONS FOR CERTIFICATION

- 1. By signing and submitting this form, the prospective lower tier participant is providing the certification set out on the reverse side in accordance with these instructions.
- 2. The certification in this clause is a material representative of fact upon which reliance was placed when this transaction was entered into. If it is later determined that the prospective lower tier participant knowingly rendered an erroneous certification, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.
- The prospective lower tier participant shall provide immediate written notice to the person to whom
 this proposal is submitted if at any time the prospective lower tier participant learns that its
 certification was erroneous when submitted or has become erroneous by reason of changed
 circumstances.
- 4. The terms "covered transaction," "debarred," "suspended," "ineligible," "lower tier covered transaction," participant," "person," "primary covered transaction," "principal," "proposal," and "voluntarily excluded," as used in this clause, have the meanings set out in the Definitions and Coverage sections of rules implementing Executive Order 12549. You may contact the person to which this proposal is submitted for assistance in obtaining a copy of those regulations.
- 5. The prospective lower tier participant agrees by submitting this form that, should the proposed covered transaction be entered into, it shall not knowingly enter into any lower tier covered transaction with a person who is debarred, suspended, declared ineligible, or voluntarily excluded from participation in this covered transaction, unless authorized by the department or agency with which this transaction originated.
- 6. The prospective lower tier participant further agrees by submitting this form that it will include this clause titled "Certification Regarding Debarment, Suspension, Ineligibility and Voluntary Exclusion Lower Tier Covered Transactions," without modification, in all lower tier covered transactions and in all solicitations for lower tier covered transactions.
- 7. A participant in a covered transaction may rely upon a certification of a prospective participant in a lower tier covered transaction that is not debarred, suspended, ineligible, or voluntarily excluded from the covered transaction, unless it knows that the certification is erroneous. A participant may decide the method and frequency by which it determines the eligibility of its principals. Each participant may, but is not required to, check the Non-procurement List.
- 8. Nothing contained in the foregoing shall be construed to require establishment of a system of records in order to render in good faith the certification required by this clause. The knowledge and information of a participant is not required to exceed that which is normally possessed by a prudent person in the ordinary course of business dealings.
- 9. Except for transactions authorized under paragraph 5 of these instructions, if a participant in a covered transaction knowingly enters into a lower tier covered transaction with a person who is suspended, debarred, ineligible, or voluntarily excluded from participation in this transaction, in addition to other remedies available to the Federal Government, the department or agency with which this transaction originated may pursue available remedies, including suspension and/or debarment.

CERTIFICATION REGARDING LOBBYING

INSTRUCTIONS: To be completed and submitted <u>ANNUALLY</u> by 1) any child nutrition entity receiving Federal reimbursement in excess of \$100,000 per year and 2) potential or existing contractors/vendors as part of an original bid, contract renewal or extension when the contract exceeds \$100,000.

Applicable to Grants. Sub-grants. Cooperative Agreements, and Contracts Exceeding \$100,000 in Federal Funds

Submission of this certification is a prerequisite for making or entering into this transaction and is imposed by section 1352, Title 31, U.S. Code. This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Any person who fails to file the required certification shall be subject to a civil penalty of not less than \$10,000 and not more than \$100,000 for each such failure.

The undersigned certifies, to the best of his or her knowledge and belief, that:

- 1.) No Federal appropriated funds have been paid or will be paid by or on behalf of the undersigned, to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with the awarding of a Federal contract, the making of a Federal grant, the making of a Federal loan, the entering into a cooperative agreement, and the extension, continuation, renewal, amendment, or modification of a Federal contract, grant, loan, or cooperative agreement.
- 2.) If any funds other than Federal appropriated funds have been paid or will be paid to any person for influencing or attempting to influence an officer or employee of any agency, a Member of Congress, an officer or employee of Congress, or an employee of a Member of Congress in connection with this Federal grant or cooperative agreement, the undersigned shall complete and submit Standard Form –LLL. "Disclosure Form to Report Lobbying," in accordance with its instructions.
- 3.) The undersigned shall require that the language of this certification be included in the award documents for all covered sub-awards exceeding \$100,000 in Federal funds at all appropriate tiers and that all sub-recipients shall certify and disclose accordingly.

IRAN CONTRACTING ACT CERTIFICATION [California Public Contract Code sections 2202-2208]

Prior to bidding on, submitting a proposal or executing a contract or renewal for a State of California contract for goods or services of \$1,000,000 or more, a vendor must either: a) certify it is <u>not</u> on the current list of persons engaged in investment activities in Iran created by the California Department of General Services ("DGS") pursuant to Public Contract Code section 2203(b) and is not a financial institution extending twenty million dollars (\$20,000,000) or more in credit to another person, for 45 days or more, if that other person will use the credit to provide goods or services in the energy sector in Iran and is identified on the current list of persons engaged in investment activities in Iran created by DGS; or b) demonstrate it has been exempted from the certification requirement for that solicitation or contract pursuant to Public Contract Code section 2203(c) or (d).

To comply with this requirement, please insert your vendor or financial institution name and Federal ID Number (if available) and complete <u>one</u> of the options below. Please note: California law establishes penalties for providing false certifications, including civil penalties equal to the greater of \$250,000 or twice the amount of the contract for which the false certification was made; contract termination; and three-year ineligibility to bid on contracts. (Public Contract Code section 2205.)

OPTION #1 - CERTIFICATION

I, the official named below, certify I am duly authorized to execute this certification on behalf of the vendor/financial institution identified below, and the vendor/financial institution identified below is <u>not</u> on the current list of persons engaged in investment activities in Iran created by DGS and is not a financial institution extending twenty million dollars (\$20,000,000) or more in credit to another person/vendor, for 45 days or more, if that other person/vendor will use the credit to provide goods or services in the energy sector in Iran and is identified on the current list of persons engaged in investment activities in Iran created by DGS.

OPTION #2 - EXEMPTION

Pursuant to Public Contract Code sections 2203(c) and (d), a public entity may permit a vendor/financial institution engaged in investment activities in Iran, on a case-by-case basis, to be eligible for, or to bid on, submit a proposal for, or enters into or renews, a contract for goods and services.

If you have obtained an exemption from the certification requirement under the Iran Contracting Act, please fill out the information below, and attach documentation demonstrating the exemption approval.

Vendor Name/Financial Institution (Printed)	Federal ID Number (or n/a)
By (Authorized Signature)	
Printed Name and Title of Person Signing	Date Executed

Clean Air and Water Certificate

Applicable if the contract exceeds \$150,000 or the Contracting Officer has determined that the orders under an indefinite quantity contract in any one year will exceed \$150,000 or a facility to be used has been the subject of a conviction under the Clean Air Act (41 U.S.C. 1857c-8(c)(1) or the Federal Water Pollution Control Act 33 1319(d) and is listed by EPA or the contract is not otherwise exempt. Both the CACFP Sponsor and the Vendor (offeror) shall execute this Certificate.

Gold Star Foods	
Name of Vendor	Name of Sponsor

THE VENDOR AGREES AS FOLLOWS:

- A. To comply with all the requirements of Section 114 of the Clean Air Act, as amended (41 U.S.C. 1857, et seq., as amended by Public Law 91-604) and Section 308 of the Federal Water Pollution Control Act (33 U.S.C. 1251, et seq., as amended by Public Law 92-500), respectively, relating to inspection, monitoring, entry, reports and information as well as other requirements specified in Section 114 and Section 308 of the Air Act and the Water Act, respectively, and all regulations and guidelines issued there under before the award of this contract.
- B. That no portion of the work required by this prime contract will be performed in a facility listed on the Environmental Protection Agency List of Violating Facilities on the date when this contract was awarded unless and until the EPA eliminates the name of such facility or facilities from such listing.
- C. To use his/her best efforts to comply with clean air standards and clean water standards at the facilities in which the contract is being performed.
- D. To insert the substance of the provisions of this clause in any nonexempt subcontract, including this paragraph.

THE TERMS IN THIS CLAUSE HAVE THE FOLLOWING MEANINGS:

- A. The term "Air Act" means the Clean Air Act, as amended (41 U.S.C. 1957 et seq., as amended by Public Law 91-604).
- B. The term "Water Act" means Federal Water Pollution Control Act, as amended (33 U.S.C. 1251 et seq., as amended by Public Law 92-500).
- C. The term "Clean Air Standards" means any enforceable rules, regulations, guidelines, standards, limitations, orders, controls, prohibitions, or other requirements which are contained in, issued under, or otherwise adopted pursuant to the Air Act or Executive Order 11738, an applicable implementation plan as described in section 110(d) of the Clean Air Act (42 U.S.C. 1957c-5(d)), an approved implementation procedure or plan under Section 111(c) or Section 111(d), respectively, of the Air Act (42 U.S.C. 1857c-6(c) or (d)), or approved implementation procedure under Section 112(d) of the Air Act (42 U.S.C. 1857c-7(d)).
- D. The term "Clean Air Standards" means any enforceable limitation, control, condition, prohibition, standard, or other requirement which is promulgated pursuant to the Water Act or contained in a permit issued to a discharger by the Environmental Protection Agency or by a State under an approved program, as authorized by Section 402 of the Water Act (33 U.S.C. 1342) or by local government to ensure compliance with pretreatment regulations as required by Section 307 of the Water Act (33 U.S.C. 1317).
- E. The term "Compliance" means compliance with clean air or water standards. Compliance shall also mean compliance with a schedule or plan ordered or approved by a court of competent jurisdiction, the Environmental Protection Agency or an Air or Water Pollution Control Agency in accordance with the requirements of the Air Act or Water Act and regulations issued pursuant thereto.

F. The term "facility" means any building, plant, inst		r floating craft, location or sites
of operations, owned, leased or supervised by the Ven	dor. V.P. of Produce	April 1, 2021

CONTRACTOR'S CERTIFICATEREGARDING DRUG-FREE WORKPLACE

This Drug-Free Workplace Certification form is required from all successful bidders pursuant to the requirements mandated by Government Code Sections 8350 et. seq., the Drug-Free Workplace Act of 1990. The Drug-Free Workplace Act of 1990 requires that every person or organization awarded a contract or grant for the procurement of any property or service from any State agency must certify that it will provide a drug-free workplace by performing certain specified acts. In addition, the Act provides that each contract or grant awarded by a State agency may be subject to suspension of payments or termination of the contract or grant, and the CONTRACTOR or grantee may be subject to debarment from future contracting, if the contracting agency determines that specified acts have occurred.

Pursuant to Government Code Section 8355, every person or organization awarded a contract or grant from a State agency shall certify that it will provide a drug-free workplace by doing all of the following:

- (1) Publishing a statement, notifying employees that the unlawful manufacture, distribution, dispensation, possession, or use of a controlled substance is prohibited in the person's or organization's workplace, and specifying actions which will be taken against employees for violations of the prohibition;
 - (2) Establishing a drug-free awareness program to inform employees about all of the following:
 - The dangers of drug abuse in the workplace;
 - The person's or organization's policy of maintaining a drug-free workplace;
 - The availability of drug counseling, rehabilitation and employee- assistance programs; and
 - The penalties that may be imposed upon employees for drug abuse violations;
 - (3) Requiring that each employee engaged in the performance of the contract or grant be given a copy of the statement required by subdivision (a) and that, as a condition of employment on the contract or grant, the employee agrees to abide by the terms of the statement.

I, the undersigned, agree to fulfill the terms and requirements of Government Code Section 8355 listed above and will (a) publish a statement notifying employees concerning the prohibition of controlled substance at the workplace, (b) establish a drug-free awareness program, and (c) require each employee engaged in the performance of the contact be given a copy of the statement required by section 8355(a) and require such employee agree to abide by the terms of that statement.

I also understand that if the DISTRICT determines that I have either (a) made a false certification herein, or (b) violated this certification by failing to carry out the requirements of Section 8355, that the contract awarded herein is subject to termination, suspension of payments, or both. I further understand that, should I violate the terms of the Drug-Free Workplace Act of 1990, I may be subject to debarment in accordance with the requirements of Sections 8350 et. seq.

I acknowledge that I am aware of the provisions of Government Code Sections 8350 et. seq. and hereby certify that I will adhere to the requirements of the Drug-Free Workplace Act of 1990.

CONTRACTOR'S CERTIFICATE REGARDING ALCOHOLIC BEVERAGE and TOBACCO-FREE CAMPUS POLICY

The CONTRACTOR agrees that it will abide by and implement the DISTRICT'S Alcoholic Beverage and Tobacco-Free Campus Policy, which prohibits the use of alcoholic beverages and tobacco products, at any time, on DISTRICT-owned or leased buildings, on DISTRICT property and in DISTRICT vehicles. The CONTRACTOR shall procure signs stating "ALCOHOLIC BEVERAGE AND TOBACCO USE IS PROHIBITED" and shall ensure that these signs are prominently displayed in all entrances to school property at all times.

Evaluation Criteria

Vendor Gold Ster Foods

Criteria	Percentage	Score
Low Price – This indicator is calculated based on estimated annual expenditures for all districts combined. Percentage Point Reductions for each increment of \$25,000 above lowest bid.	40%	40%
Weighted Factors – This indicator is based on vendor questionnaire responses. Point Reduction for each answer not meeting district needs.	25%	25%
References – Reference checks will be conducted from lowest to highest bidder as needed. Vendors currently being utilized by coop do not require further reference checks. This indicator is based on phone interview with references listed on school district reference sheet. Additional reference checks may be conducted at the discretion of participating DISTRICTS. Points deducted for poor reference received internally and/or externally.	15%	15%
Health Department Report & Food Safety Plan – This indicator is based on Health Department Rating and Food Safety Plan. Points deducted for not supplying plan or poor inspections.	10%	10%
Item Availability - This indicator is based on the number of items vendor carries and provides pricing for. Point reduction for every 10 items not available.	10%	10%
total		100%

Riverside Coop

Agenda

Feb. 10, 2021

- I. Non-Competitive Procurement during Emergency
 - a. Proposed by Gold Star
 - b. Manufacturer increases only
 - c. Super-Coop RFP 21/22 is year 3 of RFP- Present delays
- II. Frozen/Refer/Dry RFP
 - a. Updated district info
 - b. Additions will be added
- III. Produce RFP
 - a. Propose moving from quarterly pricing to annual
 - b. Apple Variety Removed
- IV. Coop Agreement??
 - a. "Written agreements delineating roles and responsibilities are encouraged."
- V. Procurement Review Feedback?
- VI.

SQF Food Safety Audit Edition 8.1 Gold Star Foods - Gold Star Foods

Technical Reviewer: Janicka, Justyna (206926)

Hours Auditing: 20 Hours Writing Report: 6

2.1.2 Management Responsibility (Mandatory)

The site has a documented Management responsibility policy dated 5/20/2020. The purpose is to define the structural responsibilities required to implement and maintain and effective SQF system. The training need are outlines in the sites training requirements policy dated 4/20/202. The organization structure is sign and dated 5/18/2020. Job description of key personnel are maintained.

2.1.2.8 Job descriptions for those responsible for food safety shall be documented and include a provision to cover for the absence of key personnel.

RESPONSE: MINOR

EVIDENCE: Provision to cover for the absence of all key personnel are not documented. Back-ups are not documented for the warehouse manager and Inventory Control Supervisor

ROOT CAUSE: When reviewing the SQF Code we miss the provision to cover for the absence of a key personnel.

CORRECTIVE ACTION: Job Descriptions have been reviewed by HR department and key personnel back up have been included. ICS is the backup to the IC control Manager. Warehouse manager is the backup to Director of the Warehouse.

VERIFICATION OF CLOSEOUT: Back-ups documented on the job description-Dylan Jones

COMPLETION DATE: 06/23/2020 CLOSEOUT DATE: 07/16/2020

2.1.5 Crisis Management Planning

The site has a documented Crisis Management Planning policy dated 10/17/19. The purpose is to provide a comprehensive method of managing a problem, crisis, disaster or pandemic that may impact out ability to deliver safe, quality food. The site also has a documented Disaster and Emergency Plan dated 3/20/20. In the event of a natural disaster the site will provide or arrange for the provision of food and food related products. The crisis management test is dated 4/7/2020.

2.1.5.2 The crisis management plan shall include as a minimum: i. A senior manager responsible for decision making, oversight and initiating actions arising from a crisis management incident; ii. The nomination and training of a crisis management team; iii. The controls implemented to ensure a response does not compromise product safety; iv. The measures to isolate and identify product affected by a response to a crisis; v. The measures taken to verify the acceptability of food prior to release; vi. The preparation and maintenance of a current crisis alert contact list, including supply chain customers; vii. Sources of legal and expert advice; and viii. The responsibility for internal communications and communicating with authorities, external organizations and media.

RESPONSE: MINOR

EVIDENCE: No documentation that the crisis management team has been trained.

ROOT CAUSE: Crisis Management team was not trained.

CORRECTIVE ACTION: On 6/30/2020 The Crisis Management team was trained for Covid-19 in the workplace and Gold Star Foods procedures. How to handle and manage different type of cases.

VERIFICATION OF CLOSEOUT: training documented-Dylan Jones

COMPLETION DATE: 06/30/2020 CLOSEOUT DATE: 07/16/2020

2.2.2 Document Control (Mandatory)

The site has a documented document control policy dated 10/18/19. The purpose is define the methods and responsibility for maintaining document control and to ensure staff has access to the most current documents. The amendments/ revision history to documents are maintained at the end of each document.

2.2.2.2 A register of current SQF System documents and amendments to documents shall be maintained.

RESPONSE: MINOR

EVIDENCE: Several policies/procedures dates did not match the dates on the register. And the Disaster and Emergency plan dated 2/18/14 is not on the register.

ROOT CAUSE: The table of contents was not properly reviewed separately from our other site. Showing different dates, also forgot to add a document.

CORRECTIVE ACTION: on 06/30/2020 Table of contents was reviewed several dates have been corrected. The Disaster and Emergency plan that was created 2/8/14 and last updated 3/20/20 was also added.

VERIFICATION OF CLOSEOUT: Register updated-Dylan Jones

COMPLETION DATE: 06/30/2020 CLOSEOUT DATE: 07/16/2020

2.4.3 Food Safety Plan (Mandatory)

The site has a documented Food Safety Plan. The food safety plan is developed and maintained by a multidisciplinary team that includes the SQF practitioner. The plan is written part HACCP and part HARPC. The site receives frozen, refrigerated and ambient products. The flow chart is sign and dated 1/23/2020 with CPs noted at Receiving, Storage (frozen/chilled), Transport, and Delivery. The Hazard Analysis Risk Based Preventative controls are documented and includes the monitoring of the CCP (if applicable) or CP (if applicable). The sites Hazarded Analysis has indicated no CCPs. The CPs are indicated at Receiving Products: Chilled =/<40°F and Frozen products =/< 20°F. Storage: Coolers products Chilled =/<40°F and Frozen products =/< 20°F Frequency checks weekly and Chilled =/<40°F and Frozen products =/< 20°F Frequency 3 time/daily. Transport (monitoring actual temperature of refer unit during transport): Chilled <41°F. Delivery Chilled =/<40°F and Frozen products =/< 20°F. The frequency, records, corrective action and Responsibility are documented. The annual review is dated 1/23/2020

2.4.3.5 Product descriptions shall be developed and documented for all products included in the scope of the food safety plans. This shall reference the finished product specifications (refer to 2.3.5.1) plus any additional information relevant to product safety, such as pH, water activity, and/or composition.

RESPONSE: MINOR

EVIDENCE: The Product descriptions page is missing from the plan.

ROOT CAUSE: Product description page is not on the plan.

CORRECTIVE ACTION: On 06/30/2020 Product description page was added identifying Product Name, Intended for, Shelf Life and where will it be sold.

VERIFICATION OF CLOSEOUT: Product description page documented- Dylan Jones

2.4.3.13 The food safety team shall develop and document procedures to monitor CCPs to ensure they remain within the established limits (refer to 2.4.3.12). Monitoring procedures shall identify the personnel assigned to conduct testing, the sampling and test methods, and the test frequency.

RESPONSE: MINOR

EVIDENCE: 1) The monitoring (CPs, frequency, records, corrective action) for Frozen products at transport is not documented. 2) The delivery process step: the preventive controls (monitoring temperature of the trailer at delivery) does not match the control limit (monitoring ingredients-Chilled ingredients=/<40°F and Frozen ingredients=/< 20°F).

ROOT CAUSE: Missing Temperature process for transport and Delivery.

CORRECTIVE ACTION: on 6-30-2020 Process Transport has been added to meet the temp at Chilled ingredients =/<41°F and Frozen ingredients =/< 20°F) for both transport and Delivery process step on page 10 of the plan.

VERIFICATION OF CLOSEOUT: The moitoring page has been updated-Dylan Jones

COMPLETION DATE: 06/30/2020 CLOSEOUT DATE: 07/16/2020

2.4.3.16 Implemented food safety plans shall be verified as part of SQF System verification (refer to 2.5).

RESPONSE: MINOR

EVIDENCE: The verification process is not documented in the plan

ROOT CAUSE: We had a person responsible but no one to verified the plan.

CORRECTIVE ACTION: On 6/30/2020 we added a column for verification. The Director of safety HACCP will be responsible Verification of the plan.

VERIFICATION OF CLOSEOUT: The moitoring page has been updated-Dylan Jones

COMPLETION DATE: 06/30/2020 **CLOSEOUT DATE:** 07/16/2020

2.7.1 Food Defense Plan (Mandatory)

The site has a documented Food Defense Plan dated 5/22/20. The purpose is to define the methods, responsibility, and criteria of preventing food adulteration caused by deliberate act of sabotage or terrorist like incident. The policy includes but is not limited to the site security team, facility access and authorized personnel, employee, receiving of goods, hazardous chemicals, and security training. The site also completed an Industry self-assessment checklist for Food Security. Dated 4/14/2020.

2.7.1.3 The food defense plan shall be reviewed and challenged at least annually.

RESPONSE: MINOR

EVIDENCE: The site completed an Industry self-assessment checklist for Food Security. This is not a challenged of the food defense plan.

ROOT CAUSE: Confusion we conducted a self-assessment checklist for Food Security to the Food Defense Plan. It needed to be challenged.

CORRECTIVE ACTION: Personnel was challenge for a suspicious packaged / Bomb Threat. The test started 6/18/2020 to 6/19/2020 Packaged was placed in several locations around the company. Training was conducted and safety alerts to make everyone aware of suspicious package.

VERIFICATION OF CLOSEOUT: The food defense was challanged- Dylan Jones

COMPLETION DATE: 06/24/2020 CLOSEOUT DATE: 07/16/2020

2.9.7 Training Skills Register

A training skills register describing who has been trained in relevant skills is maintained.

2.9.7.1 A training skills register describing who has been trained in relevant skills shall be maintained. The register shall indicate the: i.

Participant name; ii. Skills description; iii. Description of the training provided; iv. Date training completed; v. Trainer or training provider; and vi. Supervisor's verification that the training was completed, and that the trainee is competent to complete the required tasks.

RESPONSE: MINOR

EVIDENCE: Trainer or training provider and Supervisor's verification are not documented on the register.

ROOT CAUSE: When reviewing the SQF code we miss Trainer and Supervisor's verification are not documented on the training register.

CORRECTIVE ACTION: On 6-19-2020 we added a column to the training registry that indicates who is the trainer and who is the employee Supervisor..

VERIFICATION OF CLOSEOUT: Training register updated-Dylan Jones

12.2.9 Calibration

The calibration program is dated 3/9/19. The calibration and re-calibration of equipment used for monitoring activities outlined in the pre-requisite programs, food safety plans and other process controls. The annually and weekly calibration methods are outline in the policy. Records sighted: Thermometer Calibration Log dated 11/15/19, 3/6/2020, 5/8/2020

12.2.9.2 Procedures shall be documented and implemented to address the disposition of potentially affected products should measuring, test and inspection equipment be found to be out of calibration state.

RESPONSE: MINOR

EVIDENCE: Procedures is not documented and implemented to address the disposition of potentially affected products should measuring, test and inspection equipment be found to be out of calibration state.

ROOT CAUSE: The following was not address the disposition of potentially affected products should measuring, test and inspection equipment be found to be out of calibration state.

CORRECTIVE ACTION: On 6/19/2020 calibration procedure scope has been change. If a thermometer is discovered out of calibration the product that was tested will be put on QC Hold. Product will be re temp, if temperature test is good product will be released. Faulty Thermometer will be trashed

VERIFICATION OF CLOSEOUT: The calibration procedure was updated-Dylan Jones

COMPLETION DATE: 06/19/2020 CLOSEOUT DATE: 07/16/2020

12.2.10 Pest Prevention

The pest preventive scope of service is documented. The site map is sign and dated 6/11/2020, The business license expires 12/31/2021, and the applicator license expires on 6/30/21. The material list with brand names and EPA number is maintained. The SDS are on file. Records sighted Service inspection report verified (product application summary, condition/observation, pest activity) dated 5/21/2020, 4/23/2020, 2/28/2020

12.2.10.4 The pest prevention program shall: i. Describe the methods and responsibility for the development, implementation and maintenance of the pest prevention program; ii. Record pest sightings and trend the frequency of pest activity to target pesticide applications; iii. Outline the methods used to prevent pest problems; iv. Outline the pest elimination methods; v. Outline the frequency with which pest status is to be checked; vi. Include on a site map the identification, location, number and type of bait stations set; vii. List the chemicals used (they are required to be approved by the relevant authority and their Safety Data Sheets (SDS) made available); viii. Outline the methods used to make staff aware of the bait control program and the measures to take when they come into contact with a bait station; ix. Outline the requirements for staff awareness and training in the use of pest and vermin control chemicals and baits; and x. Measure the effectiveness of the program to verify the elimination of applicable pests.

