Re: Contracts for Dairy Products and California Dairy Marketing Laws

We have recently learned that some school districts are issuing requests for bids on contracts which contain fixed price clauses for milk and dairy products. Please be aware that requiring fixed prices for dairy products can cause a violation of state law. California law (Food and Agricultural Code Section 61384) prohibits sales of dairy products below cost. Many factors can cause cost increases to dairy suppliers beyond their control, such as the monthly price adjustments made by this Department in the farm milk price, energy costs, labor costs, etc. In recent months, supply and demand factors have caused rapid increases in the farm milk price, which has impacted the cost of milk at the retail level.

Although it is understandable that schools want to contain costs, contracts should allow for price adjustments so that the supplier is not forced into a below cost violation if his costs increase. If this occurs, the school district will be a joint participant to the violation and subject to enforcement action from this Department. It is recommended that an escalator or adjustor clause be included in all contracts for milk and other dairy products. This pricing flexibility will enable dairy suppliers to recover all their costs should they increase, and will also ensure that school districts are compliant with the state's dairy laws. For the same reason, it is also recommended that contracts for dairy products not exceed one year in length, as it is difficult to anticipate costs with longer term contracts.

If you have any questions regarding this information, please contact Mary Riley at the number shown below.

Sincerely,

David Ikari, Chief  
Dairy Marketing Branch
