

PERRIS UNION

HIGH SCHOOL DISTRICT

COVID-19 SAFETY PLAN

January 22, 2021

The Perris Union High School District COVID-19 Safety Plan (CSP) consists of two parts: (1) the Cal/OSHA COVID-19 Prevention Program (CPP) and (2) the COVID-19 School Guidance Checklist. The CSP takes into account guidance and regulations provided by the California Department of Public Health (CDPH), the Riverside County Public Health (RCPH) Department and Cal/OSHA, and may be adjusted as conditions and/or guidance changes.

CONTENTS OF THE COVID-19 SAFETY PLAN (CSP)

Overview

PART 1 - Perris Union High School District COVID-19 Prevention Program (CPP)

PART 2 - COVID-19 School Guidance Checklist

Attachment to COVID-19 School Guidance Checklist

California Department of Public Health's COVID-19 and Reopening In-Person Instruction Framework & Public Health Guidance for K-12 Schools in California, 2020-2021 School Year

OVERVIEW

On December 30, 2020, Governor Gavin Newsom announced a Safe Schools for All Plan to encourage local educational agencies (LEAs) to resume in-person instruction as early as mid-February by providing incentive grants. The California Department of Public Health (CDPH) released corresponding guidance on January 14, 2021 entitled, [COVID-19 and Reopening In-Person Instruction Framework & Public Health Guidance for K-12 Schools in California, 2020-2021 School Year](#).

The Safe Schools for All Plan and CDPH guidance provide a framework to implement in-person instruction following specific criteria for schools serving grades TK-6, and for specialized cohorts across all grade spans. Requirements for in-person instruction are in place unless the seven-day adjusted case rate in the LEAs local health jurisdiction or county is above 25 cases per 100,000 per day. Specifically, the Safe Schools for All Plan requires specialized cohorts for the following student groups:

1. Individuals with exceptional needs as defined in section 56026.
2. Foster youth as defined in subdivision (b) of section 42238.01.
3. Homeless children and youths as defined in Section 725 of the federal McKinney-Vento Act.
4. Students without access to a computing device, software, or high-speed internet access necessary to participate in online instruction, as determined by the local educational agency.

While guidance from CDPH does not allow for schools in grades 7-12 to reopen while Riverside County is in the purple tier, targeted in-person instruction may be offered pursuant to [Cohorting Guidance](#) that was provided to LEAs on September 4, 2020. The Cohorting Guidance provides a way for schools not yet permitted to reopen under state and local public health directives to provide in-person supervision, instruction, targeted support services, and facilitation of distance learning for some students, especially high-need student groups and students who may not be able to benefit fully from distance learning offerings.

As of January 19, 2021, Riverside County had a case rate of 148.4 (new COVID-19 cases per day per 100,000 people), and an adjusted case rate of 95.9 (adjusted for number of tests performed). As such, the Perris Union High School District will offer specialized cohort in-person instruction based upon the following criteria and in conjunction with this COVID-19 Safety Plan (CSP):

1. Specialized cohorts that began in November 2020 (pilot cohorts) will remain in full distance learning until the Regional Stay Home Order is lifted. Once lifted, these cohorts will begin in-person within two weeks.

2. When the adjusted case rate falls below 50 per 100,000 people per day, up to 25% of specialized cohorts required under the Safe Schools for All Plan would begin within one month, as practicable.
3. When the adjusted case rate falls below 25 per 100,000 people per day, all specialized cohorts as required Safe Schools for All Plan would begin within one month.
4. The district may also consider other at-risk students for specialized cohorts in addition to those required to be included by the Safe Schools for All Plan.
5. Students qualifying for specialized cohorts will not be required to participate in-person if they prefer to continue with full distance learning.

CDPH guidance is a public health directive and the Perris Union High School District must comply with its orders and guidance, as well as those provided by the Riverside County Public Health (RCPH) Department to limit the spread of COVID-19 and protect public health.

PART 1

Perris Union High School District COVID-19 Prevention Program (CPP)

On December 1, 2020, Cal/OSHA's Emergency Temporary Standards requiring employers to protect workers from hazards related to COVID-19 went into effect. The regulations require that employers, including schools, establish and implement a written CPP to address COVID-19 health hazards, correct unsafe or unhealthy conditions, and provide face coverings. Employers were permitted to create a written CPP by incorporating elements of this program into their existing Injury and Illness Prevention Program (IIPP).

Centers for Disease Control and Prevention

California Division of Occupational Safety and Health

What is Coronavirus Disease 2019 (COVID-19)

On February 11, 2020 the World Health Organization announced an official name for the disease that is causing the 2019 novel coronavirus outbreak, first identified in Wuhan China. The new name of this disease is coronavirus disease 2019, abbreviated as COVID-19.