RESPONSE: MINOR

EVIDENCE: Outline the methods used to make staff aware of the bait control program and the measures to take when they come into contact with a bait station is not documented

ROOT CAUSE: No methods use to make staff aware of bait control program and no measures what to do if in contact with a bait station.

CORRECTIVE ACTION: on 6/23/2020 Management of Pest and Vermin was updated to make sure the staff was aware of the Bait Control Program and also what to do if they come in contact with a bait station.

VERIFICATION OF CLOSEOUT: Management of Pest and Vermin was updated

Section Responses

Food Safety Policy (Mandatory) 2.1.1

The site has a documented Management Commitment policy dated 2/22/16 version 2. The sit is committed to meet or exceed the obligation to the food safety management program. The objective is to ensure all the products are received, stored and delivered at the highest standards of hygiene and safety adopted to meet the requirements of the customers. The policy is displayed in both English and Spanish languages the policy is sign by the CEO.

2.1.1.1 Senior site management shall prepare and implement a policy statement that outlines as a minimum the: I. The site's commitment to supply safe food; ii. Methods used to comply with its customer and regulatory requirements and continually improve its food safety management system; and lii. The site's commitment to establish and review food safety objectives.

RESPONSE: COMPLIANT

2.1.1.2 The policy statement shall be: i. Signed by senior site management; ii. Made available in language understood by all staff; iii. Displayed in a prominent position; and iv. Effectively communicated to all staff.

RESPONSE: COMPLIANT

2.1.2 Management Responsibility (Mandatory)

The site has a documented Management responsibility policy dated 5/20/2020. The purpose is to define the structural responsibilities required to implement and maintain and effective SQF system. The training need are outlines in the sites training requirements policy dated 4/20/202. The organization structure is sign and dated 5/18/2020. Job description of key personnel are maintained.

2.1.2.1 The reporting structure describing those who have responsibility for food safety shall be identified and communicated within the site.

2.1.2.2 The senior site management shall make provision to ensure food safety practices and all applicable requirements of the SQF System are adopted and maintained.

RESPONSE: COMPLIANT

2.1.2.3 The senior site management shall ensure adequate resources are available to achieve food safety objectives and support the development, implementation, maintenance and ongoing improvement of the SQF System.

RESPONSE: COMPLIANT

2.1.2.4 Senior site management shall designate an SQF practitioner for each site with responsibility and authority to: i. Oversee the development, implementation, review and maintenance of the SQF System, including good manufacturing practices outlined in 2.4.2, and the food safety plan outlined in 2.4.3. ii. Take appropriate action to ensure the integrity of the SQF System; and iii. Communicate to relevant personnel all information essential to ensure the effective implementation and maintenance of the SQF System.

RESPONSE: COMPLIANT

2.1.2.5 The SQF practitioner shall: i. Be employed by the site as a company employee on a full-time basis; ii. Hold a position of responsibility in relation to the management of the site's SQF System; iii. Have completed a HACCP training course; iv. Be competent to implement and maintain HACCP based food safety plans; and v. Have an understanding of the SQF Food Safety Code for Manufacturing and the requirements to implement and maintain an SQF System relevant to the site's scope of certification.

RESPONSE: COMPLIANT

2.1.2.6 Senior site management shall ensure the training needs of the site are resourced, implemented and meet the requirements outlined in system elements 2.9, and that site personnel have met the required competencies to carry out those functions affecting the legality and safety of food products.

RESPONSE: COMPLIANT

2.1.2.7 Senior site management shall ensure that all staff are informed of their food safety and regulatory responsibilities, are aware of their role in meeting the requirements of the SQF Food Safety Code for Manufacturing, and are informed of their responsibility to report food safety problems to personnel with authority to initiate action.

RESPONSE: COMPLIANT

2.1.2.8 Job descriptions for those responsible for food safety shall be documented and include a provision to cover for the absence of key personnel.

RESPONSE: MINOR

EVIDENCE: Provision to cover for the absence of all key personnel are not documented. Back-ups are not documented for the warehouse manager and Inventory Control Supervisor

ROOT CAUSE: When reviewing the SQF Code we miss the provision to cover for the absence of a key personnel.

CORRECTIVE ACTION: Job Descriptions have been reviewed by HR department and key personnel back up have been included. ICS is the backup to the IC control Manager. Warehouse manager is the backup to Director of the Warehouse.

VERIFICATION OF CLOSEOUT: Back-ups documented on the job description-Dylan Jones

COMPLETION DATE: 06/23/2020 CLOSEOUT DATE: 07/16/2020

2.1.2.9 Senior site management shall establish processes to improve the effectiveness of the SQF System to demonstrate continuous improvement.

RESPONSE: COMPLIANT

2.1.2.10 Senior site management shall ensure the integrity and continued operation of the food safety system in the event of organizational or personnel changes within the company or associated facilities.

2.1.2.11 Senior site management shall designate defined blackout periods that prevent unannounced re-certification audits from occurring out of season or when the site is not operating for legitimate business reasons. The list of blackout dates and their justification shall be submitted to the certification body a minimum of one (1) month before the sixty (60) day re-certification window for the agreed upon unannounced audit. **RESPONSE: NOT APPLICABLE** EVIDENCE: Not an unannounced re-certification audits 2.1.3 Management Review (Mandatory) The site has a documented Management Review policy dated 2/16/19. The purpose of this policy is to outline the frequency Senior Management will use to review the SQF Food safety management system to ensure it is robust enough to meet changing requirements in order to fulfill the commitment to quality and food safety. The reviews are documented in the revision history and on the documented table of contents. 2.1.3.1 The senior site management shall be responsible for reviewing the SQF System and documenting the review procedure. Reviews shall include: i. The policy manual; ii. Internal and external audit findings; iii. Corrective actions and their investigations and resolution; iv. Customer complaints and their resolution and investigation; v. Hazard and risk management system; and vi. Follow-up action items from previous management review. **RESPONSE: COMPLIANT** 2.1.3.2 The SQF practitioner (s) shall update senior site management on a (minimum) monthly basis on matters impacting the implementation and maintenance of the SQF System. The updates and management responses shall be documented. The SQF System in its entirety shall be reviewed at least annually. **RESPONSE: COMPLIANT** 2.1.3.3 Food safety plans, Good Manufacturing Practices and other aspects of the SQF System shall be reviewed and updated as needed when any potential changes implemented have an impact on the site's ability to deliver safe food. **RESPONSE: COMPLIANT** 2.1.3.4 Records of all management reviews and updates shall be maintained. **RESPONSE: COMPLIANT** 2.1.4 **Complaint Management (Mandatory)** The site has a documented complaint Management policy dated 3/20/19 version 3. The purpose is to define the methods and responsibility for handling and investigating the cause and resolution of complaints from customers and authorities. The customer service representative to follow the complaint through the system. The department managers ensure the proper corrective actions are taken with the assistance of those personnel responsible for the areas in which the complaint may have originated. The trends of complaints data are complied by the HACCP manager and reviewed by the Senior Management Quarterly. Records sighted Customer compliant forms dated 10/21/19,3/31/2020, 6/12/2020, 2.1.4.1 The methods and responsibility for handling and investigating the cause and resolution of complaints from customers and authorities, arising from products manufactured or handled on site, shall be documented and implemented. **RESPONSE: COMPLIANT** 2.1.4.2 Trends of customer complaint data shall be investigated and analyzed by personnel knowledgeable about the incidents. **RESPONSE: COMPLIANT**

Corrective action shall be implemented based on the seriousness of the incident and as outlined in 2.5.3.

Records of customer complaints and their investigations shall be maintained.

2.1.4.3

2.1.4.4

RESPONSE: COMPLIANT

2.1.5 Crisis Management Planning

The site has a documented Crisis Management Planning policy dated 10/17/19. The purpose is to provide a comprehensive method of managing a problem, crisis, disaster or pandemic that may impact out ability to deliver safe, quality food. The site also has a documented Disaster and Emergency Plan dated 3/20/20. In the event of a natural disaster the site will provide or arrange for the provision of food and food related products. The crisis management test is dated 4/7/2020.

2.1.5.1 A crisis management plan that is based on the understanding of known potential dangers (e.g. flood, drought, fire, tsunami, or other severe weather or regional events such as warfare or civil unrest) that can impact the site's ability to deliver safe food, shall be documented by senior management outlining the methods and responsibility the site shall implement to cope with such a business crisis.

RESPONSE: COMPLIANT

2.1.5.2 The crisis management plan shall include as a minimum: i. A senior manager responsible for decision making, oversight and initiating actions arising from a crisis management incident; ii. The nomination and training of a crisis management team; iii. The controls implemented to ensure a response does not compromise product safety; iv. The measures to isolate and identify product affected by a response to a crisis; v. The measures taken to verify the acceptability of food prior to release; vi. The preparation and maintenance of a current crisis alert contact list, including supply chain customers; vii. Sources of legal and expert advice; and viii. The responsibility for internal communications and communicating with authorities, external organizations and media.

RESPONSE: MINOR

EVIDENCE: No documentation that the crisis management team has been trained.

ROOT CAUSE: Crisis Management team was not trained.

CORRECTIVE ACTION: On 6/30/2020 The Crisis Management team was trained for Covid-19 in the workplace and Gold Star Foods procedures. How to handle and manage different type of cases.

VERIFICATION OF CLOSEOUT: training documented-Dylan Jones

2.1.5.3 The crisis management plan shall be reviewed, tested and verified at least annually.

RESPONSE: COMPLIANT

2.1.5.4 Records of reviews of the crisis management plan shall be maintained.

RESPONSE: COMPLIANT

2.2.1 Food Safety Management System (Mandatory)

The site has a documented Food safety Management System policy dated 10/17/19. The products covered in under the scope, the scope of the certification and other documentation are covered.

2.2.1.1 A food safety management system shall be documented and maintained in either electronic and/or hard copy form. It shall outline the methods the site will use to meet the requirements of the SQF Food Safety Code for Manufacturing, be made available to relevant staff and include: i. A summary of the organization's food safety policies and the methods it will apply to meet the requirements of this standard; ii. The food safety policy statement and organization chart; iii. The scope of certification; iv. A list of the products covered under the scope of certification; v. Food safety procedures, pre-requisite programs, food safety plans; and vi. Other documentation necessary to support the development and the implementation, maintenance and control of the SQF System.

RESPONSE: COMPLIANT

2.2.1.2 All changes made to food safety plans, Good Manufacturing Practices and other aspects of the SQF System shall be validated or justified.

RESPONSE: COMPLIANT

2.2.2 Document Control (Mandatory)

The site has a documented document control policy dated 10/18/19. The purpose is define the methods and responsibility for maintaining document control and to ensure staff has access to the most current documents. The amendments/ revision history to documents are maintained at the end of each document.

2.2.2.1 The methods and responsibility for maintaining document control and ensuring staff have access to current documents shall be documented and implemented.

RESPONSE: COMPLIANT

2.2.2.2 A register of current SQF System documents and amendments to documents shall be maintained.

RESPONSE: MINOR

EVIDENCE: Several policies/procedures dates did not match the dates on the register. And the Disaster and Emergency plan dated 2/18/14 is not on the register.

ROOT CAUSE: The table of contents was not properly reviewed separately from our other site. Showing different dates, also forgot to add a document.

CORRECTIVE ACTION: on 06/30/2020 Table of contents was reviewed several dates have been corrected. The Disaster and Emergency plan that was created 2/8/14 and last updated 3/20/20 was also added.

VERIFICATION OF CLOSEOUT: Register updated-Dylan Jones

COMPLETION DATE: 06/30/2020 CLOSEOUT DATE: 07/16/2020

2.2.2.3 Documents shall be safely stored and readily accessible.

RESPONSE: COMPLIANT

2.2.3 Records (Mandatory)

The records policy is dated 1/26/19. The Quality and Food safety records are defined as those records maintained to demonstrate conformance to specified requirements. The policy includes but is not limited to procedure, record retention and responsibilities.

2.2.3.1 The methods and responsibility for undertaking monitoring activities, verifying, maintaining and retaining records shall be documented and implemented.

RESPONSE: COMPLIANT

2.2.3.2 All records shall be legible and suitably authorized by those undertaking monitoring activities that demonstrate inspections, analyses and other essential activities have been completed.

RESPONSE; COMPLIANT

2.2.3.3 Records shall be readily accessible, retrievable, securely stored to prevent damage and deterioration and shall be retained in accordance with periods specified by a customer or regulations.

RESPONSE: COMPLIANT

2.3.1 Product Development and Realization

The is a Food Storage and Distribution site.

2.3.1.1 The methods and responsibility for designing, developing and converting product concepts to commercial realization shall be documented and implemented.

RESPONSE: NOT APPLICABLE

2.3.1.2 Product formulation, manufacturing processes and the fulfillment of product requirements shall be validated by site trials, shelf life trials and product testing.

RESPONSE: NOT APPLICABLE

2.3.1.3 Shelf life trials where necessary shall be conducted to establish and validate a product's: i. Handling and storage requirements including the establishment of "use by" or "best before dates"; ii. Microbiological criteria; and iii. Consumer preparation, storage and handling requirements.

RESPONSE: NOT APPLICABLE

2.3.1.4 A food safety plan shall be validated and verified for each new product and its associated process through conversion to commercial production and distribution, or where a change to ingredients, process, or packaging occurs that may impact food safety.

RESPONSE: NOT APPLICABLE

2.3.1.5 Records of all product design, process development, shelf life trials and approvals shall be maintained. **RESPONSE:** NOT APPLICABLE 2.3.2 **Raw and Packaging Materials** The is a Food Storage and Distribution site. 2.3,2.1 Specifications for all raw and packaging materials, including, but not limited to ingredients, additives, hazardous chemicals and processing aids that impact on finished product safety shall be documented and kept current. **RESPONSE:** NOT APPLICABLE 2.3.2.2 All raw and packaging materials and ingredients shall comply with the relevant legislation in the country of manufacture and country of destination, if known. **RESPONSE: NOT APPLICABLE** 2.3.2.3 The methods and responsibility for developing and approving detailed raw material, ingredient, and packaging specifications shall be documented. **RESPONSE:** NOT APPLICABLE 2.3.2.4 Raw and packaging materials and ingredients shall be validated to ensure product safety is not compromised and the material is fit for its intended purpose. Verification of raw materials and ingredients shall include certificates of conformance, certificate of analysis, or sampling and testing. **RESPONSE:** NOT APPLICABLE 2.3.2.5 Verification of packaging materials shall include: i. Certification that all packaging that comes into direct contact with food meets either regulatory acceptance or approval criteria. Documentation shall either be in the form of a declaration of continued guarantee of compliance, a certificate of conformance, or a certificate from the applicable regulatory agency. ii. In the absence of a certificate of conformance, certificate of analysis, or letter of guarantee, tests and analyses to confirm the absence of potential chemical migration from the packaging to the food contents shall be conducted and records maintained. **RESPONSE:** NOT APPLICABLE 2.3.2.6 Finished product labels shall be accurate, comply with the relevant legislation and be approved by qualified company personnel. **RESPONSE:** NOT APPLICABLE 2.3.2.7 A register of raw and packaging material specifications and labels shall be maintained and kept current. **RESPONSE:** NOT APPLICABLE 2.3.3 Contract Service Providers The site has a documented Contract Service providers policy dated 2/23/16. The policy includes the relevant training and the register is maintained with the service provider. 2.3.3.1 Specifications for contract services that have an impact on product safety shall be documented, current, include a full description of the service to be provided and detail relevant training requirements of all contract personnel. **RESPONSE: COMPLIANT** 2.3.3.2 A register of all contract service specifications shall be maintained. **RESPONSE: COMPLIANT** 2.3.4 **Contract Manufacturers** The is a Food Storage and Distribution site.

The methods and responsibility for ensuring all agreements relating to food safety and customer product requirements and its

realization and delivery are specified and agreed shall be documented and implemented.

2.3.4.1

RESPONSE: NOT APPLICABLE

2.3.4.2 The site shall: i. Verify compliance with the SQF Food Safety Code for Manufacturing and that all customer requirements are being met at all times. Products and/or processes of co-manufacturers that are considered high risk shall be required to undergo an audit by the site or other third-party agency to confirm compliance to the SQF Food Safety Code for Manufacturing and agreed arrangements; and ii. Ensure changes to contractual agreements are approved by both parties and communicated to relevant personnel.

RESPONSE: NOT APPLICABLE

2.3.4.3 Records of all contract reviews and changes to contractual agreements and their approvals shall be maintained.

RESPONSE: NOT APPLICABLE

2.3.5 Finished Product Specifications

The is a Food Storage and Distribution site.

2.3.5.1 Finished product specifications shall be documented, current, approved by the site and their customer, accessible to relevant staff and may include: i. Microbiological and chemical limits; and ii. Labeling and packaging requirements.

RESPONSE: NOT APPLICABLE

2.3.5.2 A register of finished product specifications shall be maintained.

RESPONSE: NOT APPLICABLE

2.4.1 Food Legislation (Mandatory)

The site has a documented Food Legislation policy dated 10/31/19. The site has subscriptions to applicable industry newsletters and publications and memberships are maintained to applicable trade and industry organizations.

2.4.1.1 The site shall ensure that, at the time of delivery to its customer, the food supplied shall comply with the legislation that applies to the food and its production in the country of use or sale. This includes compliance with legislative requirements applicable to maximum residue limits, food safety, packaging, product description, net weights, nutritional, allergen and additive labeling, labeling of identity preserved foods, any other criteria listed under food legislation, and to relevant established industry codes of practice.

RESPONSE: COMPLIANT

2.4.1.2 The methods and responsibility for ensuring the site is kept informed of changes to relevant legislation, scientific and technical developments, emerging food safety issues, and relevant industry codes of practice shall be documented and implemented.

RESPONSE: COMPLIANT

2.4.1.3 SQFI and the certification body shall be notified in writing within twenty-four (24) hours in the event of a regulatory warning. Notification to SQFI shall be by email to foodsafetycrisis@sqfi.com.

RESPONSE: COMPLIANT

2.4.2 Good Manufacturing Practices (Mandatory)

The site has a documented Good Storage and Distribution practices policy dated 11/1/19 and a documented GMP program applicable to the scope of certification.

2.4.2.1 The site shall ensure the Good Manufacturing Practices described in modules 3, 4, 9, 10 or 11 (as applicable) of this Food Safety Code are applied, or exempted according to a written risk analysis outlining the justification for exemption or evidence of the effectiveness of alternative control measures to ensure that food safety is not compromised.

RESPONSE: COMPLIANT

2.4.2.2 The Good Manufacturing Practices applicable to the scope of certification that outline how food safety is controlled and assured shall be documented and implemented.

2.4.3 Food Safety Plan (Mandatory)

The site has a documented Food Safety Plan. The food safety plan is developed and maintained by a multidisciplinary team that includes the SQF practitioner. The plan is written part HACCP and part HARPC. The site receives frozen, refrigerated and ambient products. The flow chart is sign and dated 1/23/2020 with CPs noted at Receiving, Storage (frozen/chilled), Transport, and Delivery. The Hazard Analysis Risk Based Preventative controls are documented and includes the monitoring of the CCP (if applicable) or CP (if applicable). The sites Hazarded Analysis has indicated no CCPs. The CPs are indicated at Receiving Products: Chilled =/<40°F and Frozen products =/< 20°F. Storage: Coolers products Chilled =/<40°F and Frozen products =/< 20°F Frequency checks weekly and Chilled =/<40°F and Frozen products =/< 20°F. The frequency, records, corrective action and Responsibility are documented. The annual review is dated 1/23/2020

2.4.3.1 A food safety plan shall be prepared in accordance with the twelve steps identified in the Codex Alimentarius Commission HACCP guidelines. Feed manufacturers may utilize a HACCP-based reference food safety plan developed by a responsible authority.

RESPONSE: COMPLIANT

2.4.3.2 The food safety plan shall be effectively implemented, maintained and outline the means by which the site controls and assures food safety of the products or product groups included in the scope of the SQF certification and their associated processes. More than one HACCP food safety plan may be required to cover all products included in the scope of certification.

RESPONSE: COMPLIANT

2.4.3.3 The food safety plan or plans shall be developed and maintained by a multidisciplinary team that includes the SQF practitioner and those site personnel with technical, production, and engineering knowledge of the relevant products and associated processes. Where the relevant expertise is not available on site, advice may be obtained from other sources to assist the food safety team.

RESPONSE: COMPLIANT

2.4.3.4 The scope of each food safety plan shall be developed and documented including the start and end-point of the processes under consideration and all relevant inputs and outputs.

RESPONSE: COMPLIANT

2.4.3.5 Product descriptions shall be developed and documented for all products included in the scope of the food safety plans. This shall reference the finished product specifications (refer to 2.3.5.1) plus any additional information relevant to product safety, such as pH, water activity, and/or composition.

RESPONSE: MINOR

EVIDENCE: The Product descriptions page is missing from the plan.

ROOT CAUSE: Product description page is not on the plan.

CORRECTIVE ACTION: On 06/30/2020 Product description page was added identifying Product Name, Intended for, Shelf Life and where will it be sold.

VERIFICATION OF CLOSEOUT: Product description page documented-Dylan Jones

COMPLETION DATE: 06/30/2020 CLOSEOUT DATE: 07/16/2020

2.4.3.6 The intended use of each product shall be determined and documented by the food safety team. This shall include target consumer groups, the potential for consumption by vulnerable groups of the population, requirements for further processing if applicable, and potential alternative use of the product.

RESPONSE: COMPLIANT

EVIDENCE: SEE 2.4.3.5 for Non-compliance.

2.4.3.7 The food safety team shall develop and document a flow diagram covering the scope of each food safety plan. The flow diagram shall include every step in the process, all raw material, packaging material, service inputs (e.g. water, steam, gasses as appropriate), scheduled process delays, and all process outputs including waste and rework. Each flow diagram shall be confirmed by the food safety team during all stages and hours of operation.

RESPONSE: COMPLIANT

2.4.3.8 The food safety team shall identify and document all food safety hazards that can reasonably be expected to occur at each step in the processes, including raw materials and other inputs.

2.4.3.9 The food safety team shall conduct a hazard analysis for every identified hazard to identify which hazards are significant, i.e. their elimination or reduction to an acceptable level is necessary to ensure food safety. The methodology for determining hazard significance shall be documented and used consistently to assess all potential hazards.

RESPONSE: COMPLIANT

2.4.3.10 The food safety team shall determine and document the control measures that must be applied to all significant hazards. More than one control measure may be required to control an identified hazard, and more than one significant hazard may be controlled by a specific control measure.

RESPONSE: COMPLIANT

2.4.3.11 Based on the results of the hazard analysis (refer to 2.4.3.9), the food safety team shall identify the steps in the process where control must be applied to eliminate a significant hazard or reduce it to an acceptable level (i.e. a critical control point, or CCP). In instances where a significant hazard has been identified at a step in the process, but no control measure exists, the food safety team shall modify the process to include an appropriate control measure.

RESPONSE: COMPLIANT

2.4.3.12 For each identified CCP, the food safety team shall identify and document the limits that separate safe from unsafe product. The food safety team shall validate the critical limits to ensure the designated level of control of the identified food safety hazard (s); and that all critical limits and control measures individually or in combination effectively provide the level of control required (refer to 2.5.2.1).

RESPONSE: COMPLIANT

2.4.3.13 The food safety team shall develop and document procedures to monitor CCPs to ensure they remain within the established limits (refer to 2.4.3.12). Monitoring procedures shall identify the personnel assigned to conduct testing, the sampling and test methods, and the test frequency.

RESPONSE: MINOR

EVIDENCE: 1) The monitoring (CPs, frequency, records, corrective action) for Frozen products at transport is not documented. 2) The delivery process step: the preventive controls (monitoring temperature of the trailer at delivery) does not match the control limit (monitoring ingredients-Chilled ingredients =/<40°F and Frozen ingredients =/< 20°F).

ROOT CAUSE: Missing Temperature process for transport and Delivery.

CORRECTIVE ACTION: on 6-30-2020 Process Transport has been added to meet the temp at Chilled ingredients =/<41°F and Frozen ingredients =/< 20°F) for both transport and Delivery process step on page 10 of the plan.

VERIFICATION OF CLOSEOUT: The moitoring page has been updated-Dylan Jones

COMPLETION DATE: 06/30/2020 CLOSEOUT DATE: 07/16/2020

2.4.3.14 The food safety team shall develop and document deviation procedures that identify the disposition of affected product when monitoring indicates a loss of control at a CCP. The procedures shall also prescribe actions to correct the process step to prevent recurrence of the safety failure.

RESPONSE: COMPLIANT

2.4.3.15 The documented and approved food safety plan (s) shall be implemented in full. The effective implementation shall be monitored by the food safety team, and a full review of the documented and implemented plans shall be conducted at least annually, or when changes to the process, equipment, inputs or other changes affecting product safety occur.

RESPONSE: COMPLIANT

2.4.3.16 Implemented food safety plans shall be verified as part of SQF System verification (refer to 2.5).

RESPONSE: MINOR

EVIDENCE: The verification process is not documented in the plan

ROOT CAUSE: We had a person responsible but no one to verified the plan.

CORRECTIVE ACTION: On 6/30/2020 we added a column for verification. The Director of safety HACCP will be responsible Verification of the plan.

VERIFICATION OF CLOSEOUT: The moitoring page has been updated-Dylan Jones

	other than the Codex Alimentarius Commission HACCP guidelines, the food safety team shall implement food safety plans that meet both Codex and food regulatory requirements.
	RESPONSE: COMPLIANT
2.4.4	Approved Supplier Program (Mandatory)
	The site has a documented Approved supplier program dated 11/7/19. The purpose is to provide guidance on the procedure used at the site to ensure the safety of the incoming goods. The materials are supplied by an approved supplier determined by the customer. The customers are responsible for approving all suppliers except for those suppliers providing packaging materials used in the produce re-pack program and the chemical use. The non-approved supplier requirements are outlined in the policy.
2.4.4.1	Raw materials, ingredients, packaging materials, and services that impact on finished product safety shall meet the agreed specification (refer to 2.3.2) and be supplied by an approved supplier.
	RESPONSE: COMPLIANT
2.4.4.2	The receipt of raw materials, ingredients, and packaging materials received from non-approved suppliers shall be acceptable only in an emergency situation, and provided they are inspected or analyzed before use.
	RESPONSE: COMPLIANT
2.4.4.3	The responsibility and procedure for selecting, evaluating, approving and monitoring an approved supplier shall be documented and implemented.
	RESPONSE: COMPLIANT
2.4.4.4	The site's food defense plan (refer to 2.7.1.1) shall include measures to secure incoming materials and ingredients and protect them from deliberate act of sabotage or terrorist-like incidents.
	RESPONSE: COMPLIANT
2.4.4.5	The site's food fraud vulnerability assessment (refer to 2.7.2.1) shall include the site's susceptibility to raw material or ingredient substitution, mislabeling, dilution or counterfeiting which may adversely impact food safety.
	RESPONSE: COMPLIANT
2.4.4.6	The food fraud mitigation plan (refer to 2.7.2.2) shall include methods by which the identified food safety vulnerabilities from ingredients and materials shall be controlled.
	RESPONSE: COMPLIANT
2.4.4.7	Raw materials, ingredients, and packaging materials received from other sites under the same corporate ownership shall be subject to the same specification requirements (refer to 2.3.2) and approved supplier requirements as all other material providers.
	RESPONSE: COMPLIANT
2.4.4.8	The approved supplier program shall be based on the prior performance of a supplier and the risk level of the raw materials ingredients, packaging materials, and services supplied, and shall contain as a minimum: i. Agreed specifications (refer to 2.3.2); ii. Reference to the rating of the level of risk applied to a raw material, ingredients, packaging materials and services and the approved supplier; iii. A summary of the food safety controls implemented by the approved supplier; iv. Methods for granting approved supplier status; v. Methods and frequency of monitoring approved suppliers; vi. Details of the certificates of conformance if required; and vii. Methods and frequency of reviewing approved supplier performance and status.
	RESPONSE: COMPLIANT
2.4.4.9	Supplier audits shall be based on risk and shall be conducted by individuals knowledgeable of applicable regulatory and food safety requirements and trained in auditing techniques.
	RESPONSE: COMPLIANT

A register of approved supplier and records of inspections and audits of approved suppliers shall be maintained.

Where food safety regulations in the country of production and destination (if known) prescribe a food safety control methodology

2.4.3.17

2.4.4.10

2.4.5 Non-conforming Product or Equipment

The non-conforming product and equipment policy is dated 5/2/19. The purpose is to identify the responsibility and methods outlining how non-conforming products and/or equipment detected during receipt, storage, processing, handling or delivery is handled. The policy includes but is not limited to quarantine and isolation of non-conforming materials, ingredient, and equipment, dispositioning of non-conformance materials, ingredients and equipment, and disposal of non-conforming products.

2.4.5.1 The responsibility and methods outlining how non-conforming product, raw material, ingredient, work-in-progress, packaging or equipment detected during receipt, storage, processing, handling or delivery is handled shall be documented and implemented. The methods applied shall ensure: i. Non-conforming product is quarantined, identified, handled and disposed of in a manner that minimizes the risk of inadvertent use, improper use or risk to the integrity of finished product; ii. Non-conforming equipment is effectively repaired or disposed of in a manner that minimizes the risk of inadvertent use, improper use or risk to the integrity of finished product; and iii. All relevant staff are aware of the organization's quarantine and release requirements applicable to equipment or product placed under quarantine status.

RESPONSE: COMPLIANT

2.4.5.2 Quarantine records, and records of the handling, corrective action, or disposal of non-conforming product or equipment shall be maintained.

RESPONSE: COMPLIANT

2.4.6 Product Rework

The site does not re-work product. The is a Food Storage and Distribution site.

2.4.6.1 The responsibility and methods outlining how ingredients, packaging materials, or products are reworked shall be documented and implemented. The methods applied shall ensure: i. Reworking operations are supervised by qualified personnel; ii. Reworked product is clearly identified and traceable; iii. Each batch of reworked product is inspected or analyzed as required before release; iv. Inspections and analyses shall conform to the requirements outlined in element 2.5.4.1; and v. Release of reworked product shall conform to element 2.4.7.

RESPONSE: NOT APPLICABLE

2.4.6.2 Records of all reworking operations shall be maintained.

RESPONSE: NOT APPLICABLE

2.4.7 Product Release (Mandatory)

The site has a documented product release policy dated 5/2/19. The procedure includes but is not limited to the Director of Warehouse is responsible for the release of materials/ingredient in preparation for shipping. The Safety/HACCP assistant reviews all production and food safety records associated with the re-pack products and temperature controls to verify that all food safety, legislative and quality controls had been met. And the inventory controls manager will release the products/materials in the sites inventory control system.

2.4.7.1 The responsibility and methods for releasing products shall be documented and implemented. The methods applied shall ensure the product is released: i. By authorized personnel; and ii. Once all inspections and analyses are successfully completed and documented to verify legislative and other established food safety controls have been met.

RESPONSE: COMPLIANT

2.4.7.2 Records of all product release shall be maintained.

RESPONSE: COMPLIANT

2.4.8 Environmental Monitoring

The is a Food Storage and Distribution site.

2.4.8.1 A risk-based environmental monitoring program shall be in place for all food and pet food manufacturing processes.

RESPONSE: NOT APPLICABLE

2.4.8.2 The responsibility and methods for the environmental monitoring program shall be documented and implemented.

RESPONSE: NOT APPLICABLE

2.4.8.3 An environmental sampling and testing schedule shall be prepared, detailing the applicable pathogens or indicator organisms to test for that industry, the number of samples to be taken and the frequency of sampling.

RESPONSE: NOT APPLICABLE

2.4.8.4 Environmental testing results shall be monitored and corrective actions (refer to 2.5.3.1) implemented where unsatisfactory trends are observed.

RESPONSE: NOT APPLICABLE

2.5.1 Validation and Effectiveness (Mandatory)

The site has a documented Validation and effectiveness policy dated 4/16/19. The purpose is to identify the methods, responsibility and criteria for ensuring the effectiveness of the pre-requisite programs and validating critical food safety and quality limits to ensure their intended purpose. The pre-requisite programs are confirmed through quarterly reviews, and the critical limits and controls measures are reevaluated at least annually. Records sighted Crisis Management test dated 4/7/2020 Verification of Effectiveness Worksheet: Pest control, Cleaning and Sanitation, Monitoring of product temperature, Monitoring of cooler and freezer temperature, and waste removal are dated 4/2/2020. Last mock recall dated 6/11/2020 41 minutes 100%, Last water test COA dated 5/14/2020

2.5.1.1 The methods, responsibility and criteria for ensuring the effectiveness of all applicable elements of the SQF Program shall be documented and implemented. The methods applied shall ensure that: i. Good Manufacturing Practices are confirmed to ensure they achieve the required result; ii. Critical food safety limits are validated, and re-validated annually; iii. Changes to the processes or procedures are assessed to ensure controls are still effective; and iv. All applicable elements of the SQF Program are implemented and effective.

RESPONSE: COMPLIANT

2.5.1.2 Records of all validation activities shall be maintained.

RESPONSE: COMPLIANT

2.5.2 Verification Activities (Mandatory)

The site has a documented Verification Activities policy dated 4/16/19. The purpose is to define the methods, responsibility and criteria for verifying the effectiveness of the monitoring prerequisite programs, critical control points, critical quality points and other food safety and quality controls. The Validation and Verification Frequency Schedule (activity, description, frequency, responsibility and records) are documented. Records sighted Operators Daily check list (equipment) dated 4/14/2020, 2/12/2020, 1/4/2020, Master Sanitation and Preventive Maintenance schedule dated 10/14/19, 2/12/2020 Monthly Glass Brittle plastic inspection record dated 1/2/2020, 3/3/2020, 5/8/2020 Cooler Freezer temperature (continuous) monitoring dated 10/14/19, 2/14/2020, 6/11/2020. Temperature Records (verified) dated 6/12/2020, 2/12/2020, Receiving records Inbound Checklist (trailer inspection, Lot#) dated 1/15/2020, 4/16/2020, 1/14/2020 Receiving HACCP (seal, temp, trailer inspection) Report dated 2/11/2020, 6/12/2020, 10/14/19 Outbound checklist (temp trailer, trailer inspection) dated 6/12/2020, 2/12/2020 10/14/19 Driver Manifest and Invoice (item#, temp) dated 1/22/2020, 4/13/2020 Service inspection report verified (product application summary, condition/observation, pest activity) dated 5/21/2020, 4/23/2020, 2/28/2020

2.5.2.1 A verification schedule outlining the verification activities, their frequency of completion and the person responsible for each activity shall be prepared and implemented.

RESPONSE: COMPLIANT

2.5.2.2 The methods, responsibility and criteria for verifying monitoring of Good Manufacturing Practices, critical control points and other food safety controls, and the legality of certified products, shall be documented and implemented. The methods applied shall ensure that personnel with responsibility for verifying monitoring activities authorize each verified record.

RESPONSE: COMPLIANT

2.5.2.3 Records of the verification of monitoring activities shall be maintained.

RESPONSE: COMPLIANT

2.5.3 Corrective and Preventative Action (Mandatory)

The corrective and preventive action policy is dated 4/16/19. The purpose is to identify how corrective actions, and preventive actions are investigated, resolved, managed and controlled, including the identification of the cause and resolution of non-compliance. The methods include but is not limited to preventive actions, corrective actions, and continuous improvements program.

2.5.3.1 The responsibility and methods outlining how corrections and corrective actions are determined, implemented and verified, including the identification of the root cause and resolution of non-compliance of critical food safety limits and deviations from food safety requirements, shall be documented and implemented.

RESPONSE: COMPLIANT

2.5.3.2 Records of all investigation and resolution of non-conformities including their corrections and corrective action shall be maintained.

RESPONSE: COMPLIANT

2.5.4 Product Sampling, Inspection and Analysis

The site product sampling, inspections, and analysis policy dated 4/16/19 includes but is not limited to in-coming inspections, vendor review, and re-pack start-up and changeover checks.

2.5.4.1 The methods, responsibility and criteria for sampling, inspecting and/or analyzing raw materials, finished product and work-in-progress shall be documented and implemented. The methods applied shall ensure: i. Inspections and analyses are completed at regular intervals as required and to agreed specification and legal requirements; ii. Inspections are conducted to ensure raw materials, work in process and finished products comply with the relevant specification, regulatory requirements and are true to label; and iii. All analyses are conducted to nationally recognized methods or alternative methods which are validated as equivalent to the nationally recognized methods.

RESPONSE: COMPLIANT

2.5.4.2 On-site personnel that conduct environmental or product testing shall participate in an applicable proficiency testing program at least annually to ensure accuracy of results.

RESPONSE: NOT APPLICABLE

EVIDENCE: This is Food Storage and Dsitribution site

2.5.4.3 Where external laboratories are utilized to conduct input or product analysis, the laboratories shall be accredited to ISO 17025 or an equivalent national standard and shall be included on the site's contract service specifications register (refer to 2.3.3.1).

RESPONSE: NOT APPLICABLE

EVIDENCE: This is Food Storage and Dsitribution site

2.5.4.4 Records of all inspections and analyses shall be maintained.

RESPONSE: COMPLIANT

2.5.5 Internal Audits and Inspections (Mandatory)

The site has a documented internal audits and inspection policy dated 5/22/2020. The audits include but is not limited to Monthly internal audits, Quarterly SQF Review audits and Annual SQF audits. The goal is to continuously improve the process and procedure in order to produce the highest quality and level of food safety. Records sighted Monthly Internal audit record dated November 2019, May 2020, March 2020

2.5.5.1 The methods and responsibility for scheduling and conducting internal audits to verify the effectiveness of the SQF System shall be documented and implemented. Internal audits shall be conducted at least annually. The methods applied shall ensure: i. All applicable requirements of the SQF Food Safety Code for Manufacturing are audited as per the SQF audit checklist or similar tool; ii. Correction and corrective action of deficiencies identified during the internal audits are undertaken; and iii. Audit results are communicated to relevant management personnel and staff responsible for implementing and verifying corrective actions.

RESPONSE: COMPLIANT

2.5.5.2 Staff conducting internal audits shall be trained and competent in internal audit procedures.

RESPONSE: COMPLIANT

2.5.5.3 Regular inspections of the site and equipment shall be planned and carried out to verify Good Manufacturing Practices and building/equipment maintenance is compliant to the SQF Food Safety Code for Manufacturing. The site shall: i. Take corrections or corrective and preventative action; and ii. Maintain records of inspections and any corrective action taken.

2.5.5.4 Where practical staff conducting internal audits shall be independent of the function being audited.

RESPONSE: COMPLIANT

2.5.5.5 Records of internal audits and inspections and any corrections and corrective action taken as a result of internal audits shall be

maintained.

RESPONSE: COMPLIANT

2.6.1 Product Identification (Mandatory)

The site has a documented product identification policy dated 3/17/16. The policy is identifying the methods and responsibility for identifying product during all stages of the distribution and storage. And a documented Product trace policy dated 3/16/16. The process includes but is not limited to at receiving the PO number for each delivery is recorded on the receiving documentation. The receiving dated and PO numbers are tied to the manufacture/distributor's lot codes shipped to the site. The site software system incorporates lot traceability at the time of a PO is being received. A license plate (unique bar code labels) is places on each case/skid. The license is attached to the product during the storage and shipping movement. Records sighted Receiving records Inbound Checklist (trailer inspection, Lot#) dated 1/15/2020, 4/16/2020, 1/14/2020, Driver Manifest and Invoice (item#, temp) dated 1/22/2020, 4/13/2020

2.6.1.1 The methods and responsibility for identifying raw materials, ingredients, packaging materials, work-in -progress, process inputs and finished products during all stages of production and storage shall be documented and implemented. The product identification system shall be implemented to ensure: i. Raw materials, ingredients, packaging materials, work-in progress, process inputs and finished products are clearly identified during all stages of receipt, production, storage and dispatch; and ii. Finished product is labeled to the customer specification and/or regulatory requirements.

RESPONSE: COMPLIANT

2.6.1.2 Product identification records shall be maintained.

RESPONSE: COMPLIANT

2.6.1.3 Product start up and changeover procedures during packing shall be documented and implemented to ensure that the correct product is in the correct package and with the correct label, and that the changeover is inspected and approved by an authorized person.

RESPONSE: COMPLIANT

2.6.2 Product Trace (Mandatory)

The site has a documented product identification policy dated 3/17/16. The policy is identifying the methods and responsibility for identifying product during all stages of the distribution and storage. And a documented Product trace policy dated 3/16/16. The process includes but is not limited to at receiving the PO number for each delivery is recorded on the receiving documentation. The receiving dated and PO numbers are tied to the manufacture/distributor's lot codes shipped to the site. The site software system incorporates lot traceability at the time of a PO is being received. A license plate (unique bar code labels) is places on each case/skid. The license is attached to the product during the storage and shipping movement. The material are traceable through to the customer (one up) and trackability is maintained through the receiving, storage, and distribution process and other inputs (one Back).

2.6.2.1 The responsibility and methods used to trace product shall be documented and implemented to ensure: i. Finished product is traceable to the customer (one up) and provides traceability through the process to the manufacturing supplier and date of receipt of raw materials, food contact packaging and materials and other inputs (one back); ii. Traceability is maintained where product is reworked; and iii. The effectiveness of the product trace system shall be reviewed at least annually as part of the product recall and withdrawal review (refer to 2.6.3.3).

RESPONSE: COMPLIANT

2.6.2.2 Records of raw and packaging material receipt and use, and finished product dispatch and destination shall be maintained.

RESPONSE: COMPLIANT

2.6.3 Product Withdrawal and Recall (Mandatory)

The site has a documented Product withdrawal and Recall procedure dated 4/6/19. The policy includes but is not limited to the recall team and legal, Classes, inquiry and communication, the recall procedure and verification of the system Records sighted Last mock recall dated 6/11/2020 41 minutes 100%

2.6.3.1 The responsibility and methods used to withdraw or recall product shall be documented and implemented. The procedure shall: i. Identify those responsible for initiating, managing and investigating a product withdrawal or recall; ii. Describe the management procedures to be implemented including sources of legal, regulatory and expert advice and essential traceability information; and iii. Outline a communication plan to inform customers, consumers, authorities and other essential bodies in a timely manner appropriate to the nature of the incident; iv. SQFI, the certification body, and the appropriate regulatory authority shall be listed as an essential body and notified in instances of a food safety incident of a public nature, or product recall for any reason.

RESPONSE: COMPLIANT

2.6.3.2 Investigation shall be undertaken to determine the root cause of a withdrawal, mock recall or recall and details of investigations and any action taken shall be documented.

RESPONSE: COMPLIANT

2.6.3.3 The product withdrawal and recall system shall be reviewed, tested and verified as effective at least annually. Testing shall include incoming materials (one back) and finished product (one up).

RESPONSE: COMPLIANT

2.6.3.4 SQFI and the certification body shall be notified in writing within twenty-four (24) hours upon identification of a food safety event that requires public notification. SQFI shall be notified at foodsafetycrisis@sqfi.com.

RESPONSE: COMPLIANT

2.6.3.5 Records of all product withdrawals, recalls and mock recalls shall be maintained.

RESPONSE: COMPLIANT

2.7.1 Food Defense Plan (Mandatory)

The site has a documented Food Defense Plan dated 5/22/20. The purpose is to define the methods, responsibility, and criteria of preventing food adulteration caused by deliberate act of sabotage or terrorist like incident. The policy includes but is not limited to the site security team, facility access and authorized personnel, employee, receiving of goods, hazardous chemicals, and security training. The site also completed an Industry self-assessment checklist for Food Security. Dated 4/14/2020.

2.7.1.1 The methods, responsibility and criteria for preventing food adulteration caused by a deliberate act of sabotage or terrorist-like incident shall be documented, implemented and maintained.

RESPONSE: COMPLIANT

2.7.1.2 A food defense plan shall include: i. The name of the senior site management person responsible for food defense; ii. The methods implemented to ensure only authorized personnel have access to production equipment and vehicles, manufacturing and storage areas through designated access points; iii. The methods implemented to protect sensitive processing points from intentional adulteration; iv. The measures taken to ensure the secure receipt and storage of raw materials, packaging, equipment and hazardous chemicals; v. The measures implemented to ensure raw materials, ingredients, packaging materials, work-in progress, process inputs and finished products are held under secure storage and transportation conditions; and vi. The methods implemented to record and control access to the premises by employees, contractors, and visitors.

RESPONSE: COMPLIANT

2.7.1.3 The food defense plan shall be reviewed and challenged at least annually.

RESPONSE: MINOR

EVIDENCE: The site completed an Industry self-assessment checklist for Food Security. This is not a challenged of the food defense plan.

ROOT CAUSE: Confusion we conducted a self-assessment checklist for Food Security to the Food Defense Plan. It needed to be challenged.

CORRECTIVE ACTION: Personnel was challenge for a suspicious packaged / Bomb Threat. The test started 6/18/2020 to 6/19/2020 Packaged was placed in several locations around the company. Training was conducted and safety alerts to make everyone aware of suspicious package.

VERIFICATION OF CLOSEOUT: The food defense was challanged- Dylan Jones

2.7.1.4 Records of reviews of the food defense plan shall be maintained.

RESPONSE: COMPLIANT

2.7.2 Food Fraud

Pre the email from the CB Brian Neal Dated 6/4/19 the site is exempted.

2.7.2.1 The methods, responsibility and criteria for identifying the site's vulnerability to food fraud shall be documented, implemented and maintained. The food fraud vulnerability assessment shall include the site's susceptibility to product substitution, mislabeling, dilution, counterfeiting or stolen goods which may adversely impact food safety.

RESPONSE: EXEMPT

2.7.2.2 A food fraud mitigation plan shall be developed and implemented which specifies the methods by which the identified food fraud vulnerabilities shall be controlled.

RESPONSE: EXEMPT

2.7.2.3 The food fraud vulnerability assessment and mitigation plan shall be reviewed and verified at least annually.

RESPONSE: EXEMPT

2.7.2.4 Records of reviews of the food fraud vulnerability assessment and mitigation plan shall be maintained.

RESPONSE: EXEMPT

2.8.1 Allergen Management for Food Manufacturing (Mandatory)

The site has documented Allurement policy dated 4/20/20 that includes but is not limited to a register of ingredients/products containing allergen, how to segregate foods that contains allergen and the requirements if an allergen is spilled or broken.

2.8.1.1 The responsibility and methods used to control allergens and to prevent sources of allergens from contaminating product shall be documented and implemented. The allergen management program shall include: i. A risk analysis of those raw materials, ingredients and processing aids, including food grade lubricants, that contain food allergens; ii. An assessment of workplace-related food allergens from locker rooms, vending machines, lunch-rooms, and visitors; iii. A register of allergens which is applicable in the country of manufacture and the country (ies) of destination if known; iv. A list of allergens which is accessible by relevant staff, v. The hazards associated with allergens and their control incorporated into the food safety plan. vi. A management plan for control of identified allergens. The allergen management program shall include the identification, management, and labelling of products containing gluten, where applicable.

RESPONSE: COMPLIANT

2.8.1.2 Instructions shall be provided to all relevant staff involved in the receipt or handling of raw materials, work-in progress, rework or finished product on how to identify, handle, store and segregate raw materials containing allergens.

RESPONSE: COMPLIANT

2.8.1.3 Provision shall be made to clearly identify and segregate foods that contain allergens. Segregation procedures shall be implemented and continually monitored.

RESPONSE: COMPLIANT

2.8.1.4 Where allergenic material may be intentionally or unintentionally present, cleaning and sanitation of product contact surfaces between line changeovers shall be effective, appropriate to the risk and legal requirements, and sufficient to remove all potential target allergens from product contact surfaces, including aerosols as appropriate, to prevent cross-contact. Separate handling and production equipment shall be provided where satisfactory line hygiene and clean-up or segregation is not possible.

RESPONSE: COMPLIANT

2.8.1.5 Based on risk assessment, procedures for validation and verification of the effectiveness of the cleaning and sanitation of areas and equipment in which allergens are used shall be effectively implemented.

RESPONSE: COMPLIANT

2.8.1.6 Where allergenic material may be present, product changeover procedures shall be documented and implemented to eliminate the risk of cross-contact.