There are many types of human coronaviruses including some that commonly cause mild upper-respiratory tract illnesses. COVID-19 is a new disease, caused by a novel (or new) coronavirus that has not previously been seen in humans. The name of this disease was selected following the World Health Organization's (WHO) best practice for naming of new human infectious diseases.

Coronavirus Disease 2019 (COVID-19) - How Does the Virus Spread?

The virus that causes COVID-19 is thought to spread mainly from person to person through respiratory droplets produced when an infected person talks, coughs, sneezes, or exhales. These droplets can land in the mouths and/or noses of people who are nearby or possibly be inhaled into the lungs. Spread is more likely when people are in close contact with one another (within about 6 feet).

COVID-19 seems to be spreading easily and sustainably in the community (community spread) in many affected geographic areas. Community spread means people have been infected with the virus in an area, including some who are not sure how or where they became infected. Many people who are infected with the virus have no symptoms, contributing to further spread.

It may be possible that a person can get COVID-19 by touching a surface or object that has the virus on it and then touching their own mouth, nose, or eyes. This is not thought to be the main way the virus spreads, but the Center for Disease Control and Prevention (CDC) is still learning more about how this virus spreads.

Injury and Illness Prevention Program (IIPP) and COVID-19 Prevention Program (CPP)

California employers are required to establish and implement a written Injury and Illness Prevention Program (IIPP) to protect employees from workplace hazards, including infectious diseases. Employers are required to evaluate potential hazards in their workplace and implement control measures. The requirements for

establishing, implementing and maintaining an effective written injury and illness prevention program are contained in Title 8 of the California Code of Regulations, Section 3203 and consist of nine elements.

On December 1, 2020, Cal/OSHA's Emergency Temporary Standards requiring employers to protect workers from hazards related to COVID-19 went into effect. The regulations require that employers, including schools, establish and implement a written CPP to address COVID-19 health hazards, correct unsafe or unhealthy conditions, and provide face coverings, California Code of Regulations, Section 3205.

Definitions

- **COVID-19** - Means coronavirus disease, an infectious disease caused by the severe acute respiratory syndrome coronavirus 2 (SARS-CoV-2).
- **COVID-19 Case** - Means a person who:
 - Has a positive COVID-19 test
 - Is subject to a COVID-19-related order to isolate issued by a local or state health official; or
 - Has died due to COVID-19, in the determination of a local health department or per inclusion in the COVID-19 statistics of a county.
- **Isolation** - Used to separate a COVID-19 Case from people who are not infected. People who are in isolation must stay home until it is safe for them to be around others, and at home, they should attempt to stay in a specific "sick room" or area and use a separate bathroom if available to reduce exposure to others living with them.
- **COVID-19 Exposure** - Means being within six feet (close contact) of a COVID-19 Case for a cumulative total of 15 minutes or greater in any 24-hour period, regardless of wearing face coverings.
- **COVID-19 Contact** - Means a person has been exposed or in close contact to a COVID-19 Case.
- **Quarantine** - Used to keep someone who might have been exposed or has been in close contact to a COVID-19 Case, away from others. People in quarantine must stay home, separate themselves from others, monitor their health, and follow directions from the state or local public health.
- **COVID-19 Hazard** - Means exposure to potentially infectious material that may contain SARS-CoV-2, the virus that causes COVID-19. Potentially infectious materials include airborne droplets, small particle aerosols, which most commonly result from a person(s) exhaling, talking or vocalizing, coughing, sneezing, or procedures performed on persons which may aerosolize saliva or respiratory tract fluids. This also includes objects or surfaces that may be contaminated with SARS-CoV-2.

- COVID-19 Symptoms - Means fever of 100.4 degrees Fahrenheit or higher, chills, cough, shortness of breath or difficulty breathing, fatigue, muscle or body aches, headache, new loss of taste or smell, sore throat, congestion or runny nose, nausea or vomiting, or diarrhea, unless a licensed health care professional determines the person's symptoms were caused by a known condition other than COVID-19.
- Exposed Workplace - Means any work location, working area, or common area at work used or accessed by a COVID-19 Case during the high-risk exposure period, including bathrooms, walkways, hallways, aisles, break or eating areas, and waiting areas. The exposed workplace does not include buildings or facilities not entered by a COVID-19 case.
- High-Risk Exposure Period - Means the following time period:
 - For persons who develop COVID-19 symptoms: 2 days before they first develop symptoms until 10 days after symptoms first appeared, and 24 hours have passed with no fever, without the use of fever-reducing medications, and symptoms have improved; or
 - For persons who test positive who never develop COVID-19 symptoms: two days before until ten days after the specimen for their positive COVID-19 test was collected.
- COVID-19 Test - Means a viral test for SARS-CoV-2 that is:
 - Approved by the United States Food and Drug Administration (FDA) or has an Emergency Use Authorization from the FDA to diagnose current infection with the SARS-CoV-2 virus and;
 - Administered in accordance with the FDA approval or the FDA Emergency Use Authorization as applicable.
- Face Covering - Means a tightly woven fabric or non-woven material with no visible holes or openings, which covers the mouth and nose.