The product identification system shall make provision for clear identification and labeling in accordance with regulatory requirements 2.8.1.7 of those products produced on production lines and equipment on which foods containing allergens were manufactured. **RESPONSE: COMPLIANT** 2.8.1.8 The site shall document and implement methods to control the accuracy of finished product labels (or consumer information where applicable) and assure work-in-progress and finished product is true to label with regard to allergens. Such measures may include label approvals at receipt, label reconciliations during production, destruction of obsolete labels, verification of labels on finished product as appropriate, and product change over procedures. **RESPONSE: COMPLIANT** 2.8.1.9 The product trace system shall take into consideration the conditions under which allergen containing foods are manufactured and ensure full trace back of all ingredients and processing aids used. **RESPONSE: COMPLIANT** 2.8.1.10 Re-working of product containing food allergens shall be conducted under conditions that ensure product safety and integrity is maintained. Re-worked product containing allergens shall be clearly identified and traceable. **RESPONSE: COMPLIANT** Sites that do not handle allergenic materials or produce allergenic products shall document, implement and maintain an allergen 2.8.1.11 management program addressing at a minimum the mitigation of introducing unintended allergens through supplier, contract manufacturer, employee and visitor activities. **RESPONSE: COMPLIANT** 2.8.2 Allergen Management for Pet Food Manufacturing The is a Food Storage and Distribution site. 2.8.2.1 The responsibility and methods used to control allergens and to prevent sources of allergens from contaminating product shall be documented and implemented. The allergen management program shall include: i. A risk analysis of those inputs and processing aids, including food grade lubricants, that contain food allergens; ii. An assessment of workplace-related food allergens from locker rooms, vending machines, lunch-rooms, and visitors; iii. A list of allergens which is accessible by relevant staff; and iv. The hazards associated with allergens and their control incorporated into the food safety plan. **RESPONSE:** NOT APPLICABLE 2.8.2.2 Product labeling, in accordance with regulatory requirements, shall include aflergens where risks from cross-contact have been identified. **RESPONSE:** NOT APPLICABLE 2.8.3 Allergen Management for Manufacturers of Animal Feed The is a Food Storage and Distribution site. Sites that exclusively manufacture animal feed and do not manufacture, handle or store food or pet food products are not required to 2.8.3.1 implement an allergen management plan unless required by regulation or customer requirement. **RESPONSE: NOT APPLICABLE** 2.8.3.2 Where an allergen management plan is required by regulation or customer specification, the requirements of 2.8.2 shall apply. **RESPONSE: NOT APPLICABLE**

2.9.1 Training Requirements

The site has a documented Training Requirements policy dated 4/20/20. The purpose is to ensure the employee are provided training that is commensurate to the level of controls and monitoring required to effectively implement the SQF system The policy includes but is not limited to the required training and refresher training conducted annually.

2.9.1.1 The responsibility for establishing and implementing the training needs of the organization's personnel to ensure they have the required competencies to carry out those functions affecting products, legality, and safety shall be defined and documented.

2.9.1.2 Appropriate training shall be provided for personnel carrying out the tasks essential to the effective implementation of the SQF System and the maintenance of food safety and regulatory requirements. **RESPONSE: COMPLIANT** 2.9.2 Training Program (Mandatory) The site has a documented Training Requirements policy dated 4/20/20. The purpose is to ensure the employee are provided training that is commensurate to the level of controls and monitoring required to effectively implement the SQF system The policy includes but is not limited to the required training and refresher training conducted annually. 2.9.2.1 An employee training program shall be documented and implemented. It shall outline the necessary competencies for specific duties and the training methods to be applied for those staff carrying out tasks associated with: i. Developing and applying Good Manufacturing Practices; ii. Applying food regulatory requirements; iii. Steps identified by the hazard analysis and/or other instructions as critical to effective implementation of the food safety plan and the maintenance of food safety; and iv. Tasks identified as critical to meeting the effective implementation and maintenance of the SQF System. **RESPONSE: COMPLIANT** 2.9.3 Instructions Instructions are available Instructions shall be available in the languages relevant to the staff, explaining how all tasks critical to meeting regulatory compliance, 2.9.3.1 the maintenance of food safety, and process efficiency are to be performed. **RESPONSE: COMPLIANT** 2.9.4 **HACCP Training Requirements** HACCP training is dated 4/30/2020 2.9.4.1 HACCP training shall be provided for staff involved in developing and maintaining food safety plans. **RESPONSE: COMPLIANT** 2.9.5 Language Training materials and the delivery of training is provided in language understood by staff. 2.9.5.1 Training materials and the delivery of training shall be provided in language understood by staff. RESPONSE: COMPLIANT 2.9.6 **Refresher Training** Refresher training requirement is annually 2,9,6,1 The training program shall include provision for identifying and implementing the refresher training needs of the organization. **RESPONSE: COMPLIANT** 2.9.7 **Training Skills Register**

A training skills register describing who has been trained in relevant skills is maintained.

2.9.7.1 A training skills register describing who has been trained in relevant skills shall be maintained. The register shall indicate the: i. Participant name; ii. Skills description; iii. Description of the training provided; iv. Date training completed; v. Trainer or training provider; and vi. Supervisor's verification that the training was completed, and that the trainee is competent to complete the required tasks.

RESPONSE: MINOR

EVIDENCE: Trainer or training provider and Supervisor's verification are not documented on the register.

ROOT CAUSE: When reviewing the SQF code we miss Trainer and Supervisor's verification are not documented on the training register.

CORRECTIVE ACTION: On 6-19-2020 we added a column to the training registry that indicates who is the trainer and who is the employee Supervisor..

VERIFICATION OF CLOSEOUT: Training register updated-Dylan Jones

11.1.1 Premises Location and Approval

The location of the premises, operations and land use do not interfere with safe and hygienic operations. The Business License Expires 6/30/2020

11.1.1.1 The location of the premises shall be such that adjacent and adjoining buildings, operations and land use do not interfere with safe and hygienic operations.

RESPONSE: COMPLIANT

11.1.1.2 The construction and ongoing operation of the premises on the site shall be approved by the relevant authority.

RESPONSE: COMPLIANT

11.2.1 Materials and Surfaces

Product contact surfaces and those surfaces not in direct contact with food in food handling areas constructed of materials that will not contribute a food safety risk.

11.2.1.1 Product contact surfaces and those surfaces not in direct contact with food in food handling areas, raw material storage, packaging material storage, and cold storage areas shall be constructed of materials that will not contribute a food safety risk.

RESPONSE: COMPLIANT

11.2.2 Floors, Drains, and Waste Traps

Floors are constructed of material that can be effectively graded, drained.

11.2.2.1 Floors shall be constructed of smooth, dense impact resistant material that can be effectively graded, drained, impervious to liquid and easily cleaned.

RESPONSE: COMPLIANT

11.2.2.2 Floors shall be sloped to floor drains at gradients suitable to allow the effective removal of all overflow or wastewater under normal working conditions.

RESPONSE: COMPLIANT

11.2.2.3 Drains shall be constructed and located so they can be easily cleaned and not present a hazard.

RESPONSE: COMPLIANT

11.2.2.4 Waste trap system shall be located away from any food handling area or entrance to the premises.

RESPONSE: NOT APPLICABLE

EVIDENCE: No Waste trap system

11.2.3 Walls, Partitions, Doors and Ceilings Walls, ceilings and doors are of durable construction. Walls, partitions, ceilings and doors shall be of durable construction. Internal surfaces shall be smooth and impervious with a light-11.2.3.1 colored finish and shall be kept clean (refer to 11.2.13.1). **RESPONSE: COMPLIANT** 11.2.3.2 Wall-to-wall and wall-to-floor junctions shall be designed to be easily cleaned and sealed to prevent the accumulation of food debris. **RESPONSE: COMPLIANT** Ducting, conduit and pipes that convey services such as steam or water shall be designed and constructed to prevent the 11.2.3.3 contamination of food, ingredients and food contact surfaces and allow ease of cleaning. **RESPONSE: COMPLIANT** 11.2.3.4 Pipes carrying sanitary waste or wastewater that are located directly over product lines or storage areas shall be designed and constructed to prevent the contamination of food, materials, ingredients and food contact surfaces, and shall allow ease of cleaning. **RESPONSE: COMPLIANT** 11.2.3.5 Doors, hatches and windows and their frames in food processing, handing or storage areas shall be of a material and construction which meets the same functional requirements as for internal walls and partitions. Doors and hatches shall be of solid construction and windows shall be made of shatterproof glass or similar material. **RESPONSE: COMPLIANT** 11.2.3.6 Product shall be processed and handled in areas that are fitted with a ceiling or other acceptable structure that is constructed and maintained to prevent the contamination of products. **RESPONSE: COMPLIANT** 11.2.3.7 Drop ceilings shall be constructed to enable monitoring for pest activity, facilitate cleaning and provide access to utilities. **RESPONSE: NOT APPLICABLE** EVIDENCE: No Drop ceilings observed 11.2.4 Stairs, Catwalks and Platforms No stairs, catwalks and platforms in food processing and handling areas 11.2.4.1 Stairs, catwalks and platforms in food processing and handling areas shall be designed and constructed so as not to present a product contamination risk, and with no open grates directly above exposed food product surfaces. They shall be kept clean (refer to 11.2.13.1). RESPONSE: NOT APPLICABLE 11.2.5 **Lightings and Light Fittings** Light fittings in warehouses and other areas are protected with a shatterproof covering or fitted with protective covers. 11.2.5.1 Lighting in food processing and handling areas and at inspection stations shall be of appropriate intensity to enable the staff to carry out their tasks efficiently and effectively. RESPONSE: COMPLIANT 11.2.5.2 Light fittings in processing areas, inspection stations, ingredient and packaging storage areas, and all areas where the product is exposed shall be shatterproof, manufactured with a shatterproof covering or fitted with protective covers and recessed into or fitted flush with the ceiling. Where fittings cannot be recessed, structures must be protected from accidental breakage, manufactured from

11.2.5.3 Light fittings in warehouses and other areas where the product is protected shall be designed such as to prevent breakage and product contamination.

cleanable materials and addressed in the cleaning and sanitation program.

RESPONSE: COMPLIANT

11.2.6 Inspection / Quality Control Area

The repack area is suitable and clean to prevent product contamination.

11.2.6.1 A suitable area shall be provided for the inspection of the product if required.

RESPONSE: COMPLIANT

11.2.6.2 The inspection/quality control area shall be provided with facilities that are suitable for examination and testing of the type of product being handled/processed. The inspection area shall: i. Have easy access to hand washing facilities; ii. Have appropriate waste handling and removal; and iii. Be kept clean to prevent product contamination.

RESPONSE: COMPLIANT

11.2.7 Dust, Insect, and Pest Proofing

External doors, including overhead dock doors in food handling areas used for product, pedestrian or truck access are insect proofed.

11.2.7.1 All external windows, ventilation openings, doors and other openings shall be effectively sealed when closed and proofed against dust, vermin and other pests.

RESPONSE: COMPLIANT

11.2.7.2 External personnel access doors shall be provided. They shall be effectively insect-proofed and fitted with a self-closing device and proper seals to protect against ingress of dust, vermin and other pests.

RESPONSE: COMPLIANT

11.2.7.3 External doors, including overhead dock doors in food handling areas used for product, pedestrian or truck access shall be insect-proofed by at least one or a combination of the following methods: i. A self-closing device; ii. An effective air curtain; iii. An insect-proof screen; iv. An insect-proof annex; v. Adequate sealing around trucks in docking areas.

RESPONSE: COMPLIANT

11.2.7.4 Electric insect control devices, pheromone or other traps and baits shall be located so as not to present a contamination risk to the product, packaging, containers or processing equipment. Poison rodenticide bait shall not be used inside ingredient or product storage areas or processing areas.

RESPONSE: COMPLIANT

11.2.8 Ventilation

Adequate ventilation is provided.

11.2.8.1 Adequate ventilation shall be provided in enclosed processing and food handling areas.

RESPONSE: COMPLIANT

11.2.8.2 All ventilation equipment and devices in product storage and handling areas shall be adequately cleaned as per 11.2.12, to prevent unsanitary conditions.

RESPONSE: COMPLIANT

11.2.8.3 Extractor fans and canopies shall be provided in areas where cooking operations are carried out or a large amount of steam is generated and shall have the following features: i. Capture velocities shall be sufficient to prevent condensation build up and to evacuate all heat, fumes and other aerosols to the exterior via an exhaust hood positioned over the cooker(s); ii. Fans and exhaust vents shall be insect-proofed and located so as not to pose a contamination risk; and iii. Where appropriate, positive air-pressure system shall be installed to prevent airborne contamination.

RESPONSE: NOT APPLICABLE

EVIDENCE: No extractor fans and canopies. No cooking operations

11.2.9 Equipment, Utensils, and Protective Clothing

The site has a documented Equipment Utensil and Protective policy dated 3/9/19. The purpose is to describe the controls the facility uses to ensure equipment utensils and protective covering does not pose a threat to the product.

Specifications for equipment, utensils and protective clothing, and procedures for purchasing equipment shall be documented and 11.2.9.1 implemented. **RESPONSE: COMPLIANT** Equipment and utensils shall be designed, constructed, installed, operated and maintained to meet any applicable regulatory 11.2.9.2 requirements and not to pose a contamination threat to products. **RESPONSE: COMPLIANT** 11.2.9.3 Benches, tables, conveyors, mixers, mincers, graders and other mechanical processing equipment shall be hygienically designed and located for appropriate cleaning. Equipment surfaces shall be smooth, impervious and free from cracks or crevices. **RESPONSE: COMPLIANT** 11.2.9.4 Product containers, tubs, and bins used for edible and inedible material shall be constructed of materials that are non-toxic, smooth, impervious and readily cleaned as per 11.2.13. Bins used for inedible material shall be clearly identified. **RESPONSE: COMPLIANT** Waste and overflow water from tubs, tanks and other equipment shall be discharged direct to the floor drainage system, and to meet 11.2.9.5 local regulatory requirements. **RESPONSE: COMPLIANT** Protective clothing shall be manufactured from material that will not contaminate food and is easily cleaned. 11.2.9.6 RESPONSE: COMPHANT Racks shall be provided for the temporary storage of protective clothing when staff leave the processing area and shall be provided in 11,2,9,7 close proximity or adjacent to the personnel access doorways and hand washing facilities. **RESPONSE: COMPLIANT** All equipment, utensils and protective clothing shall be cleaned after use or at a frequency to control contamination and stored in a 11.2.9.8 clean and serviceable condition to prevent microbiological or cross-contact allergen contamination. **RESPONSE: COMPLIANT** 11.2.10 **Premises and Equipment Maintenance** The site has a documented Premises and equipment maintenance policy dated 3/9/19. The purpose is to define the methods and responsibility for the maintenance and repair of plant, equipment and building and carried out in a manner that minimizes the risk of product, packaging, or equipment contamination. The policy includes the maintenance schedule and instructions to maintenance contractors. The maintenance schedule is also documented in the contract service providers register. 11.2.10.1 The methods and responsibility for the maintenance and repair of plant, equipment and buildings shall be documented, planned and implemented in a manner that minimizes the risk of product, packaging or equipment contamination. **RESPONSE: COMPLIANT** Routine maintenance of plant and equipment in any food processing, handling or storage area shall be performed according to a 11.2.10.2 maintenance-control schedule and recorded. The maintenance schedule shall be prepared to cover building, equipment and other areas of the premises critical to the maintenance of product safety and quality. **RESPONSE: COMPLIANT** 11.2.10.3 Failures of plant and equipment in any food processing, handling or storage area shall be documented, reviewed and their repair incorporated into the maintenance control schedule. **RESPONSE: COMPLIANT** Maintenance staff and contractors shall comply with the site's personnel and process hygiene requirements (refer to 11.3.1, 11.3.2, 11.2.10.4 11.3.3, 11.3.4).

All maintenance and other engineering contractors required to work on site shall be trained in the site's food safety and hygiene

RESPONSE: COMPLIANT

RESPONSE: COMPLIANT

procedures, or shall be escorted at all times, until their work is completed.

11.2.10.5

Site supervisors shall be notified when maintenance or repairs are to be undertaken in any processing, handling or storage area. 11.2.10.6 **RESPONSE: COMPLIANT** The maintenance supervisor and the site supervisor shall be informed if any repairs or maintenance pose a potential threat to product 11.2.10.7 safety (i.e. pieces of electrical wire, damaged light fittings, and loose overhead fittings). When possible, maintenance is to be conducted outside processing times. **RESPONSE: COMPLIANT** 11.2.10.8 Temporary repairs, where required shall not pose a food safety risk and shall be included in the cleaning program. There shall be a plan in place to address completion of temporary repairs to ensure they do not become permanent solutions. RESPONSE: COMPLIANT 11.2.10.9 Maintenance staff and contractors shall remove all tools and debris from any maintenance activity once it has been completed and inform the area supervisor and maintenance supervisor so appropriate hygiene and sanitation can be completed and a pre-operational inspection conducted prior to the commencement of site operations. **RESPONSE: COMPLIANT** 11.2.10.10 Equipment located over product or product conveyors shall be lubricated with food grade lubricants and their use controlled to minimize the contamination of the product. **RESPONSE: NOT APPLICABLE** EVIDENCE: The is a Food Storage and Distribution site. 11.2.10.11 Paint used in a food handling or contact zone shall be suitable for use, in good condition and shall not be used on any product contact surface. **RESPONSE: COMPLIANT** 11.2.11 Calibration The calibration program is dated 3/9/19. The calibration and re-calibration of equipment used for monitoring activities outlined in the pre-requisite programs, food safety plans and other process controls. The annually and weekly calibration methods are outline in the 11.2,11.1 The methods and responsibility for the calibration and re-calibration of measuring, test and inspection equipment used for monitoring activities outlined in pre-requisite programs and food safety plans, or to demonstrate compliance with customer specifications shall be documented and implemented. Software used for such activities shall be validated as appropriate. **RESPONSE: COMPLIANT** Procedures shall be documented and implemented to address the disposition of potentially affected products should measuring, test 11.2.11.2 and inspection equipment be found to be out of calibration state. **RESPONSE: COMPLIANT** EVIDENCE: Procedures is not documented and implemented to address the disposition of potentially affected products should measuring, test and inspection equipment be found to be out of calibration state. SEE 12.2.9.2 for non-conformance 11.2.11.3 Calibrated measuring, test and inspected equipment shall be protected from damage and unauthorized adjustment. RESPONSE: COMPLIANT 11.2.11.4 Equipment shall be calibrated against national or international reference standards and methods or to accuracy appropriate to its use. In cases where standards are not available, the site shall provide evidence to support the calibration reference method applied. **RESPONSE: COMPLIANT** Calibration shall be performed according to regulatory requirements and/or to the equipment manufacturers recommended schedule. 11.2.11.5 **RESPONSE: COMPLIANT** 11.2.11.6 Calibration records shall be maintained.

11.2.12 Pest Prevention

The site has a documented intern Pest Prevention program dated 4/27/2020 and the site has a 3rd party PCO. The pest preventive scope of service is documented. The site map is sign and dated 6/11/2020, The business license expires 12/31/2021, and the applicator license expires on 6/30/21. The material list with brand names and EPA number is maintained. The SDS are on file. Recorfs sighted Service inspection report verified (product application summary, condition/observation, pest activity) dated 5/21/2020, 4/23/2020, 2/28/2020

11.2.12.1 The methods and responsibility for pest prevention shall be documented and effectively implemented. The premises, its surrounding areas, storage facilities, machinery and equipment shall be kept free of waste or accumulated debris so as not to attract pests and vermin.

RESPONSE: COMPLIANT

11.2.12.2 Identified pest activity shall not present a risk of contamination to food products, raw materials or packaging.

RESPONSE: COMPLIANT

11.2.12.3 Food products, raw materials or packaging that are found to be contaminated by pest activity shall be effectively disposed of, and the source of pest infestation investigated and resolved. Records shall be kept of the disposal, investigation, and resolution.

RESPONSE: COMPLIANT

11.2.12.4 The pest prevention program shall: i. Describe the methods and responsibility for the development, implementation and maintenance of the pest prevention program; ii. Record pest sightings and trend the frequency of pest activity to target pesticide applications; iii. Outline the methods used to prevent pest problems; iv. Outline the pest elimination methods; v. Outline the frequency with which pest status is to be checked; vi. Include on a site map the identification, location, number and type of bait stations set; vii. List the chemicals used (they are required to be approved by the relevant authority and their Safety Data Sheets (SDS) made available); viii. Outline the methods used to make staff aware of the bait control program and the measures to take when they come into contact with a bait station; ix. Outline the requirements for staff awareness and training in the use of pest and vermin control chemicals and baits; and x. Measure the effectiveness of the program to verify the elimination of applicable pests.

RESPONSE: COMPLIANT

EVIDENCE: Outline the methods used to make staff aware of the bait control program and the measures to take when they come into contact with a bait station is not documented SEE 12.2.10.4

11.2.12.5 Inspections for pest activity shall be undertaken on a regular basis by trained personnel and the appropriate action taken if pests are present.

RESPONSE: COMPLIANT

11.2.12.6 Records of all pest control applications shall be maintained.

RESPONSE: COMPLIANT

11.2.12.7 Pesticides and other toxic chemicals shall be clearly labeled and stored as described in element 11.6.4 and handled and applied by properly trained personnel. They shall be used by or under the direct supervision of trained personnel with a thorough understanding of the hazards involved, including the potential for the contamination of food and food contact surfaces.

RESPONSE: NOT APPLICABLE

EVIDENCE: Pesticides and other toxic chemicals Not stored on site

11.2.12.8 Pest contractors shall be: i. Licensed and approved by the local relevant authority; ii. Use only trained and qualified operators who comply with regulatory requirements; iii. Use only approved chemicals; iv. Provide a pest prevention plan (refer to 2.3.3) which will include and maintain a site map indicating the location of bait stations traps and other applicable pest control/monitoring devices; v. Report to a responsible authorized person on entering the premises and after the completion of inspections or treatments; and vi. Provide a written report of their findings and the inspections and treatments applied.

11.2.12.9 The site shall dispose of unused pest control chemicals and empty containers in accordance with regulatory requirements and ensure that: i. Empty chemical containers are not reused; ii. Empty containers are labeled, isolated and securely stored while awaiting collection; and iii. Unused and obsolete chemicals are stored under secure conditions while waiting authorized disposal by an approved vendor.

RESPONSE: NOT APPLICABLE

EVIDENCE: This is the responsibility of the PCO and not the site.

11.2.13 Cleaning and Sanitation

The site has a documented Cleaning and sanitation policy dated 4/27/2020. The policy includes but is not limited to the use of a 3rd party service to clean the staff amenities, the master sanitation schedule, instructions and verifications.

11.2.13.1 The methods and responsibility for the cleaning of the food handling and processing equipment and environment, storage areas, staff amenities and toilet facilities shall be documented and implemented. Consideration shall be given to: i. What is to be cleaned; ii. How it is to be cleaned; iii. When it is to be cleaned; iv. Who is responsible for the cleaning; v. Methods used to confirm the correct concentrations of detergents and sanitizers, and vi. The responsibility and methods used to verify the effectiveness of the cleaning and sanitation program.

RESPONSE: COMPLIANT

11.2.13.2 Provision shall be made for the effective cleaning of processing equipment, utensils and protective clothing.

RESPONSE: COMPLIANT

11.2.13.3 Suitably equipped areas shall be designated for cleaning product containers, knives, cutting boards and other utensils and for cleaning of protective clothing used by staff. These cleaning operations shall be controlled so as not to interfere with manufacturing operations, equipment or product. Racks and containers for storing cleaned utensils shall be provided as required.

RESPONSE: COMPLIANT

11.2.13.4 Cleaning in place (CIP) systems where used shall not pose a chemical contamination risk to raw materials, ingredients or product. CIP parameters critical to assuring effective cleaning shall be defined, monitored and recorded (e.g., chemical and concentration used, contact time and temperature). CIP equipment including spray balls shall be maintained and modifications to CIP equipment shall be validated. Personnel engaged in CIP activities shall be effectively trained.

RESPONSE: NOT APPLICABLE

EVIDENCE: No CIP sysytem. The is a Food Storage and Distribution site.

11.2.13.5 Pre-operational inspections shall be conducted following cleaning and sanitation operations to ensure food processing areas, product contact surfaces, equipment, staff amenities and sanitary facilities and other essential areas are clean before the commencement of production. Pre-operational inspections shall be conducted by qualified personnel.

RESPONSE: COMPLIANT

11.2.13.6 Staff amenities, sanitary facilities and other essential areas shall be inspected by qualified personnel to ensure the areas are clean, at a defined frequency.

RESPONSE: COMPLIANT

11.2.13.7 The responsibility and methods used to verify the effectiveness of the cleaning procedures shall be documented and implemented. A verification schedule shall be prepared.

RESPONSE: COMPLIANT

11.2.13.8 Detergents and sanitizers shall be suitable for use in a food manufacturing environment, labeled according to regulatory requirements, and purchased in accordance with applicable legislation. The organization shall ensure: i. The site maintains a list of chemicals approved for use; ii. An inventory of all chemicals purchased and used shall be maintained; iii. Detergents and sanitizers are stored as outlined in element 11.6.4; iv. Safety Data Sheets (SDS) are provided for all detergents and sanitizers purchased; and v. Only trained staff handles sanitizers and detergents.

11.2.13.9 Detergents and sanitizers that have been mixed for use shall be correctly mixed according to manufacturers' instructions, stored in containers that are suitable for use, and clearly identified. Mix concentrations shall be verified and records maintained.

RESPONSE: NOT APPLICABLE

EVIDENCE: No Detergents and sanitizers that have been mixed

11.2.13.10 The site shall dispose of unused detergents and sanitizers and empty containers in accordance with regulatory requirements and ensure that: i. Empty detergent and sanitizer containers are appropriately cleaned, treated and labeled before use; ii. Empty detergent and sanitizer containers are labeled, isolated and securely stored while awaiting collection; and iii. Unused and obsolete detergents and sanitizers are stored under secure conditions while waiting authorized disposal by an approved vendor.

RESPONSE: COMPLIANT

11.2.13.11 A record of pre-operational hygiene inspections, cleaning and sanitation activities, and verification activities shall be maintained.

RESPONSE: COMPLIANT

11.3.1 Personnel

No personnel observed with a known infectious diseases or exposed cuts, sores or lesions. No Smoking, chewing, eating, or spitting observed.

11.3.1.1 Personnel who are carriers or are known to have been carriers of infectious diseases that present a health risk to others through the packing or storage processes shall not engage in the processing or packing of food or enter storage areas where food is exposed.

RESPONSE: COMPLIANT

11.3.1.2 The site shall have measures in place to prevent contact of materials, ingredients, food packaging, food, or food contact surfaces from any bodily fluids from open wounds, coughing, sneezing, spitting, or any other means. In the event of an injury which causes spillage of bodily fluid, a properly trained employee shall ensure that all affected areas including handling and processing areas have been adequately cleaned and that all materials and products have been quarantined and disposed of.

RESPONSE: COMPLIANT

11.3.1.3 Personnel with exposed cuts, sores or lesions shall not engage in handling or processing products or handling primary packaging materials or food contact surfaces. Minor cuts or abrasions on exposed parts of the body shall be covered with a colored bandage containing a metal strip or an alternative suitable waterproof and colored dressing.

RESPONSE: COMPLIANT

11.3.1.4 Smoking, chewing, eating, or spitting is not permitted in areas where product is produced, stored, or otherwise exposed. Drinking of water is permissible only under conditions that prevent contamination or other food safety risks from occurring. Drinking water containers in production and storage areas shall be stored in clear, covered containers, and in designated areas away from raw materials, packaging or equipment.

RESPONSE: COMPLIANT

11.3.2 Hand Washing

Hand wash basins are constructed of stainless steel or similar non-corrosive material.

11.3.2.1 Hand wash basins shall be provided adjacent to all personnel access points and in accessible locations throughout food handling and processing areas as required.

RESPONSE: COMPLIANT

11.3.2.2 Hand wash basins shall be constructed of stainless steel or similar non-corrosive material and as a minimum supplied with: i. A potable water supply at an appropriate temperature; ii. Liquid soap contained within a fixed dispenser; iii. Paper towels in a hands-free cleanable dispenser; and iv. A means of containing used paper towels.

RESPONSE: COMPLIANT

11.3.2.3 The following additional facilities shall be provided in high risk areas: i. Hands free operated taps; and ii. Hand sanitizers.

RESPONSE: NOT APPLICABLE

EVIDENCE: The is a Food Storage and Distribution site.

11.3.2.4 A sign instructing people to wash their hands, and in appropriate languages, shall be provided in a prominent position. **RESPONSE: COMPLIANT** 11.3.2.5 Personnel shall have clean hands and hands shall be washed by all personnel, including staff, contractors and visitors: i. On entering food handling or processing areas; ii. After each visit to a toilet; iii. After using a handkerchief; iv. After smoking, eating or drinking; and v. After handling wash down hoses, dropped product or contaminated material. **RESPONSE: COMPLIANT** When gloves are used, personnel shall maintain the hand washing practices outlined above. 11.3.2.6 **RESPONSE: COMPLIANT** 11.3.3 Clothing Clothing worn by staff engaged in handling food is maintained, stored, laundered and worn so as not to present a contamination risk to products. 11.3.3.1 The site shall undertake a risk analysis to ensure that the clothing and hair policy protects materials, food and food contact surfaces from unintentional microbiological or physical contamination. **RESPONSE: COMPLIANT** 11.3.3.2 Clothing worn by staff engaged in handling food shall be maintained, stored, laundered and worn so as not to present a contamination risk to products. **RESPONSE: COMPLIANT** 11.3.3.3 Clothing, including shoes, shall be clean at the commencement of each shift and maintained in a serviceable condition. RESPONSE: COMPLIANT 11.3.3.4 Excessively soiled uniforms shall be changed or replaced where they present a product contamination risk. **RESPONSE: COMPLIANT** 11.3.3.5 Disposable gloves and aprons shall be changed after each break, upon re-entry into the processing area and when damaged. Nondisposable aprons and gloves shall be cleaned and sanitized as required and when not in use stored on racks provided in the processing area or designated sealed containers in personnel lockers and not on packaging, ingredients, product or equipment. **RESPONSE: COMPLIANT** 11.3.4 Jewelry and Personal Effects No jewelry or other loose objects observed worn or taken into a food handling or processing operation or any area where food is exposed. Jewelry and other loose objects shall not be worn or taken into a food handling or processing operation or any area where food is 11.3.4.1 exposed. The wearing of plain bands with no stones and prescribed medical alert bracelets can be permitted, however the site will need to consider their customer requirements and the applicable food legislation. **RESPONSE**; COMPLIANT 11.3.5 **Visitors** All visitors, including management observed following the site protocol. 11.3.5.1 All visitors, including management and maintenance staff, shall wear suitable clothing and footwear when entering any food processing or handling area. **RESPONSE: COMPLIANT**

11.3.5.2

RESPONSE: COMPLIANT

All visitors shall be required to remove jewelry and other loose objects.

11.3.5.3 Visitors exhibiting visible signs of illness shall be prevented from entering areas in which food is handled or processed. RESPONSE: COMPLIANT 11.3.5.4 Visitors shall enter and exit food handling areas through the proper staff entrance points and comply with all hand washing and personnel practice requirements. **RESPONSE: COMPLIANT** 11.3.5.5 All visitors shall be trained in the site's food safety and hygiene procedures before entering any food processing or handling areas or shall be escorted at all times in food processing, handling and storage areas. **RESPONSE: COMPLIANT** 11.3.6 **Staff Amenities** Staff amenities are supplied with appropriate lighting and ventilation. 11.3.6.1 Staff amenities supplied with appropriate lighting and ventilation shall be made available for the use of all persons engaged in the handling and processing of product. **RESPONSE: COMPLIANT** 11.3.7 **Change Rooms** Provision are made for staff to store their street clothing and personal items. 11,3.7.1 Facilities shall be provided to enable staff and visitors to change into and out of protective clothing as required. **RESPONSE: COMPLIANT** 11.3.7.2 Change rooms shall be provided for staff engaged in the processing of high risk foods or processing operations in which clothing can be soiled. **RESPONSE: COMPLIANT** 11.3.7.3 Provision shall be made for staff to store their street clothing and personal items separate from food contact zones and food and packaging storage areas. **RESPONSE: COMPLIANT** 11.3.7.4 Where required, a sufficient number of showers shall be provided for use by staff. **RESPONSE:** NOT APPLICABLE EVIDENCE: No showers required. 11.3.8 Laundry The is a Food Storage and Distribution site. 11.3.8.1 Provision shall be made for the laundering and storage of clothing worn by staff engaged in high risk processes and for staff engaged in processing operations in which clothing can be heavily soiled. **RESPONSE:** NOT APPLICABLE 11.3.9 **Sanitary Facilities** Toilet rooms are designed and constructed so that they are accessible to staff and separate from any processing and food handling operations. Toilet rooms shall be: i. Designed and constructed so that they are accessible to staff and separate from any processing and food

handling operations; ii. Accessed from the processing area via an airlock vented to the exterior or through an adjoining room; iii. Sufficient in number for the maximum number of staff; iv. Constructed so that they can be easily cleaned and maintained; v. Include an area inside or nearby, for storing protective clothing, outer garments and other items while using the facilities; and vi. Kept clean and

11.3.9.1

11.3.9.2 Sanitary drainage shall not be connected to any other drains within the premises and shall be directed to a septic tank or a sewerage system in accordance in regulations.

RESPONSE: COMPLIANT

11.3.9.3 Hand wash basins shall be provided immediately outside or inside the toilet room and designed as outlined in 11.3.2.2.

RESPONSE: COMPLIANT

11.3.10 Lunch Rooms

Separate lunch-room facilities are provided away from a food contact/handling zone.

11.3.10.1 Separate lunch-room facilities shall be provided away from a food contact/handling zone.

RESPONSE: COMPLIANT

11.3.10.2 Lunch-room facilities shall be: i. Ventilated and well lit; ii. Provided with adequate tables and seating to cater for the maximum number of staff at one sitting; iii. Equipped with a sink serviced with hot and cold potable water for washing utensils; iv. Equipped with refrigeration and heating facilities enabling them to store or heat food and to prepare non-alcoholic beverages if required; and v. Kept clean and free from waste materials and pests.

RESPONSE: COMPLIANT

11.3.10.3 Where outside eating areas are provided, they should be kept clean and free from waste materials and maintained in a manner that minimizes the potential for introduction of contamination including pests to the site.

RESPONSE: COMPLIANT

11.3.10.4 Signage in appropriate languages instructing people to wash their hands before entering the food processing areas shall be provided in a prominent position in lunch-rooms, at lunch-room exits and in outside eating areas if applicable.

RESPONSE: COMPLIANT

11.4.1 Staff Engaged in Food Handling and Processing Operations

The site has a documented Personnel practices policy dated 4/28/2020. The policy is to outline the established procedures to ensure the staff engaged in food handling and storage areas are properly trained and adhere to the sites policies to ensure food safety. The requirements for personnel engaged in any handling, inspection or repacking of exposed food products or ingredient includes but is not limited to wash their hands when entering the area, not wear false nails, or polish, not bring glass or breakable plastic in to the area, and no food, beverage, or use of tobacco products in areas where food is being processed or stored.

11.4.1.1 All personnel engaged in any food handling, preparation or processing operations shall ensure that products and materials are handled and stored in such a way as to prevent damage or product contamination. They shall comply with the following processing practices: i. Personnel entry to processing areas shall be through the personnel access doors only; ii. All doors are to be kept closed. Doors shall not be left open for extended periods when access for waste removal or receiving of product/ingredient/packaging is required; iii. Packaging material, product, and ingredients shall be kept in appropriate containers as required and off the floor; iv. Waste shall be contained in the bins identified for this purpose and removed from the processing area on a regular basis and not left to accumulate; v. Staff shall not eat or taste any product being processed in the food handling/contact zone, except as noted in element 11.4.1.2; vi. The wearing of false fingernails, false eyelashes, eyelash extensions, long nails or fingernail polish is not permitted when handling exposed food; and vii. Hair restraints are used where product is exposed.

RESPONSE: COMPLIANT

11.4.1.2 In circumstances where it is necessary to undertake sensory evaluations in a food handling/contact zone the site shall implement proper controls and procedures to ensure: i. Food safety is not compromised; ii. Sensory evaluations are conducted by authorized personnel only; iii. A high standard of personal hygiene is practiced by personnel conducting sensory evaluations; iv. Sensory evaluations are conducted in areas equipped for the purpose; and v. Equipment used for sensory evaluations is sanitized, maintained and stored separate from processing equipment.

RESPONSE: COMPLIANT

11.4.1.3 All wash down hoses shall be stored on hose racks after use and not left on the floor.

11.5.1	Water Supply
	Adequate supplies of potable water drawn from the city of Ontario.
11.5.1.1	Adequate supplies of potable water drawn from a known clean source shall be provided for use during processing operations, as an ingredient and for cleaning the premises and equipment.
	RESPONSE: COMPLIANT
11.5.1.2	Supplies of hot and cold water shall be provided as required to enable the effective cleaning of the premises and equipment. RESPONSE: COMPLIANT
11.5.1.3	The delivery of water within the premises shall ensure potable water is not contaminated. RESPONSE: COMPLIANT
11.5.1.4	The use of non-potable water shall be controlled such that: i. There is no cross-contamination between potable and non-potable water lines; ii. Non-potable water piping and outlets are clearly identified; and iii. Hoses, taps, and other similar sources of possible contamination are designed to prevent back flow or back siphonage.
	RESPONSE: NOT APPLICABLE
	EVIDENCE: non-potable water is not used.
11.5.1.5	Where water is stored on site, storage facilities shall be adequately designed, constructed and maintained to prevent contamination.
17.3.1.5	RESPONSE: NOT APPLICABLE
	EVIDENCE: No water is stored on site
11.5.2	Water Treatment
	No Water treatment system
11.5.2.1	Water treatment methods, equipment and materials, if required, shall be designed, installed and operated to ensure water receives an effective treatment.
	RESPONSE: NOT APPLICABLE
	and a second control of the control
11.5.2.2	Water treatment equipment shall be monitored regularly to ensure it remains serviceable.
	RESPONSE: NOT APPLICABLE
11.5.2.3	Treated water shall be regularly monitored to ensure it meets the indicators specified.
	RESPONSE: NOT APPLICABLE
11.5.2.4	Water used in as an ingredient in processing, or in cleaning and sanitizing equipment, shall be tested, and if required, treated to maintain potability (refer to 11.5.2.1).
	RESPONSE: NOT APPLICABLE
	annone en e
11.5.3	Ice Supply
	Ice is not used.
11.5.3.1	Ice provided for use during processing operations or as a processing aid or an ingredient shall comply with 11.5.4.1.
	RESPONSE: NOT APPLICABLE
11.5.3.2	Ice rooms and receptacles shall be constructed of materials as outlined in elements 11.2.1, 11.2.2 and 11.2.3 and designed to minimize contamination of the ice during storage and distribution.
	RESPONSE: NOT APPLICABLE

11.5.4 Water Quality

Last water test COA dated 5/14/2020

11.5.4.1 Water shall comply with local, national or internationally recognized potable water microbiological and quality standards as required when used for: i. washing, thawing and treating food; ii. handwashing iii. to convey food; iv. as an ingredient or food processing aid; v. cleaning food contact surfaces and equipment; vi. the manufacture of ice; or vii. the manufacture of steam that will come into contact with food or used to heat water that will come in contact with food.

RESPONSE: COMPLIANT

11.5.4.2 Microbiological analysis of the water and ice supply shall be conducted to verify the cleanliness of the supply, the monitoring activities and the effectiveness of the treatment measures implemented. Samples for analysis shall be taken at sources supplying water for the process or cleaning, or from within the site. The frequency of analysis shall be risk-based, and at a minimum annually.

RESPONSE: COMPLIANT

11.5.4.3 Water and ice shall be analyzed using reference standards and methods.

RESPONSE: COMPLIANT

11.5.5 The Quality of Air and Other Gasses

Compressed air or other gases are not used.

11.5.5.1 Compressed air or other gases (e.g. nitrogen, carbon dioxide) that contacts food or food contact surfaces shall be clean and present no risk to food safety.

RESPONSE: NOT APPLICABLE

11.5.5.2 Compressed air systems, and systems used to store or dispense other gases used in the manufacturing process that come into contact with food or food contact surfaces shall be maintained and regularly monitored for quality and applicable food safety hazards.

RESPONSE: NOT APPLICABLE

11.6.1 Storage and Handling of Goods

The site has a documented Storage and Transport policy dated 5/6/17. The purpose is to describe the procedures used to properly receive, store, and transport ingredients and goods to ensure food safety. The cold storage, freezing and chilling of foods is monitored for operational performance by daily temperature verification, continuous monitoring, and contracted preventative maintenance of the system. The dry storage areas used for the storage of product ingredients, packaging and other dry goods are located separately from sanitation areas where water is used. The equipment storage is located in areas away from exposed food ingredients and packaging. Chemicals used in sanitation/maintenance process are stored in secured areas away from packaging, raw materials and finished goods to prevent potential for food contamination. FIFO is the sites stock rotation metohds.

11.6.1.1 The site shall document and implement an effective storage plan that allows for the safe, hygienic storage of raw materials (i.e. frozen, chilled, and ambient), ingredients, packaging materials, equipment, and chemicals.

RESPONSE: COMPLIANT

11.6.1.2 The responsibility and methods for ensuring effective stock rotation principles are applied shall be documented and implemented.

RESPONSE: COMPLIANT

11.6.1.3 Procedures shall be in place to ensure that all ingredients, materials, work-in-progress, rework, and finished product are utilized within their designated shelf-life.

RESPONSE: COMPLIANT

11.6.1.4 Equipment storage rooms shall be designed and constructed to allow for the hygienic and efficient storage of equipment and containers.

Where goods described in 11.6.2 to 11.6.4 are held under temporary or overflow conditions that are not designed for the safe storage 11.6.1.5 of goods, a risk analysis shall be undertaken to ensure there is no risk to the integrity of those goods or contamination or adverse effect on food safety. **RESPONSE:** NOT APPLICABLE EVIDENCE: No temporary or overflow storeage 11.6.1.6 Records shall be available to validate alternate or temporary control measures for the storage of raw materials, ingredients, packaging materials, equipment, chemicals, or finished products. **RESPONSE:** NOT APPLICABLE EVIDENCE: No temporary or overflow storeage 11.6.2 Cold Storage, Freezing and Chilling of Foods Records sighted Cooler Freezer temperature (continuous) monitoring dated 10/14/19, 2/14/2020, 6/11/2020. Temperature Records (verified) dated 6/12/2020, 2/12/2020 The site shall provide confirmation of the effective operational performance of freezing, chilling and cold storage facilities. Chillers, 11.6.2.1 blast freezers and cold storage rooms shall be designed and constructed to allow for the hygienic and efficient refrigeration of food and easily accessible for inspection and cleaning. **RESPONSE: COMPLIANT** 11,6.2.2 Sufficient refrigeration capacity shall be available to chill, freeze, store chilled or store frozen the maximum anticipated throughput of product with allowance for periodic cleaning of refrigerated areas. RESPONSE: COMPLIANT 11.6.2.3 Discharge from defrost and condensate lines shall be controlled and discharged to the drainage system. RESPONSE: COMPHANT Freezing, chilling and cold storage rooms shall be fitted with temperature monitoring equipment and located to monitor the warmest 11.6.2.4 part of the room and be fitted with a temperature measurement device that is easily readable and accessible. **RESPONSE: COMPLIANT** 11.6.2.5 Loading and unloading docks shall be designed to protect the product during loading and unloading. **RESPONSE: COMPLIANT** 11.6.3 Storage of Dry Ingredients, Packaging, and Shelf Stable Packaged Goods The dry storage areas used for the storage of product ingredients, packaging and other dry goods are located separately from sanitation areas where water is used. 11.6.3.1 Rooms used for the storage of product ingredients, packaging, and other dry goods shall be located away from wet areas and constructed to protect the product from contamination and deterioration. RESPONSE: COMPLIANT 11.6.3.2 Racks provided for the storage of packaging shall be constructed of impervious materials and designed to enable cleaning of the floors and the storage room. Storage areas shall be constructed to prevent packaging from becoming a harborage for pests or vermin. **RESPONSE: COMPLIANT** Vehicles used in food contact, handling or processing zones or in cold storage rooms shall be designed and operated so as not to 11.6.3.3

11.6.4 Storage of Hazardous Chemicals and Toxic Substances

present a food safety hazard. **RESPONSE:** COMPLIANT

Chemicals used in sanitation/maintenance process are stored in secured areas away from packaging, raw materials and finished goods to prevent potential for food contamination.

11.6.4.1 Hazardous chemicals and toxic substances with the potential for food contamination shall be stored so as not to present a hazard to staff, product, packaging, product handling equipment or areas in which the product is handled, stored or transported.

RESPONSE: COMPLIANT

11.6.4.2 Processing utensils and packaging shall not be stored in areas used to store hazardous chemicals and toxic substances.

RESPONSE: COMPLIANT

11.6.4.3 Daily supplies of chemicals used for continuous sanitizing of water or as a processing aid, or for emergency cleaning of food processing equipment or surfaces in food contact zones, may be stored within or in close proximity to a processing area provided that access to the chemical storage facility is restricted to authorized personnel.

RESPONSE: COMPLIANT

11.6.4.4 Pesticides, rodenticides, fumigants and insecticides shall be stored separate from sanitizers and detergents. All chemicals shall be stored in their original containers, or in clearly labelled and suitable secondary containers if allowed by applicable legislation.

RESPONSE: NOT APPLICABLE

EVIDENCE: Pesticides, rodenticides, fumigants and insecticides are not stored on site

11.6.4.5 Hazardous chemical and toxic substance storage facilities shall: i. Be compliant with national and local legislation and designed such that there is no cross-contamination between chemicals; ii. Be adequately ventilated; iii. Be provided with appropriate signage indicating the area is a hazardous storage area; iv. Be secure and lockable to restrict access only to those personnel with formal training in the handling and use of hazardous chemicals and toxic substances; v. Have instructions on the safe handling of hazardous chemicals and toxic substances readily accessible to staff; vi. Be equipped with a detailed and up-to-date inventory of all chemicals contained in the storage facility; vii. Have suitable first aid equipment and protective clothing available close to the storage area; viii. In the event of a hazardous spill, be designed such that spillage and drainage from the area is contained; and ix. Be equipped with spillage kits and cleaning equipment.

RESPONSE: COMPLIANT

11.6.5 Loading, Transport, and Unloading Practices

The site has a documented Storage and Transport policy dated 5/6/17. The purpose is to describe the procedures used to properly receive, store, and transport ingredients and goods to ensure food safety.

11.6.5.1 The practices applied during loading, transport and unloading of food shall be documented, implemented and designed to maintain appropriate storage conditions and product integrity. Foods shall be loaded, transported and unloaded under conditions suitable to prevent cross-contamination.

RESPONSE: COMPLIANT

11.6.6 Loading

The loading, transport, and unloading practices include but is not limited to procedure includes but is not limited to seals/locked, cleanliness, odor, physical appearance, and the presence of rodents or insects. Records sighted Outbound checklist (temp trailer, trailer inspection) dated 6/12/2020, 2/12/2020 10/14/19 Driver Manifest and Invoice (item#, temp) dated 1/22/2020, 4/13/2020

11.6.6.1 Vehicles (e.g. trucks/vans/containers) used for transporting food shall be inspected prior to loading to ensure they are clean, in good repair, suitable for the purpose and free from odors or other conditions that may impact negatively on the product.

RESPONSE: COMPLIANT

11.6.6.2 Loading practices shall be designed to minimize unnecessary exposure of the product to conditions detrimental to maintaining the product and package integrity during loading and transport.

RESPONSE: COMPLIANT

11.6.6.3 Vehicles (e.g. trucks/vans/containers) shall be secured from tampering using a seal or other agreed upon and acceptable device or system.

RESPONSE: COMPLIANT

11.6.7 Transport

Records sighted Outbound checklist (temp trailer, trailer inspection) dated 6/12/2020, 2/12/2020 10/14/19 Driver Manifest and Invoice (item#, temp) dated 1/22/2020, 4/13/2020

11.6.7.1 Refrigerated units shall maintain the food at required temperatures and the unit's temperature settings shall be set, checked and recorded before loading and product temperatures recorded at regular intervals during loading as appropriate.

RESPONSE: COMPLIANT

11.6.7.2 The refrigeration unit shall be operational at all times and checks completed of the unit's operation, the door seals and the storage temperature at regular intervals during transit.

RESPONSE: COMPLIANT

11.6.8 Unloading

The loading, transport, and unloading practices include but is not limited to procedure includes but is not limited to seals/locked, cleanliness, odor, physical appearance, and the presence of rodents or insects. Records Sighted Receiving records Inbound Checklist (trailer inspection, Lot#) dated 1/15/2020, 4/16/2020, 1/14/2020 Receiving HACCP (seal, temp, trailer inspection) Report dated 2/11/2020, 6/12/2020, 10/14/19

11.6.8.1 Prior to opening the doors, the refrigeration unit's storage temperature settings and operating temperature shall be checked and recorded. Unloading shall be completed efficiently and product temperatures shall be recorded at the commencement of unloading and at regular intervals during unloading.

RESPONSE: COMPLIANT

11.6.8.2 Unloading practices shall be designed to minimize unnecessary exposure of the product to conditions detrimental to maintaining the product and package integrity.

RESPONSE: COMPLIANT

11.7.1 Process Flow

The process flow is designed to prevent cross-contamination and organized.

11.7.1.1 The process flow shall be designed to prevent cross-contamination and organized so there is a continuous flow of product through the process. The flow of personnel shall be managed such that the potential for contamination is minimized.

RESPONSE: COMPLIANT

11.7.2 Receipt of Raw and Packaging Materials and Ingredients

The dry storage areas used for the storage of product ingredients, packaging and other dry goods are located separately from sanitation areas where water is used.

11.7.2.1 Dry ingredients and packaging shall be received and stored separately from frozen and chilled raw materials to ensure there is no cross-contamination. Unprocessed raw materials shall be received and segregated to ensure there is no cross-contamination.

RESPONSE: COMPLIANT

11.7.3 Thawing of Food

No thawing The is a Food Storage and Distribution site.

11.7.3.1 Thawing of food shall be undertaken in equipment and rooms appropriate for the purpose.

RESPONSE: NOT APPLICABLE

11.7.3.2 Equipment for water thawing shall be continuous flow to ensure the water exchange rate and temperature do not contribute to product deterioration or contamination. Water overflow shall be directed into the floor drainage system and not onto the floor.

RESPONSE: NOT APPLICABLE

11.7.3.3 Air thawing facilities shall be designed to thaw food under controlled conditions at a rate and temperature that does not contribute to product deterioration or contamination.

RESPONSE: NOT APPLICABLE

11.7.3.4 Provision is to be made for the containment and regular disposal of used cartons and packaging from thawed product so that there is no risk to the product. **RESPONSE:** NOT APPLICABLE 11.7.4 **High Risk Processes** No a high risk site The is a Food Storage and Distribution site. 11.7.4.1 The processing of high risk food shall be conducted under controlled conditions such that sensitive areas in which high risk food has undergone a "kill" step, a "food safety intervention" or is subject to post process handling, are protected/segregated from other processes, raw materials or staff who handle raw materials to ensure cross-contamination is minimized. **RESPONSE: NOT APPLICABLE** 11.7.4.2 Areas in which high risk processes are conducted shall only be serviced by staff dedicated to that function. **RESPONSE:** NOT APPLICABLE Staff access points shall be located, designed and equipped to enable staff to don distinctive protective clothing and to practice a high 11.7.4.3 standard of personal hygiene to prevent product contamination. **RESPONSE:** NOT APPLICABLE 11.7.4.4 Staff engaged in high risk areas shall change into clean clothing or temporary protective outerwear when entering high risk areas. **RESPONSE:** NOT APPLICABLE Product transfer points shall be located and designed so as not to compromise high risk segregation and to minimize the risk of cross-11.7.4.5 contamination. **RESPONSE:** NOT APPLICABLE 11.7.5 **Control of Foreign Matter Contamination** The site has a documented Control of foreign matter policy dated 4/28/2020. The master maintenance schedule, pre-operational and operational sanitation inspections and monthly facility inspections are tools utilized to ensure plant and equipment remain in good condition. The measure includes but is not limited to glass preventative, wood preventative, and metal preventive. The glass breakage and other foreign material contamination procedures are documented.

11.7.5.1 The responsibility and methods used to prevent foreign matter contamination of the product shall be documented, implemented and communicated to all staff.

RESPONSE: COMPLIANT

11.7.5.2 Inspections shall be performed to ensure plant and equipment remain in good condition, equipment has not become detached or deteriorated and is free from potential contaminants.

RESPONSE: COMPLIANT

11.7.5.3 All glass objects or similar material in food handling/contact zones shall be listed in a glass register including details of their location.

RESPONSE: COMPLIANT

11.7.5.4 Containers, equipment and other utensils made of glass, porcelain, ceramics, laboratory glassware or other like material (except where the product is contained in packaging made from these materials, or measurement instruments with glass dial covers or MIG thermometers required under regulation) shall not be permitted in food processing /contact zones.

RESPONSE: COMPLIANT

11.7.5.5 Regular inspections of food handling/contact zones shall be conducted to ensure they are free of glass or other like material and to establish changes to the condition of the objects listed in the glass register.

RESPONSE: COMPLIANT

11.7.5.6 Glass instrument dial covers on processing equipment and MIG thermometers shall be inspected at the start of each shift to confirm they have not been damaged.

11.7.5.7 Wooden pallets and other wooden utensils used in food handling/contact zones shall be dedicated for that purpose, clean, maintained in good order. Their condition shall be subject to regular inspection.11.7.5.8 Loose metal objects on equipment, equipment covers and overhead structures shall be removed or tightly fixed so as not to present a hazard. **RESPONSE: COMPLIANT** 11.7.5.8 Loose metal objects on equipment, equipment covers and overhead structures shall be removed or tightly fixed so as not to present a **RESPONSE: COMPLIANT** 11.7.5.9 Knives and cutting instruments used in processing and packaging operations shall be controlled and kept clean and well maintained. Snap-off blades shall not be used in manufacturing or storage areas. **RESPONSE: COMPLIANT** 11.7.6 Detection of Foreign Objects No Detection of Foreign Objects equipment. 11.7.6.1 The responsibility, methods and frequency for monitoring, maintaining, calibrating and using screens, sieves, filters or other technologies to remove or detect foreign matter shall be documented and implemented. **RESPONSE: NOT APPLICABLE** Metal detectors or other physical contaminant detection technologies shall be routinely monitored, validated and verified for 11.7.6.2 operational effectiveness. The equipment shall be designed to isolate defective product and indicate when it is rejected. **RESPONSE: NOT APPLICABLE** 11.7.6.3 Records shall be maintained of the inspection of foreign object detection devices and of any products rejected or removed by them. Records shall include any corrective actions resulting from the inspections.

11.7.7 Managing Foreign Matter Contamination Incidents

The glass breakage and other foreign material contamination procedures are documented.

11.7.7.1 In all cases of foreign matter contamination the affected batch or item shall be isolated, inspected, reworked or disposed.

RESPONSE: COMPLIANT

RESPONSE: NOT APPLICABLE

11.7.7.2 In circumstances where glass or similar material breakage occurs, the affected area is to be isolated, cleaned and thoroughly inspected (including cleaning equipment and footwear) and cleared by a suitably responsible person prior to the commencement of operations.

RESPONSE; COMPLIANT

11.8.1 Location

No lab The is a Food Storage and Distribution site.

11.8.1.1 On site laboratories conducting chemical and microbiological analysis that may pose a risk to product safety, shall be located separate from any food processing or handling activity and designed to limit access only to authorized personnel.

RESPONSE: NOT APPLICABLE

11.8.1.2 Provisions shall be made to isolate and contain all laboratory waste held on the premises and manage it separately from food waste. Laboratory wastewater outlet shall as a minimum be down stream of drains that service food processing and handling areas.

RESPONSE: NOT APPLICABLE

11.8.1.3 Signage shall be displayed identifying the laboratory area as a restricted area accessible only by authorized personnel.

RESPONSE: NOT APPLICABLE

11.9.1 Dry and Liquid Waste Disposal

The site has a documented dry and liquid waste policy dated 1/2/2020. The purpose is to describe the methods used to effectively manage the collection, handling and disposal of waste streams to provide a method for handling and removing waste in accordance with regulatory and GMP standards.

11.9.1.1 The responsibility and methods used to collect and handle dry, wet and liquid waste and store prior to removal from the premises shall be documented and implemented.

RESPONSE: COMPLIANT

11.9.1.2 Waste shall be removed on a regular basis and not build up in food handling or processing areas. Designated waste accumulation areas shall be maintained in a clean and tidy condition until external waste collection is undertaken.

RESPONSE: COMPLIANT

11.9.1.3 Trolleys, vehicles waste disposal equipment, collection bins and storage areas shall be maintained in a serviceable condition, cleaned and sanitized regularly so as not to attract pests and other vermin.

RESPONSE: COMPLIANT

11.9.1.4 Adequate provision shall be made for the disposal of all solid processing waste including trimmings, inedible material and used packaging.

RESPONSE: COMPLIANT

11.9.1.5 Where applicable, a documented procedure shall be in place for the controlled disposal of trademarked materials. Where a contracted disposal service is used, the disposal process shall be reviewed regularly to confirm compliance.

RESPONSE: COMPLIANT

11.9.1.6 Inedible waste designated for animal feed shall be stored and handled so as to not cause a risk to the animal or to further processing.

RESPONSE: NOT APPLICABLE

EVIDENCE: No waste for animal feed.

11.9.1.7 Waste held on site prior to disposal shall be stored in a separate storage facility and suitably insect proofed and contained so as not to present a hazard.

RESPONSE: COMPLIANT

11.9.1.8 Adequate provision shall be made for the disposal of all liquid waste from processing and food handling areas. Liquid waste shall be either removed from the processing environment continuously or held in a designated storage area in lidded containers prior to disposal so as not to present a hazard.

RESPONSE: COMPLIANT

11.9.1.9 Reviews of the effectiveness of waste management will form part of daily hygiene inspections and the results of these inspections shall be included in the relevant hygiene reports.

RESPONSE: COMPLIANT

11.10.1 Grounds and Roadways

The grounds and area surrounding the premises are maintained. The loading and unloading areas are maintained so as not to present a hazard to the food safety operation of the premises.

11.10.1.1 Measures shall be established to maintain a suitable external environment, and the effectiveness of the established measures shall be monitored and periodically reviewed.

RESPONSE: COMPLIANT

11.10.1.2 The grounds and area surrounding the premises shall be maintained to minimize dust and kept free of waste, accumulated debris or standing water so as not to attract pests and vermin.

Paths, roadways and loading and unloading areas shall be maintained so as not to present a hazard to the food safety operation of the 11.10.1.3 premises. **RESPONSE: COMPLIANT** Paths, roadways, loading and unloading areas shall be adequately drained to prevent ponding of water. Drains shall be separate from 11.10.1.4 the site drainage system and regularly cleared of debris. **RESPONSE: COMPLIANT** Surroundings shall be kept neat and tidy and not present a hazard to the hygienic and sanitary operation of the premises. 11.10.1.5 **RESPONSE: COMPLIANT** Paths from amenities leading to site entrances are required to be effectively sealed. 11.10.1.6 12.1.1 **Premises Location and Approval** The location of the premises, operations and land use do not interfere with safe and hygienic operations. The Business License Expires 6/30/2020 The location of the premises shall be such that adjacent and adjoining buildings, operations and land use do not interfere with safe 12,1,1,1 and hygienic operations. **RESPONSE: COMPLIANT** 12.1.1.2 The construction and ongoing operation of the premises on the site shall be approved by the relevant authority. **RESPONSE: COMPLIANT** 12.2.1 **Materials and Surfaces** Product contact surfaces and those surfaces not in direct contact with food in food handling areas constructed of materials that will not contribute a food safety risk. In warehouses where food products are recouped or exposed, product contact surfaces shall be constructed of materials that will not 12.2.1.1 contribute a food safety risk. **RESPONSE: COMPLIANT** 12.2.2 Floors, Drains and Waste Traps Floors are constructed of material that can be effectively graded, drained. Floors shall be constructed of smooth, dense impact resistant material that can be effectively graded, drained, impervious to liquid and 12.2.2.1 easily cleaned. **RESPONSE: COMPLIANT** Drains shall be constructed and located so they can be easily cleaned and not present a hazard. Drains if located in storage and 12,2.2,2 handling areas, shall be maintained in a clean manner. **RESPONSE: COMPLIANT** Waste trap system shall be located away from any food handling or storage area or entrance to the premises. 12.2.2.3 **RESPONSE:** NOT APPLICABLE EVIDENCE: No water trap system 12.2.3 Walls, Partitions, Doors and Ceilings Walls, ceilings and doors are of durable construction.

12.2.3.1 Walls, partitions, ceilings and doors shall be of durable construction. Internal surfaces shall be smooth and impervious, and shall be kept clean (refer to 12.2.11.1). **RESPONSE: COMPLIANT** 12.2.3.2 Wall to walf and wall to floor junctions shall be designed to be easily cleaned and sealed to prevent the accumulation of food debris. **RESPONSE: COMPLIANT** 12.2.3.3 Doors shall be of solid construction; and windows shall be made of shatterproof glass or similar material. **RESPONSE: COMPLIANT** 12.2.3.4 Drop ceilings shall be additionally constructed to enable monitoring for pest activity, facilitate cleaning and provide access to utilities. **RESPONSE:** NOT APPLICABLE EVIDENCE: No drop ceiling 12.2.4 **Lighting and Light Fittings** Light fittings in warehouses and other areas are protected with a shatterproof covering or fitted with protective covers. 12.2.4.1 Lighting in warehouses where food product is recouped or exposed shall be of appropriate intensity to enable the staff to carry out their tasks efficiently and effectively. **RESPONSE: COMPLIANT** Light fittings in areas where food product is recouped or exposed shall be shatterproof, manufactured with a shatterproof covering or 12.2.4.2 fitted with protective covers and recessed into or fitted flush with the ceiling. **RESPONSE: COMPLIANT** 12.2.4.3 Light fittings in other areas where product is protected shall be designed such as to prevent breakage and product contamination. **RESPONSE**; COMPLIANT 12.2.5 Dust, Insect and Pest Proofing External doors, including overhead dock doors in food handling areas used for product, pedestrian or truck access are insect proofed., The PCO business license expires 12/31/2021, and the applicator license expires on 6/30/21. Records sighted Service inspection report verified (product application summary, condition/observation, pest activity) dated 5/21/2020, 4/23/2020, 2/28/2020 12.2.5.1 All external windows, ventilation openings, doors and other openings shall be effectively sealed when closed and proofed against dust, vermin and other pests. **RESPONSE: COMPLIANT** Personnel access doors shall be provided. They shall be effectively insect-proofed and fitted with a self-closing device and proper seals 12.2.5.2 to protect against entry of dust, vermin and other pests. RESPONSE: COMPLIANT 12.2.5.3 Inspections for pest activity shall be undertaken on a regular basis by trained personnel and the appropriate action taken if pests are present. **RESPONSE: COMPLIANT** Electric insect control devices, pheromone or other traps and baits shall be located so as not to present a contamination risk to 12.2.5.4 product, packaging, containers or equipment. Poison rodenticide bait shall not be used inside food storage areas. **RESPONSE: COMPLIANT** 12.2.6 Ventilation Adequate ventilation is provided.

Adequate ventilation shall be provided in enclosed storage and food handling areas.

12.2.6.1

12.2.6.2 All ventilation equipment and devices in product storage and handling areas shall be adequately cleaned as per 12.2.11.

RESPONSE: COMPLIANT

12.2.7 Equipment, Utensils and Protective Clothing

The site has a documented Equipment Utensil and Protective policy dated 3/9/19. The purpose is to describe the controls the facility uses to ensure equipment utensils and protective covering does not pose a threat to the product.

12.2.7.1 Equipment and utensils shall be designed, constructed, installed, operated and maintained so as not to pose a contamination threat to products.

RESPONSE: COMPLIANT

12.2.7.2 Protective clothing in areas where food product is recouped or exposed shall be manufactured from material that is not liable to contaminate food and easily cleaned.

RESPONSE: COMPLIANT

12.2.7.3 In areas where food product is recouped or exposed, racks shall be provided for the temporary storage of protective clothing when staff leaves the processing area and shall be provided in close proximity or adjacent to the personnel access doorways and hand washing facilities.

RESPONSE: COMPLIANT

12.2.8 Premises and Equipment Maintenance

The site has a documented Premises and equipment maintenance policy dated 3/9/19. The purpose is to define the methods and responsibility for the maintenance and repair of plant, equipment and building and carried out in a manner that minimizes the risk of product, packaging, or equipment contamination. The policy includes the maintenance schedule and instructions to maintenance contractors. The maintenance schedule is also documented in the contract service providers register.

12.2.8.1 The methods and responsibility for the maintenance and repair of plant, equipment and buildings shall be documented, planned and implemented in a manner that minimizes the risk of product, packaging or equipment contamination.

RESPONSE: COMPLIANT

12.2.8.2 Routine maintenance of site and equipment in any food storage area shall be performed according to a maintenance-control schedule and recorded. The maintenance schedule shall be prepared to cover building, equipment and other areas of the premises critical to the maintenance of product safety.

RESPONSE: COMPLIANT

12.2.8.3 Failures of site and equipment in any storage area shall be documented, reviewed and their repair incorporated into the maintenance control schedule.

RESPONSE: COMPLIANT

12.2.8.4 Maintenance staff and contractors shall comply with the site's personnel and process hygiene requirements (refer to 12.3.1, 12.3.2, 12.3.4).

RESPONSE: COMPLIANT

12.2.8.5 All maintenance and other engineering contractors required to work on site shall be trained in the site's food safety and hygiene procedures and shall be assessed in their understanding before entering into any food storage areas.

RESPONSE: COMPLIANT

12.2.8.6 Facility supervisors shall be notified when maintenance or repairs are to be undertaken in any food processing, handling or storage area.

RESPONSE: COMPLIANT

12.2.8.7 The maintenance supervisor and the facility supervisor shall be informed if any repairs or maintenance pose a potential threat to product safety (i.e. pieces of electrical wire, damaged light fittings, and loose overhead fittings). When possible, maintenance is to be conducted outside operating times.

Temporary repairs, where required shall not pose a food safety risk. They shall exclude the use of fasteners such are wire or tape, are 12.2.8.8 clearly identified and dated and included on cleaning programs. There shall be a plan in place to address final completion of temporary repairs in order to ensure temporary repairs do not become permanent solutions. **RESPONSE:** COMPLIANT

Maintenance staff and contractors shall remove all tools and debris from any maintenance activity once it has been completed and 12.2.8.9 inform the area supervisor and maintenance supervisor so appropriate hygiene and sanitation can be completed prior to the **RESPONSE:** COMPLIANT

Paint used in a food handling or contact zone shall be suitable for use and in good condition and shall not be used on any product 12.2.8.10

RESPONSE: COMPLIANT

12.2.9 Calibration

The calibration program is dated 3/9/19. The calibration and re-calibration of equipment used for monitoring activities outlined in the pre-requisite programs, food safety plans and other process controls. The annually and weekly calibration methods are outline in the policy. Records sighted: Thermometer Calibration Log dated 11/15/19, 3/6/2020, 5/8/2020

The methods and responsibility for the calibration and re-calibration of measuring, test and inspection equipment used for monitoring 12.2.9.1 activities outlined in pre-requisite program, food safety plans and other process controls, or to demonstrate compliance with customer specifications shall be documented and implemented. Software used for such activities shall be validated as appropriate.

Procedures shall be documented and implemented to address the disposition of potentially affected products should measuring, test 12.2.9.2 RESPONSE: MINOR

EVIDENCE: Procedures is not documented and implemented to address the disposition of potentially affected products should measuring, test and inspection equipment be found to be out of calibration state.

ROOT CAUSE: The following was not address the disposition of potentially affected products should measuring, test and inspection

CORRECTIVE ACTION: On 6/19/2020 calibration procedure scope has been change. If a thermometer is discovered out of calibration the product that was tested will be put on QC Hold. Product will be re temp, if temperature test is good product will be released. Faulty

VERIFICATION OF CLOSEOUT: The calibration procedure was updated-Dylan Jones

12.2.9.3 Calibrated measuring, test and inspected equipment shall be protected from damage and unauthorized adjustment.

Equipment shall be calibrated against national or international reference standards and methods or to accuracy appropriate to its use. 12.2.9.4 In cases where standards are not available, the supplier shall provide evidence to support the calibration reference method applied.

Calibration shall be performed according to regulatory requirements and/or to the equipment manufacturers recommended schedule. 12.2.9,5

12.2.9.6 Calibration records shall be maintained.

12.2.10 Pest Prevention

The pest preventive scope of service is documented. The site map is sign and dated 6/11/2020, The business license expires 12/31/2021, and the applicator license expires on 6/30/21. The material list with brand names and EPA number is maintained. The SDS are on file. Records sighted Service inspection report verified (product application summary, condition/observation, pest activity) dated 5/21/2020, 4/23/2020, 2/28/2020

12.2.10.1 The methods and responsibility for pest prevention shall be documented and effectively implemented. The premises, its surrounding areas, storage facilities, machinery and equipment shall be kept free of waste or accumulated debris so as not to attract pests and vermin.

RESPONSE: COMPLIANT

12.2.10.2 Any identified pest activity shall not present a risk of contamination to food products or packaging.

RESPONSE: COMPLIANT

12.2.10.3 Food products or packaging that is found to be contaminated by pest activity shall be effectively disposed of, and the source of pest infestation investigated and resolved.

RESPONSE: COMPLIANT

12.2.10.4 The pest prevention program shall: i. Describe the methods and responsibility for the development, implementation and maintenance of the pest prevention program; ii. Record pest sightings and trend the frequency of pest activity to target pesticide applications; iii. Outline the methods used to prevent pest problems; iv. Outline the pest elimination methods; v. Outline the frequency with which pest status is to be checked; vi. Include on a site map the identification, location, number and type of bait stations set; vii. List the chemicals used (they are required to be approved by the relevant authority and their Safety Data Sheets (SDS) made available); viii. Outline the methods used to make staff aware of the bait control program and the measures to take when they come into contact with a bait station; ix. Outline the requirements for staff awareness and training in the use of pest and vermin control chemicals and baits; and x. Measure the effectiveness of the program to verify the elimination of applicable pests.

RESPONSE: MINOR

EVIDENCE: Outline the methods used to make staff aware of the bait control program and the measures to take when they come into contact with a bait station is not documented

ROOT CAUSE: No methods use to make staff aware of balt control program and no measures what to do if in contact with a balt station.

CORRECTIVE ACTION: on 6/23/2020 Management of Pest and Vermin was updated to make sure the staff was aware of the Balt Control Program and also what to do if they come in contact with a balt station.

VERIFICATION OF CLOSEOUT: Management of Pest and Vermin was updated

12.2.10.5 Inspections for pest activity shall be undertaken on a regular basis by trained personnel and the appropriate action taken if pests are present.

RESPONSE: COMPLIANT

12.2.10.6 Records of all pest control applications shall be maintained.

RESPONSE: COMPLIANT

12.2.10.7 Pesticides and other toxic chemicals shall be clearly labeled and stored as described in element 12.6.5 and handled and applied by properly trained personnel. They shall be used by or under the direct supervision of trained personnel with a thorough understanding of the hazards involved, including the potential for the contamination of food and food contact surfaces.

RESPONSE: NOT APPLICABLE

EVIDENCE: Pesticides and other toxic chemicals are not stored on site and is the responsibility of the PCO and the site.

12.2.10.8 Pest control contractors shall be: i. Licensed and approved by the local relevant authority; ii. Use only trained and qualified operators who comply with regulatory requirements; iii. Use only approved chemicals; iv. Provide a pest control management plan (refer to 2.3.3) which will include and maintain a site map indicating the location of bait stations and traps and other applicable pest control/monitoring devices; v. Report to a responsible authorized person on entering the premises and after the completion of inspections or treatments; and vi. Provide a written report of their findings and the inspections and treatments applied.

12.2.10.9 The site shall dispose of unused pest control chemicals and empty containers in accordance with regulatory requirements and ensure that: i. Empty chemical containers are not reused; ii. Empty containers are labeled, isolated and securely stored while awaiting collection; and iii. Unused and obsolete chemicals are stored under secure conditions while waiting authorized disposal by an approved vendor.

RESPONSE: NOT APPLICABLE

EVIDENCE: This is the responsibility of the PCO and not the site.

12.2.11 Cleaning and Sanitation

The site has a documented Cleaning and sanitation policy dated 4/27/2020. The policy includes but is not limited to the use of a 3rd party service to clean the staff amenities, the master sanitation schedule, instructions and verifications. Records sighted Master Sanitation and Preventive Maintenance schedule dated 10/14/19, 2/12/2020, Restroom Maintenance log dated 10/8/19, 8/19/19

12.2.11.1 The methods and responsibility for the cleaning of the food handling and storage areas, staff amenities and toilet facilities shall be documented and implemented. Consideration shall be given to: i. What is to be cleaned; ii. How it is to be cleaned; iii. When it is to be cleaned; iv. Who is responsible for the cleaning; and v. The responsibility and methods used to verify the effectiveness of the cleaning and sanitation program.

RESPONSE: COMPLIANT

12.2.11.2 Provision shall be made for the effective cleaning of processing equipment, utensils and protective clothing.

RESPONSE: COMPLIANT

12.2.11.3 The responsibility and methods used to verify the effectiveness of the cleaning procedures shall be documented and implemented. A verification schedule shall be prepared.

RESPONSE: COMPLIANT

12.2.11.4 Detergents and sanitizers that are used to clean, sanitize and maintain the facility shall be purchased in accordance with applicable legislation. The organization shall ensure: i. The site maintains a list of chemicals approved for use within the site; ii. An inventory of all chemicals purchased and used for cleaning and sanitation purposes shall be maintained; iii. Detergents and chemicals are stored as outlined in 12.6.5; iv. Safety Data Sheets (SDS) are provided for all detergents and sanitizers purchased; v. Only trained staff handles sanitizers and detergents;

RESPONSE: COMPLIANT

12.2.11.5 Detergents and sanitizers that have been mixed for use shall be correctly mixed according to manufacturers' instructions, stored in containers that are suitable for use, and clearly identified. Mix concentrations shall be verified and records maintained.

RESPONSE: NOT APPLICABLE

EVIDENCE: No detergents and sanitizers that have been mixed for use.

12.2.11.6 The site; shall dispose of unused detergents and sanitizers and empty containers in accordance with regulatory requirements and ensure that: i. Empty detergent and sanitizer containers are appropriately cleaned, treated and labeled before use; ii. Empty detergent and sanitizer containers are labeled, isolated and securely stored while awaiting collection; and iii. Unused and obsolete detergents and sanitizers are stored under secure conditions while waiting authorized disposal by an approved vendor.

RESPONSE: COMPLIANT

12.2.11.7 A record of hygiene inspections, cleaning and sanitation activities, and verification activities shall be maintained.

RESPONSE: COMPLIANT

12.3.1 Personnel

No personnel observed with a known infectious diseases or exposed cuts, sores or lesions. No Smoking, chewing, eating, or spitting observed.

12.3.1.1 Personnel suffering from infectious diseases or are carriers of, any infectious disease are not permitted to work in the distribution center or in the transportation of food, and shall not engage in food handling operations, or be permitted access to storage areas where the product is exposed.

12.3.1.2 The site shall have measures in place to prevent contact of materials, ingredients, food packaging, food, or food contact surfaces from any bodily fluids from open wounds, coughing, sneezing, spitting, or any other means. In the event of an injury which causes spillage of bodily fluid, properly trained employee shall ensure that all affected areas including handling and processing areas have been adequately cleaned and that all materials and products have been quarantined and disposed of. **RESPONSE: COMPLIANT** 12.3.1.3 Personnel with exposed cuts, sores or lesions shall not be engaged in handling exposed product or food contact surfaces. Minor cuts or abrasions on exposed parts of the body shall be covered with protective bandage, or an alternative suitable dressing. **RESPONSE: COMPLIANT** Smoking, chewing, eating, or spitting is not permitted in any food handling or storage areas where the product is exposed. Drinking is 12.3.1.4 permissible under conditions that prevent contamination or other food safety risks from occurring. **RESPONSE: COMPLIANT** 12.3.2 **Hand Washing** Hand wash basins are constructed of stainless steel or similar non-corrosive material. 12.3.2.1 Hand wash basins shall be available and accessible as required. **RESPONSE: COMPLIANT** 12.3.2.2 Hand wash basins shall be constructed of stainless steel or similar non-corrosive material and as a minimum supplied with a potable water supply at an appropriate temperature, supplied with liquid soap contained within a fixed dispenser, with paper towels with a means of containing used paper towels. An effective hand dryer may be used in instances where there is no direct hand contact of food or food contact surfaces. **RESPONSE: COMPLIANT** A sign instructing people to wash their hands, and in appropriate languages, shall be provided in a prominent position. 12.3.2.3 **RESPONSE: COMPLIANT** 12.3.2.4 When gloves are used, personnel shall maintain the hand washing practices outlined above. **RESPONSE: COMPLIANT** 12.3.3 Clothing Clothing worn by staff engaged in handling food is maintained, stored, laundered and worn so as not to present a contamination risk to 12.3.3.1 Clothing worn by staff shall be maintained, stored, laundered and worn so as not to present a contamination risk to product, **RESPONSE: COMPLIANT** 12.3.3.2 Clothing worn by staff engaged in handling food shall be maintained, stored, laundered and worn so as not to present a contamination risk to products. **RESPONSE: COMPLIANT** 12.3.4 Jewelry and Personal Effects No jewelry or other loose objects observed worn or taken into a food handling or processing operation or any area where food is exposed.

Jewelry and other loose objects shall not be worn or taken into any area where exposed food is recouped. The wearing of wedding 12.3.4.1 rings and medical alert bracelets (plain bands with no stones) that cannot be removed can be permitted, however the site will need to consider their customer requirements and the applicable food legislation.

RESPONSE: COMPLIANT

12.3.5 **Visitors**

All visitors, including management observed following the site protocol.

12.3.5.1 All visitors, including management and maintenance staff, shall wear suitable clothing and footwear when entering any food handling **RESPONSE: COMPLIANT** 12.3.5.2 All visitors shall be required to follow the GDPs outlined by the site. **RESPONSE: COMPLIANT** Visitors exhibiting visible signs of illness shall be prevented from entering areas in which food is handled or exposed. 12.3.5.3 RESPONSE: COMPLIANT 12.3.5.4 Visitors shall enter and exit food handling areas through the proper staff entrance points and comply with all hand washing and personal practice requirements. **RESPONSE: COMPLIANT** Facility shall have a policy for how drivers are managed and designated driver areas are maintained to prevent contamination or other 12.3.5.5 food safety risks. **RESPONSE: COMPLIANT** 12.3.6 **Staff Amenities** Staff amenities are supplied with appropriate lighting and ventilation. Staff amenities supplied with appropriate lighting and ventilation shall be made available for the use of all persons engaged in the 12.3.6.1 handling of product. **RESPONSE: COMPLIANT** 12.3.7 Change Rooms Provision are made for staff to store their street clothing and personal items. 12.3.7.1 Facilities shall be provided to enable staff and visitors to change into and out of protective clothing as required. **RESPONSE: COMPLIANT** Provisions shall be made for staff to store their personal items separate from food contact zones and food and packaging storage 12.3.7.2 **RESPONSE: COMPLIANT** 12.3.8 **Sanitary Facilities** Toilet rooms are designed and constructed so that they are accessible to staff and separate from any processing and food handling operations. 12.3.8.1 Toilet rooms shall be: i. Designed and constructed so that they are accessible to staff and separate from any food handling operations; ii. Accessed from the warehouse or product handling area via an airlock vented to the exterior or through an adjoining room; iii. Sufficient in number for the maximum number of staff; iv. Constructed so that they can be easily cleaned and maintained; and v. Kept clean and tidy. **RESPONSE: COMPLIANT** 12.3.8.2 Sanitary drainage shall not be connected to any other drains within the premises and shall be directed to a septic tank or a sewerage system. Procedure shall be documented and implemented to properly manage sewage back-ups in order to minimize the potential for contamination. **RESPONSE: COMPLIANT** Hand wash basins shall be provided immediately outside or inside the toilet room and designed as outlined in 12.3.2.2. 12.3.8.3 **RESPONSE: COMPLIANT**

12.3.9 Lunch Rooms

Separate lunch-room facilities are provided away from handling pr storage area.

12.3.9.1 Separate lunch room facilities shall be provided away from a food handling or storage areas. Lunch rooms shall be kept clean and tidy and free from waste materials and pests.

RESPONSE: COMPLIANT

12.3.9.2 Signage in appropriate languages advising people to wash their hands before entering the food storage areas shall be provided in a prominent position in lunch rooms and at lunch room exits.

RESPONSE: COMPLIANT

12.4.1 Staff Engaged in Food Handling and Repack/Recoup Operations

The site has a documented Personnel practices policy dated 4/28/2020. The policy is to outline the established procedures to ensure the staff engaged in food handling and storage areas are properly trained and adhere to the sites policies to ensure food safety. The requirements for personnel engaged in any handling, inspection or repacking of exposed food products or ingredient includes but is not limited to wash their hands when entering the area, not wear false nails, or polish, not bring glass or breakable plastic in to the area, and no food, beverage, or use of tobacco products in areas where food is being processed or stored.

12.4.1.1 All personnel engaged in the direct handling of exposed food shall comply with the following practices: i. Personnel entry to food handling areas shall be through the personnel access doors only; ii. All doors are to be kept closed. Doors shall not be left open for extended periods when access for waste removal or stock transfer; iii. The wearing of false fingernails or fingernail polish is not permitted when handling food; iv. Materials and products shall be kept in appropriate containers as required and off the floor; v. Waste shall be contained in the bins identified for this purpose and removed from the operational area on a regular basis and not left to accumulate; vi. Staff shall not eat or taste any product in the food storage or handling area.

RESPONSE: COMPLIANT

12.4.1.2 All personnel engaged in storage, transport and handling of packaged products and materials shall ensure that products and materials are handled and stored in such a way as to prevent damage or product contamination.

RESPONSE: COMPLIANT

12.5.1 Water Supply

Adequate supplies of potable water drawn from the city of Ontario.

12.5.1.1 Adequate supplies of water drawn from a known clean source shall be provided for use during holding or storage and for cleaning the premises and equipment.

RESPONSE: COMPLIANT

12.5.1.2 Supply of hot and cold water shall be provided as required to enable the effective cleaning of the premises and equipment.

RESPONSE: COMPLIANT

12.5.2 Water Quality

Adequate supplies of potable water drawn from the city of Ontario. Last water test COA dated 5/14/2020

12.5.2.1 Microbiological analysis of the water and ice supply that is in contact with food or food contact surfaces shall be conducted to verify the cleanliness of the supply, the monitoring activities and the effectiveness of the treatment measures implemented.

RESPONSE: COMPLIANT

12.5.2.2 Water and ice, that contacts food or food contact surfaces, shall be analyzed using reference standards and methods.

RESPONSE: COMPLIANT

12.5.3 Water Delivery

Last water test COA dated 5/14/2020

12.5.3,1	The delivery of water within the premises shall ensure potable water is not contaminated. RESPONSE: COMPLIANT
12.5.3.2	The use of non-potable water shall be controlled such that: i. There is no cross contamination between potable and non-potable water lines; ii. Non-potable water piping and outlets are clearly identified.
	RESPONSE: NOT APPLICABLE
	EVIDENCE: non-potable water is not used.
12.5.4	Ice Supply
	ice is not used
12.5.4.1	Ice rooms and receptacles shall be constructed of materials as outlined in elements 12.2.1, 12.2.2 and 12.2.3 and designed to minimize contamination of the ice during storage and distribution.
	RESPONSE: NOT APPLICABLE
12.5.5	Analysis
12.5.5	Last water test COA dated 5/14/2020
12.5.5.1	Microbiological analysis of the water and ice supply that is in contact with food or food contact surfaces shall be conducted to verify the cleanliness of the supply, the monitoring activities and the effectiveness of the treatment measures implemented.
	RESPONSE: COMPLIANT
12.5.5.2	Water and ice, that is contact with food or food contact surfaces, shall be analyzed using reference standards and methods.
	RESPONSE: COMPLIANT
12.5.6	The Quality of Air and Other Gases
	Compressed air or other gasses are not used.
12.5.6.1	Compressed air or other gasses (e.g. nitrogen, carbon dioxide) that contacts food or food contact surfaces shall be clean and present no risk to food safety.
	RESPONSE: NOT APPLICABLE
12.5.6.2	Compressed air systems, and systems used to store or dispense other gasses used in the storage and distribution process shall be maintained and regularly monitored for quality and microbiological purity.
	RESPONSE: NOT APPLICABLE
	taranta de controlar de la con Canada de la controlar de la c
12.6.1	Storage and Handling of Goods
	The site has a documented Storage and Transport policy dated 5/6/17. The purpose is to describe the procedures used to properly receive, store, and transport ingredients and goods to ensure food safety. The dry storage areas used for the storage of product ingredients, packaging and other dry goods are located separately from sanitation areas where water is used.
12.6.1.1	The site shall implement an effective storage plan that allows for the safe, hygienic storage of ice, food products (frozen, chilled, and ambient), packaging materials, equipment, and chemicals.
	RESPONSE; COMPLIANT
12.6.1.2	The responsibility and methods for ensuring effective stock rotation principles are applied shall be documented and implemented.
	RESPONSE: COMPLIANT
12.6.1.3	Procedures are in place to ensure that all food products, and recouped product, are utilized within their designated shelf-life.

12.6.2 Cold Storage, Freezing and Chilling of Foods

The site has a documented Storage and Transport policy dated 5/6/17. The purpose is to describe the procedures used to properly receive, store, and transport ingredients and goods to ensure food safety. The cold storage, freezing and chilling of foods is monitored for operational performance by daily temperature verification, continuous monitoring, and contracted preventative maintenance of the system. Records sighted Cooler Freezer temperature (continuous) monitoring dated 10/14/19, 2/14/2020, 6/11/2020. Temperature Records (verified) dated 6/12/2020, 2/12/2020

12.6.2.1 The site shall provide confirmation of the effective operational performance of freezing, chilling and cold storage facilities. Chillers, blast freezers and cold storage rooms shall be designed and constructed to allow for the hygienic and efficient cold/frozen storage of food, easily accessible for inspection and cleaning.

RESPONSE: COMPLIANT

12.6.2.2 Sufficient refrigeration capacity shall be available to store chilled or frozen food at the maximum anticipated throughput of product with allowance for periodic cleaning of refrigerated areas.

RESPONSE: COMPLIANT

12.6.2.3 Discharge from defrost and condensate lines shall be controlled and discharged to the drainage system.

RESPONSE: COMPLIANT

12.6.2.4 Cold and chilled storage rooms shall be fitted with temperature monitoring equipment and located so as to monitor the warmest part of the room and be fitted with a temperature measurement device that is easily readable and accessible.

RESPONSE: COMPLIANT

12.6.2.5 Loading and unloading docks shall be designed to protect product during loading and unloading.

RESPONSE: COMPLIANT

12.6.3 Storage of Shelf Stable Packaged Goods

The dry storage areas used for the storage of product ingredients, packaging and other dry goods are located separately from sanitation areas where water is used. Racks provided for the storage of food products are constructed of impervious materials and designed to enable cleaning of the floors and the storage room.

12.6.3.1 Rooms used for the storage of dry goods shall be located away from wet areas and constructed to protect the product from contamination and deterioration.

RESPONSE: COMPLIANT

12.6.3.2 Racks provided for the storage of food products shall be constructed of impervious materials and designed to enable cleaning of the floors and the storage room. Storage areas shall be constructed in a way to prevent food products from becoming a harborage for pests or vermin.

RESPONSE: COMPLIANT

12.6.3.3 Vehicles used in storage rooms shall be designed and operated so as not to present a food safety hazard.

RESPONSE: COMPLIANT

12.6.4 Storage of Equipment and Containers

Storage rooms are designed and constructed to allow for the hygienic and efficient storage.

12.6.4.1 Storage rooms shall be designed and constructed to allow for the hygienic and efficient storage of equipment and containers.

RESPONSE: COMPLIANT

12.6.5 Storage of Hazardous Chemicals and Toxic Substances

Hazardous chemicals and toxic substances that are for use in the site with the potential for food contamination are stored separate from the distribution storage area so as not to present a hazard to staff, product, packaging, product handling equipment.

12.6.5.1 Hazardous chemicals and toxic substances that are for use in the site with the potential for food contamination shall be stored separate from the distribution storage area so as not to present a hazard to staff, product, packaging, product handling equipment. Hazardous chemicals shall be stored in their original containers, or in clearly labeled secondary containers if allowed by applicable legislation.

RESPONSE: COMPLIANT

12.6.6 Alternative Storage and Handling of Goods

No Alternative Storage and Handling of Goods

12.6.6.1 Where goods described in 12.6.1 to 12.6.4 are held under temporary or overflow conditions that are not designed for the safe storage of goods, a risk analysis shall be undertaken to ensure there is no risk to the integrity of those goods or contamination or adverse effect on food safety and quality.

RESPONSE: NOT APPLICABLE

12.6.7 Loading, Transport and Receiving Practices

The site has a documented Storage and Transport policy dated 5/6/17. The purpose is to describe the procedures used to properly receive, store, and transport ingredients and goods to ensure food safety. The cold storage, freezing and chilling of foods is monitored for operational performance by daily temperature verification, continuous monitoring, and contracted preventative maintenance of the system. The dry storage areas used for the storage of product ingredients, packaging and other dry goods are located separately from sanitation areas where water is used. The equipment storage is located in areas away from exposed food ingredients and packaging. Chemicals used in sanitation/maintenance process are stored in secured areas away from packaging, raw materials and finished goods to prevent potential for food contamination. The loading, transport, and unloading practices include but is not limited to procedure includes but is not limited to seals/locked, cleanliness, odor, physical appearance, and the presence of rodents or insects. Records sighted Receiving records Inbound Checklist (trailer inspection, Lot#) dated 1/15/2020, 4/16/2020, 1/14/2020 Receiving HACCP (seal, temp, trailer inspection) Report dated 2/11/2020, 6/12/2020, 10/14/19 Outbound checklist (temp trailer, trailer inspection) dated 6/12/2020, 2/12/2020 10/14/19 Driver Manifest and Invoice (item#, temp) dated 1/22/2020, 4/13/2020

12.6.7.1 The practices applied during loading, transport and unloading of food shall be documented, implemented and designed to maintain appropriate storage conditions and product integrity.

RESPONSE: COMPLIANT

12.6.7.2 Trailers shall be washed in a segregated area away from the distribution site in a manner so as to not pose a risk to the products.

RESPONSE: COMPLIANT

12.6.7.3 Practices shall be in place for loading, transport and unloading receiving to protect against the contamination from biological, chemical and physical risks.

RESPONSE: COMPLIANT

12.6.7.4 Records of compliance activities shall be accessible.

RESPONSE: COMPLIANT

12.6.7.5 Sites shall have a procedure in place that is documented and implemented to ensure trailers are inspected prior to receiving shipments or loading to ensure that the trailer is in good repair, clean, secured and at required environmental conditions and temperatures.

RESPONSE: COMPLIANT

12.6.8 Staging and Loading

Records sighted Outbound checklist (temp trailer, trailer inspection) dated 6/12/2020, 2/12/2020 10/14/19

12.6.8.1 Vehicles (e.g. trucks/vans/containers) used for transporting food shall be inspected prior to loading to ensure they are clean, in good repair, suitable for the purpose and free from odors or other conditions that may impact negatively on the product.

RESPONSE: COMPLIANT

12.6.8.2 Staging and loading practices shall be designed to minimize unnecessary exposure of the product to conditions detrimental to maintaining product integrity.

12.6.8.3 Food transport vehicle's refrigeration unit shall maintain the food at required temperatures and the unit's temperature settings shall be set, checked and recorded before loading and product temperatures monitored at regular intervals during loading as appropriate.

RESPONSE: COMPLIANT

12.6.9 Transport

Records sighted Driver Manifest and Invoice (item#, temp) dated 1/22/2020, 4/13/2020

12.6.9.1 The refrigeration unit shall be operational at all times and checks completed of the unit's operation, the door seals and the storage temperature checked at regular intervals during transit.

RESPONSE: COMPLIANT

12.7.1 Process Flow

The process flow is designed to prevent cross-contamination and organized.

12.7.1.1 The process flow shall be designed to prevent cross contamination and organized so there is a continuous flow of product through the process. The flow of personnel shall be managed such that the potential for contamination is minimized.

RESPONSE: COMPLIANT

12.7.2 Receiving

The site has a documented Storage and Transport policy dated 5/6/17. The purpose is to describe the procedures used to properly receive, store, and transport ingredients and goods to ensure food safety. The loading, transport, and unloading practices include but is not limited to procedure includes but is not limited to seals/locked, cleanliness, odor, physical appearance, and the presence of rodents or insects. Records sighted Receiving records Inbound Checklist (trailer inspection, Lot#) dated 1/15/2020, 4/16/2020, 1/14/2020 Receiving HACCP (seal, temp, trailer inspection) Report dated 2/11/2020, 6/12/2020, 10/14/19

12.7.2.1 Prior to opening the doors the food transport vehicle's refrigeration unit storage temperature settings and operating temperature shall be checked and recorded. Receiving shall be completed efficiently and product temperatures shall be recorded at the commencement of unloading and at regular intervals during unloading.

RESPONSE: COMPLIANT

12.7.2.2 Receiving practices shall be designed to minimize unnecessary exposure of the product to conditions detrimental to maintaining product and package integrity.

RESPONSE: COMPLIANT

12.7.3 Control of Foreign Matter

The site has a documented Control of foreign matter policy dated 4/28/2020. The master maintenance schedule, pre-operational and operational sanitation inspections and monthly facility inspections are tools utilized to ensure plant and equipment remain in good condition. The measure includes but is not limited to glass preventative, wood preventative, and metal preventive. The glass breakage and other foreign material contamination procedures are documented. Records sighted Monthly Internal audit record dated November 2019, May 2020, March 2020, Master Sanitation and Preventive Maintenance schedule dated 10/14/19, 2/12/2020 Monthly Glass Brittle plastic inspection record dated 1/2/2020, 3/3/2020, 5/8/2020

12.7.3.1 The responsibility and methods used to prevent foreign matter contamination of food product shall be documented, implemented and communicated to all staff.

RESPONSE: COMPLIANT

12.7.3.2 Inspections shall be performed to ensure plant and equipment remains in good condition and potential contaminants have not detached or become damaged or deteriorated.

12.7.3.3 The following preventative measures shall be implemented where applicable to prevent glass contamination: i. All glass objects or similar material used by the site in storage and handling areas shall be listed in a glass register including details of their location. ii. Containers, equipment and other utensils made of glass, porcelain, ceramics, laboratory glassware or other like material (except where product is contained in packaging made from these materials, or measurement instruments with glass dial covers or MIG thermometers required under regulation) shall not be permitted in food processing/contact zones. iii. Product that is in glass or similar material that is for distribution purposes shall be stored in a manner that prevents contamination. iv. Conduct regular inspections of storage and handling areas to ensure they are free of glass or other like material and to establish no changes to the condition of the objects listed in the glass register. v. Glass instrument dial covers on equipment and MIG thermometers shall be inspected at regular intervals.

RESPONSE: COMPLIANT

12.7.3.4 Wooden pallets used in food storage shall be dedicated for that purpose, clean, maintained in good order and their condition subject to regular inspection.

RESPONSE: COMPLIANT

12.7.3.5 Loose metal objects on equipment, equipment covers and overhead structures shall be removed or tightly affixed so as not to present a hazard.

RESPONSE: COMPLIANT

12.7.4 Managing Foreign Matter Contamination Incidents

The glass breakage and other foreign material contamination procedures are documented.

12.7.4.1 In all cases of foreign matter contamination the affected food product shall be isolated, inspected, reworked or disposed of.

RESPONSE: COMPLIANT

12.7.4.2 In circumstances where glass or similar material breakage occurs, the affected area is to be isolated, cleaned and thoroughly inspected (including cleaning equipment and footwear) and cleared by a suitably responsible person.

RESPONSE: COMPLIANT

12.8.1 Dry and Liquid Waste Disposal

The site has a documented dry and liquid waste policy dated 1/2/2020. The purpose is to describe the methods used to effectively manage the collection, handling and disposal of waste streams to provide a method for handling and removing waste in accordance with regulatory and GMP standards.

12.8.1.1 The responsibility and methods used to collect and handle dry, wet and liquid waste and store prior to removal from the premises shall be documented and implemented.

RESPONSE: COMPLIANT

12.8.1.2 Waste shall be removed on a regular basis and not build up in food handling or storage areas. Designated waste accumulation areas shall be maintained in a clean and tidy condition until such time as external waste collection is undertaken.

RESPONSE: COMPLIANT

12.8.1.3 Trolleys, vehicles, waste disposal equipment, collection bins and storage areas shall be maintained in a serviceable condition and cleaned and sanitized regularly so as not to attract pests and other vermin.

RESPONSE: COMPLIANT

12.8.1.4 Reviews of the effectiveness of waste management will form part of regular hygiene inspections and the results of these inspections shall be included in the relevant hygiene reports.

RESPONSE: COMPLIANT

12.8.1.5 Inedible waste designated for animal feed shall be stored and handled so as to not cause a risk to the animal or risk to other food designated for further processing for human consumption.

RESPONSE: NOT APPLICABLE

EVIDENCE: No Inedible waste designated for animal feed

12.9.1 Grounds and Roadways

The grounds and area surrounding the premises are maintained. The loading and unloading areas are maintained so as not to present a hazard to the food safety operation of the premises.

12.9.1.1 The grounds and area surrounding the premises shall be maintained to minimize dust and be kept free of waste or accumulated debris so as not to attract pests and vermin.

RESPONSE: COMPLIANT

12.9.1.2 Paths, roadways and loading and unloading areas shall be maintained so as not to present a hazard to the food safety operation of the premises.

RESPONSE: COMPLIANT

12.9.1.3 Surroundings shall be kept neat and tidy and not present a hazard to the hygienic and sanitary operation of the premises, or harborage for pests.

RESPONSE: COMPLIANT

Company Overview:

Gold Star Foods Inc. "Gold Star Foods" began operations in 1966 as a distributor of meat products primarily to coffee shops in the Los Angeles area. "Gold Star Meat Company", a family owned business, was purchased in 1978 and under new ownership the focus of the business shifted from restaurants to Southern California School Districts. To better reflect the image of a changing inventory, the name was changed to "Gold Star Foods" in 1983 and most recently to "Gold Star Foods Inc". Since 1978, Gold Star Foods customer base has grown to over 300 school districts throughout the Southwest. As a result of our commitment to excellence, we have been recognized nationwide by the United States Department of Agriculture and the American School Food Service Association as one of the outstanding food service distributors to school districts.

A leader in the provision of School Nutrition Food and Supplies, Gold Star is widely considered one of the United States' premier processed commodity distributors. Our founder's vision became a system where school food operations can order and use commodities just like commercial products. The result? The children have products that are appetizing, and the districts can utilize government subsidies. Gold Star Commodity Programs have grown to supply all items used in school meal programs:

- Frozen
- Grocery
- Fresh and Frozen Bread
- Produce
- Paper & Supplies

Food Safety, Product Recall, & Bio-Security:

Keeping students safe is our primary role. At Gold Star tremendous investment is made to ensure the integrity of the products we deliver. HACCP is not a buzz word, how we manage your goods through our system to your door. Using outside, third party companies, our systems are evaluated and graded to make sure the systems are in place and working. Food integrity also requires that food security systems are in place as mandated by industry best practices and USDA Biosecurity requirements.

Plant Description:

Gold Star Foods facility has 36 loading doors. The construction is primarily concrete tilt-up walls built on a cement slab. Walls and ceilings are constructed of sheet metal with an anodized white sanitary coating. The roof is flat, but with adequate drainage to minimize standing water.

The total plant footprint is 252,310 square feet.
Freezer 83,660 SF
Refrigerated Storage 24,700 SF
Produce Storage 3,600 SF

Introduction to HACCP/HARPC

Introduction:

Hazard Analysis Critical Control Point, or HACCP, is a system which gives us a proactive common-sense approach to the safety management of our food products. HACCP was originally designed in the early days of the American manned space Program, and was developed by the Pillsbury Company, NASA and the United States Army laboratories, to ensure the Microbiological safety of the astronauts' food.

HACCP (Hazard Analysis Critical Control Points), which is a global standard developed as part of <u>Codex Alimentarius</u> to improve upon and synchronize international food standards, guidelines, and codes of practice to protect the health of consumers. The HACCP system was launched publicly in 1971, and is designed to identify and control hazards that may occur anywhere in a food processing operation.

The benefits of the HACCP system are as follows:

A Preventative System

A Systematic Approach

Helps demonstrate 'Due Diligence'

Internationally accepted

☑ Strengthens Quality Management Systems

The FDA created HARPC (Hazard Analysis and Risk-Based Preventive Controls for Human Food). HARPC is written within <u>Section 103 of FSMA (Food Safety Modernization Act)</u> guidelines, and requires that food manufacturers or processing facilities operate with the strategies and guidelines in place, including:

HARPC is a US Standard which affects a number of FDA-regulated products & HACCP is a global standard.

HACCP & HARPC both define hazards (such as biological, chemical and physical) but HARPC includes radiological and intentional hazards to its high risk category.

Scope:

The purpose of this food safety program is to identify and control, prevent and eliminate food safety hazards.

The HACCP Team has defined the Scope of this analysis to begin with the receiving of ingredients and packaging to the shipment of the finished product to the customers, taking into account all possible Microbiological, Chemical, Physical and Intentional hazards which could occur during this process. The HACCP team will also take into consideration all potential hazards from the Country of Origin of all sourced products

GOLD STAR FOODS	GOLD STAR FOODS	SQF 2.4.3	DOCUMENT # 2.4.3.1						
Document T	itle: HACCP Overview		Revision Date:	1/16/2021					
	: ALL Departments	Revision #	9						
Prepared By:	Wayne Warner	Approved By: Pedro Osorio	Page 4 of 6						

The HACCP Team will ensure that all working practices adhere to all current food safety legislation.

Definitions

TERM	DEFINITION
Critical Control Point (CCP)	A step at which control can be applied and is essential to prevent or eliminate a food safety hazard or reduce it to an acceptable level.
Pre- Requisite Programs	Practices and procedures forming the basis of preventable actions: Receiving, Storage & Transport Approved Supplier Program Calibration & Maintenance Cleaning & Sanitation Pest Management Staff Training Personnel Practices Product Identification, Traceability & Recall Premises (buildings & site) Complaint Management Allergen Control
Hazard Analysis	A tabulated record of all Hazards that affect or have the potential to affect the safety of the products under analysis.
HACCP/HARPC Preventative Controls	Hazards identified in the risk analysis as being of significance and their respective control measures are transferred to the HACCP table. The critical limit of these hazards is specified. Details of who will monitor the critical limit to make sure it is not broken are given. Actions to be taken when critical limits are broken are also given. Records of monitoring activities are listed.

COLDSTAR FOODS	GOLD STAR FOODS	SQF 2.4.3	DOCUMENT # 2.4.3.1					
	tle: HACCP Overview		Revision Date:	1/16/2021				
Department:	ALL Departments		Revision #	9				
Prepared By;	Wayne Warner	Approved By: Pedro Osorio	Page 5 of 6					

Methodology:

Flow Chart:

The flow chart has been designed so that each step of the process has been

identified

Hazard Analysis Table:

The method used to establish CCP's within this HACCP plan has been based on the significance of each hazard and the likelihood of occurrence as determined by the Hazard Analysis table. Hazards which can be controlled, prevented or eliminated by the application of Pre-Requisite Programs are not included in the HACCP plan. Therefore, these hazards have been identified in the risk analysis and have not been carried forward to the HACCP table as CCP's. Hazards controlled by Pre-Requisite programs may be monitored without a record maintained

HACCP Table

All hazards not controlled by Pre-Requisite programs and defined as highly significant have been carried over to the HACCP table as a CCP. These hazards are all monitored, and a record of that activity maintained.

Guidance:

The HACCP plan has been prepared in accordance with:

FDA Hazard Analysis and Critical Control Point Principles and Application Guidelines Adopted August 14, 1997, National Advisory Committee on Microbial Criteria for Foods and CODEX Alimentarius Guidelines 97/13A for HACCP HARPC principles are written in accordance within Section 103 of FSMA (Food

Safety Modernization Act

USDA Nondiscrimination Statement

SNAP and FDPIR State or local agencies, and their subrecipients, must post the following Nondiscrimination Statement:

In accordance with Federal civil rights law and U.S. Department of Agriculture (USDA) civil rights regulations and policies, the USDA, its Agencies, offices, and employees, and institutions participating in or administering USDA programs are prohibited from discriminating based on race, color, national origin, sex, religious creed, disability, age, political beliefs, or reprisal or retaliation for prior civil rights activity in any program or activity conducted or funded by USDA.

Persons with disabilities who require alternative means of communication for program information (e.g. Braille, large print, audiotape, American Sign Language, etc.), should contact the Agency (State or local) where they applied for benefits. Individuals who are deaf, hard of hearing or have speech disabilities may contact USDA through the Federal Relay Service at (800) 877-8339. Additionally, program information may be made available in languages other than English.

To file a program complaint of discrimination, complete the USDA Program Discrimination Complaint Form, (AD-3027) found online at:

http://www.ascr.usda.gov/complaint_filing_cust.html, and at any USDA office, or write a letter addressed to USDA and provide in the letter all of the information requested in the form. To request a copy of the complaint form, call (866) 632-9992. Submit your completed form or letter to USDA by:

- (1) mail: U.S. Department of Agriculture Office of the Assistant Secretary for Civil Rights 1400 Independence Avenue, SW Washington, D.C. 20250-9410;
- (2) fax: (202) 690-7442; or
- (3) email: program.intake@usda.gov.

This institution is an equal opportunity provider.

Buy American Certification - March and April 2021

Dear Valued Produce Customer,

To support our partner school districts in complying with the Buy American Provision, we are providing you with the following list of fresh produce items being offered and their associated point of origin. The items listed in the foreign sourced category will remain in effect through April 2021.

Fresh Produce Category – Domestic Origin	Fresh Produce Category – Foreign Sourced Product	N = N/A Grown P= Price S= Season
Apples (All Varieties)	Avocados - Mexico	S
Broccoli	Bananas - Central & South America	N
Cabbage (Green and Red)	Edamame – China	N
Cauliflower	Jicama - Mexico	S
Carrots	Cucumber – Mexico	S
Celery	Limes - Mexico	S
Mandarin	Pineapple – Central America	N
Lemons	Cucumber	S
Lettuce – Green Leaf	Melons Cantaloupe & Honeydew	5

PRODUCE REMINDERS

GOLD STAR FOODS is proud to suggest these fresh USA Grown produce items offered at the peak of the growing season. Reminder that fresh produce is always seasonal and quality can change quickly from one week to the next depending on weather and growing conditions.

PEAK SEASON

OFFSHORE BUT AWAILABLE

THE PROPERTY OF THE PROPERTY O

A FEW MARKET CONDITIONS

March 20th marks the first day of Spring. Spring is the start of the California growing season for fresh fruit and vegetables. As April and May roll by we will start to bring in berries, melons, stone fruit, grapes, soft squash, and more fruit and vegetables to serve. At the start of April, the salads, greens, and other vegetables will change growing regions from Yuma, AZ to the Salinas Valley, CA.

Revision Date: 13/16/18

Revision #

Page 1 of 5

Class II Recall: The use of or exposure to the product may cause temporary or medically reversible adverse health consequences of the probability of serious adverse health consequences is remote.

Class III Recall: The use of or exposure to the product is not likely to cause adverse health consequences.

Market Withdrawal: A firm's removal or correction of a distributed product when there is a minor violation not subject to legal action by the FDA or FSIS or when the company wishes to retrieve product from distribution

Stock Recovery: Employed in recovering product that is still under the manufacturer's direct control (on or its own premises or warehouse) from which the company can assure there will be no distribution.

RECALLS, WITHDRAWALS, & RECOVERIES

The need for a product withdrawal can originate in four ways: with a regulatory agency, with a consumer complaint, with an announcement from distribution channels or within the company's own systems. There are 4 main components to a product recall or withdrawal

INQUIRY & COMMUNICATION

A product may be recovered or recalled at any stage in the receiving, storage and distribution processes. Additionally, it may be necessary to recall products from the affected school systems. Generally, a *Product Inquiry* would be initiated if a product does not meet the standards of safety, quality, appearance, or packaging/labeling standard established by the company. The inquiry would be preceded by an internal or external observation or complaint and documented in accordance with our Corrective Action Program and Customer Complaint Program. The Recall Coordinator will call to action the Recall Team (Executive Committee), who will meet to determine the following:

- 1. The seriousness of the problem
- 2. The extensiveness of the problem
- 3. The effects of the problem on the company and the public

INVESTIGATION & RECOMMENDATION

The Recall Team will identify the problem and gather facts through interviews and records in order to determine the safety and wholesomeness of the product. Once information has been gathered as to the extent of the product complaint or concern, a decision will be made whether or not to recommend recall or withdrawal of the product. The Recall Team will make a *recommendation* to recall, withdraw, or recover product s. Our policy is to always pull and hold a product immediately if we are unsure about the safety or wholesomeness of the product. The information will be forwarded to the CEO for final evaluation

PRODUCT RECALL ORDER

Once a final decision to recall the product is made, the CEO will execute the *Product Recall Order*. The Recall Coordinator will determine the locations and products affected by the recall and issue the appropriate communication. (See recall document). The Sales Team will research any affected orders and notify any customers of the recall. The FDA, SQFI and SAi Global (Certifying Body) will be notified of all recalls due to widespread food borne illness.

RECALL STRATEGY

A Recall Strategy is developed by the Recall Team and addresses the following:

Depth

The strategy must specify whether the recall extends to the wholesale level, the retail level or all the way to the consumer level.

Publicity

The company will develop a press release and clear it with the FDA/ FSIS. Most often, the company issues the news release alerting consumers to the risk.

The FDA/ FSIS issues notices or public warnings when there is a serious health hazard. This can be in the form of a press release, letter, telegram, phone call or FDA publication. The company should insist on having input into any such warning statement.

Whenever communication comes in from outside the company and a recall is in process, all communication must be directed to and through the company spokesperson. This may include questions from the news media, customers, etc. The designated company spokesperson is the only individual authorized to release information to the news media and outside sources, other than regulatory agencies in which case Technical Services or the Recall Coordinator may provide information relating to product in question.

Contact with Regulatory Agencies

The CEO or Recall Coordinator will contact regulatory agency concerning product recall. Whenever a meeting is scheduled with regulatory agencies, at least two company representatives will be present.

Effectiveness Checks

These verify that all consignees at the specified depth have been notified about the recall and have taken appropriate action.

The recall strategy will specify the method(s) of contact. Methods of contact include personal visits, telephone, letters, telegrams or a combination thereof.

The FDA then designates the specific depth level of the recall:

Level A (All consignees to be contacted)

Level B (specified percentage of consignees to be contacted)

Level C (ten percent of consignees to be contacted)

RECALL PROCEDURE

Step 1

In a product recall situation the Gold Star Foods buyer and Recall Coordinator receives notification from the manufacturer. Gold Star Foods must be informed as soon as the vendor/manufacture is aware of a recall situation, form must be submitted if you are in the cate gory. Regardless of the severity of the recall type, Gold Star Foods will treat each situation as a Class 1 recall, which is as a mandatory product withdrawal. The vendor/manufacture is responsible of submitting a "Manufacture Product Recall Form". The appropriate Gold Star Foods buyer will complete the "Manufacture Recall Form" and inform the Recall Coordinator of the recall. The Recall Coordinator (RC) will then oversee the entire recall process.

(See attached Recall Committee Diagram and Recall Committee Contact Form)

All correspondence needs to be sent to the following email address: recall@goldstarfoods.com Upon receiving a product recall GSF will place all payables ON HOLD until matter is resolved.

DOCUMENT# 2.6.3

Document Title : Product Recall and Withdrawal

Department : ALL Departments

Prepared By; Wayne Warner

Revision Date: | 3/16/18

Revision #

Prepared By: Pedro Osorio

Page 1 of 5

Step 2

Once the above information is received for a product recall, the Purchasing Department will immediately inform the Recall Coordinator (RC). The RC will implement the following:

- A. Notify Inventory Control, Warehouse Supervisors, and Warehouse Managers to perform a systems and physical inventory check to see if Gold Star Foods has any of the production codes in our inventory st ock. Upon confirmation of existing inventory levels, the following procedures will be implemented:
 - a. The RC will notify the Customer Service Supervisor via email. The RC will then send a broadcast e-mail message to all recipients in the Company.
 - b. The RC will notify the Inventory Control Supervisor (ICS) to verify by computer the customers that have ordered the product on recall.
 - c. The RC will inform the Customer Service Manager (CSM) of all customers that have ordered and received product.
 - d. The CSM will notify all customers that ordered and received product and inform them of the recall and all relevant information. Customer Service will provide a check list of each customer that has been contacted.
 - e. The appropriate buyer will inactivate the item number for recall product(s) in the computer system. This will **not** allow any orders to be taken for the affected product s(s). Product will be isolated and placed on immediate hold at GSF.
 - f. Pick-up schedules will be made for all verified recall products with each customer.
 - g. Any recall product in the warehouse will be physically pulled out of inventory, tagged "Recalled Product", shrink wrapped and put into assigned product recall section.
 - h. The Transportation Department will be notified of the recall, and will be instructed on all scheduled pick-ups that must occur.
- B. After all recalled product has been retrieved and accounted for; the buyer will contact the Manufacturer for inventory disposition. GSF will store product 14 days maximum. In the event that the product is not retrieved from our facility we will dispose the product and seek full payment.
- C. The Manufacturer will determine if the product is to be disposed of (Certificate of Condemnation) or returned to the packer for credit.

Step 3

Once all of the above recall procedures have been completed, all associated documentation should be forwarded to the Recall Coordinator. All recall documentation will include the following information:

Manufacture Recall Form

Inventory Control Product Recall Form

Receiving Recall Return Sheet

Certificate of Condemnation (Disposal of Inventory) if applicable

Copy of signed Bill of Lading (Ship Inventory Back) if applicable

In the event that 100 % of the product is not collected GSF is to:

Inform the vendor of what schools

Inform the California Health Department

SQF 2.6

Approved By: Pedro Osorio

DOCUMENT# 2.6.3

Document Title: Product Recall and Withdrawal

Department : ALL Departments

Prepared By; Wayne Warner

Revision Date:

on Date: 3/16/18

Revision # Page 1 of 5

Step 4

In the event that your company has a category that is in current recall situation but is not aff ected. You must email a formal letter (recall@g oldst arfoods.co m) to inform GSF that your product is unaffected. The purpose of this is to advise our customer that they are safe serving product in question. Please submit the letter as soon as you are aware there is a recall situation in your category. We will expect a letter within a few hours of the public notification.

Step 5

Gold Star Foods, Inc. has incurred the following expenses in association with the recall:

- A. Product Cost: Customer Invoice Cost per case
- B. Administrative Costs: Flat fee \$350.00
- C. Transportation Costs: \$75 per stop to recover product from customer

VERIFICATION OF THE SYSTEM

- 1. The product withdrawal and recall system is reviewed tested and verified twice annually .
- 2. Results of the mock recall will be tabulated and communicated to the leadership team.
- 3. Any gaps or deficiencies are evaluated with corrective actions taken

RECORDS

Shipping/Receiving/Storage Records

(See SOP for additional requirements)

Records of all product withdrawals and recalls are maintained in the Strategic Sourcing Manager's off ice.

Document T	itle: Food Defense		Revision Date:	12/28/16
Department	: ALL Departments		Revision #	3
Prepared By	; Wayne Warner	Approved By: Pedro Osorio	Page 1 of 4	

Purpose

The purpose of this program is to define the methods, responsibility and criteria for preventing food adulteration caused by a deliberate act of sabotage or terrorist like incident.

Responsibilities and Methods

i. Site Security Team

Gold Star Foods has established a Security Team to assess risks and review current security practices. The Security Team meets annually or whenever a security event occurs. Operational risks are assessed using the U.S. Food and Drug Administration Food Defense Self-Assessment Tool for Food Producers, Processors, and Transporters FDA to determine potential risks on an on-going basis. The security team members and other key notifications are as follows:

NAME	POSITION	CONTACT	RESPONSIBILITIES
San C. Leer	CEO	(562) 508-6533	Senior Leader
Joe Villarreal	Senior Vice	(951) 741-7578	Site Coordinator
	President of		Responsible for overall site security
	Operations		
Pedro Osorio	Director of	(323) 496-7280	Responsible for food defense training
	Safety/HACCP		
Erick Osorio	Director of	(323) 492-3977	Responsible for receiving, storage and loading
	Warehouse		security
Octavio Salazar	Director of	(909) 437-9513	Responsible for security of delivery
	Transportation		
Karen Rosales	Executive Director of	(626) 428-9340	Responsible for vendor security verification
	Procurement		
Wayne H.	Advisor	(253) 576-0867	Responsible for conducting 3 rd part security audits
Warner			
FDA		(866) 300-4374	Notify in case of a food tampering issue

ii. Facility Access and Authorized Personnel

- a. Access to the facility is restricted to authorized personnel only.
- b. Access to the facility is secured and monitored at all times.
- c. Access to roofs, airflow units, water supply, electrical and refrigeration is limited to authorized personnel.
- d. Employees enter the building through the authorized employee door located at the South side entrance to the building. This door is marked "Employee Entrance Only". They are accessed with pass cards.
- e. Short Term Leased Employees assigned to work at Gold Star Foods for short periods of time, from one day to one or two weeks will be issued a temporary pass code The code is valid for the duration of their assignment.
- f. Visitors enter the building through the front lobby door only from 8:00am-5:00pm.

. 4

- g. Visitors to the plant are required to read and sign the Visitor Pass GMPs.
- h. Visitors will sign in/out on the Daily Visitor's Log.
- The Receptionist will call the person being visited, who will arrange to have someone from the department come to the lobby and ESCORT the visitor. (EXCEPTION: Known contractors under written contract with the company who frequently visit the Company will not need to be escorted.
- Visitors will wear visitor badges to aid in differentiating visitors from Gold Star Foods employees.
- k. Personal visitors will be issued a visitor pass, and it will be the responsibility of the employee to escort the visitor while within the facility and to follow all rules and regulations with particular attention to restricting access to sensitive areas. Personal visitors to the plant must be approved in advance by Management
- I. Contractors entering after hours are either bonded or screened by a background check.
- m. The entrance to the front lobby and offices is locked between the hours of 5:00pm and 8:00am or whenever the lobby is not being monitored by the receptionist. The receptionist inspects the entry door in the morning for evidence of unauthorized entry. The receptionist leaving each night secures the front lobby door.
- n. Gold Star Foods is a 24/7 operation. There is appropriate supervision of all staff-including sanitation and maintenance, contract workers, data entry and computer support staff and especially new employees.
- o. Managers are assigned a security level with access to assigned areas only. Keys are assigned and checked out to authorized individuals by the Office Manager.
- p. All spare keys are secured in a lock box controlled by the Office Manager. Building keys cannot be duplicated. All terminated managers with access to the building are required to turn their assigned keys in prior to leaving the building.
- q. Keys and/or key cards are collected prior to the departure of any terminated employees who had access to the facility.
- r. Camera cell phones and recording devices are prohibited unless issued by Gold Star Foods' Management.

iii. Employees

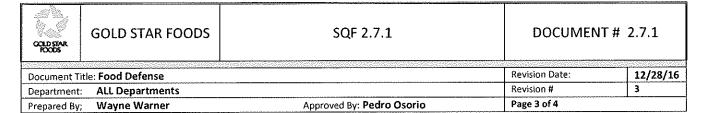

Gold Star Foods has developed a standard procedure for screening all potential employees. Prospective employees are screened for the following:

- a. Declared references on their employment application.
- b. I-9 Employee Eligibility Verification
- c. Background checks (fraud, criminal records, etc.)

iv. Computer Access

- a. Access to computer process control systems and critical data systems will be limited to those with appropriate clearance.
- b. Program passwords are changed immediately upon termination of any employees who had access to our systems.

v. Receiving of Goods

- a. All trucks are required to be locked or sealed if received in full load shipments at time of delivery and receiving personnel must observe the driver unlocking the cargo door.
- b. All ingredients/packaging are inspected for tampering or damages at time of receiving. Entries are made on the Receiving Truck Inspection Form in accordance with our Receiving SOP.

vi. Storage of Materials

- a. Products are stored inside the secured production areas. All partially used goods are secured in sealed bags, cases, or cartons.
- b. Warehouse access will be controlled and accessible by authorized personnel only.

vii. Work In Process

a. Partial cases, ingredients and work in process in the re-packing area are covered and secured when not in use.

viii. Finished Goods and Packaging Storage

 Gold Star Foods ensures all products are sealed and covered at all times to prevent product tampering.

ix. Shipping of Finished Goods

- a. All trucks are required to be locked or sealed in the case of full load shipments at time of shipping.
- b. Warehouse personnel and shipping representative sign off that the trailer has been secured prior to leaving our facility.
- c. Entries are made on the Shipping Truck Inspection Form in accordance with our Shipping SOP.

x. Hazardous Chemicals

- a. Sanitation chemicals used in the sanitation of the facility are locked and accessible only to relevant staff.
- b. All other cleaners/chemicals for distribution are in sealed containers in designated areas away from ingredients and packaging materials.
- c. Maintenance chemicals are locked and located in the maintenance area
- d. General lavatory chemicals, such as soap, are not locked up and available for personnel use.
- e. We do not receive any raw materials/packaging transported with hazardous chemicals.
- f. We do ship and receive chemicals for distribution on trucks carrying paper goods, ingredients and packaging. All trucks delivering our products are company-controlled. We insect the truck thoroughly for proper segregation, protective coverings and no damaged materials to ensure food safety.
- g. Personnel having access to controlled chemicals are trained in their proper use and storage.

xi. Equipment

- Equipment will be inspected on a regular basis in accordance with our Preventative Maintenance Program.
- b. All new equipment will be inspected and accepted prior to use.
- c. No unauthorized equipment is allowed in facility.

xii. Security Training

- a. All employees are trained in our Food Defense policies and procedures at time of hire and annually thereafter. Training is validated on the Security Training Record.
- b. Facility security procedures include but are not limited to emergency evacuations, a familiarity with emergency response in the community-including 24-hour contact of local, state and federal officials, and a maintained floor plan (both on and off site).
- c. All facility staff is trained to be alert for and respond to evidence of tampering with product or equipment, other unusual situations or other security breaches.
- d. Employees are trained to sight suspicious activity from visitors, contractors and fellow employees of the plant (authorized or not).
- e. All suspicious activity is reported to the Operations Manager.
- f. Every occurrence is reported to a supervisor. If there is a report at any time that points to evidence of tampering, criminal or a terrorist action a 24-hour FDA emergency hotline number is required to be called. This number is 866) 300-4374

Responsibilities

All employees, managers, and staff of Gold Star Foods are responsible for food defense and the security of the facility.

Re: RFP#03022021 Fresh and Processed Produce

Mel Olds

Gold Star Foods 3781 East Airport Drive Ontario, CA. 91761

We thank you for submitting your RFP on April 1, 2021. After careful review, Gold Star Foods has been determined to be the lowest responsive and responsible vendor. Pending Board Approval, we are happy to award the RFP to Gold Star Foods. A recap of this RFP will be available after April 30, 2021 and can be requested from Murrieta Valley Unified School District

Please contact Murrieta Valley Unified, Temecula Valley Unified, Lake Elsinore Unified, Menifee Union, Perris Union High School and Perris Elementary Districts directly to coordinate delivery schedules and start dates. Congratulations, we look forward to working with Gold Star Foods.

Sincerely,

Jill Lancaster, RD

Director Nutrition Services