Perris Union High School District

Introduction

The Perris Union High School District (PUHSD), through its Governing Board and administration, is committed to the safety and health of all employees, and recognizes the need to comply with regulations governing injury and accident prevention and employee safety. By making safety a high priority for every employee, the District can reduce injuries and illness, increase productivity and promote a safer and healthier work environment.

The District's Injury and Illness COVID-19 Prevention Program (CPP) is a framework applicable during the current COVID-19 public health emergency. The protocols that are outlined in this document are a phased approach and will be modified based on the ongoing and updated guidance from the Centers for Disease Control (CDC), state and local public health agencies, and District operations.

Authority and Responsibility

Judy Miller, Director of Risk Management and Environmental Safety has overall authority and responsibility for implementing the provisions of this COVID-19 Prevention Program (CPP) in our workplace. In addition, all administrators, directors, supervisors and managers are responsible for implementing and maintaining the CPP in their school or administrative work areas and for ensuring employees receive answers to questions about the program in a language they understand.

All employees are responsible for using safe work practices, following all directives, policies and procedures, and assisting in maintaining a safe work environment.

Communication

Communication between employees and the Perris Union High School District on matters relating to COVID-19 mitigation and response is an important aspect to ensure employee safety while in the workplace.

Our goal is to ensure that we have effective two-way communication with our employees, in a form they can readily understand, and that includes the following information:

- All District employees should report COVID-19 symptoms and possible exposures to Brenda Arenas, in Human Resources.
- All District employees and their authorized employee representatives are encouraged to report COVID-19 hazards and mitigation practices in the workplace to their supervisors, administrators and/ or Risk Management.
- Employees can report symptoms and hazards without fear of reprisal.
- Employees will be referred to Human Resources if they require accommodation with medical or other conditions that put them at increased risk of severe COVID-19 illness.

Essential Infection Prevention/Control Measures

District Strategies/Administrative Controls

The District, to the extent possible, will implement the following guidelines to mitigate employee exposure to the coronavirus disease (COVID-19) in the workplace.

- Encourage sick employees to stay home.
- The District has implemented a daily COVID-19 Attestation Monitoring Protocol that includes a reporting process for employees to complete prior to entering a District facility.
- If an employee is showing symptoms related to COVID-19 while at work, the supervisor or administrator should send the employee home or if they are in any medical distress call 911, as needed, and notify Human Resources who will follow up with the employee.
- Follow public health agency recommendations regarding the prearrangement of office and workplace furniture in keeping with current physical distancing guidelines.
- To the extent supplies are in stock and readily available for distribution, employees will have access to appropriate hygiene products in the workplace (handwashing facilities, hand sanitizer, face mask, and face shields).
- Employees are encouraged and will be allowed time to properly wash their hands. Hand sanitizer is available for all employees, and dispensing stations have been added in high traffic areas. However, use of hand sanitizers with methyl alcohol is prohibited.
- The District has established a Visitor Screening Protocol at each campus location that requires all visitors to report through a single-point-of-entry and attest that they are symptom free by

answering a questionnaire posted on a sign in both English and Spanish. Face masks/coverings are required, and will be provided to visitors if needed.

- Employees working at the visitor entry locations will be provided with a workstation that ensures social distancing and includes a plexiglass barrier.

Face Coverings

Cloth face coverings are not Personal Protective Equipment (PPE) or respiratory protective equipment, but combined with physical distancing of at least 6 feet and hand hygiene, they may help prevent infected persons without symptoms from unknowingly spreading COVID-19 as particles containing the virus can travel more than 6 feet, especially indoors.

Employees are expected to wear face coverings (cloth face cover; mask) when indoors, and when outdoors and less than 6 feet away from others, including non-employees. Clean and undamaged face coverings/face masks are available for staff, or staff can provide their own as long as they are worn properly and cover both their nose and mouth. Employees should contact their supervisor or the work site's Designated COVID-19 Administrator for the location of masks or to request additional supplies. We shall not prevent any employee from wearing a face covering when not required by this section, unless it would create a safety hazard.

The following are exceptions to the use of face coverings in the District's workplace:

- When an employee is alone in a room.
- While eating and drinking onsite, provided employees are at least six feet apart and outside air supply to the area, if indoors, has been maximized to the extent possible.
- Employees wearing respiratory protection in accordance with CCR Title 8 section 5144 or other safety orders.
- Employees who cannot wear face coverings due to a medical or mental health condition or disability, or who are hearing-impaired or communicating with a hearing-impaired person. Alternatives will be considered on a case-by-case basis.
- Specific tasks that cannot feasibly be performed with a face covering, where employees will be kept at least six feet apart.

Employees exempted from wearing face coverings shall wear an effective non-restrictive alternative if their condition or disability permits it. Any employee not wearing a face covering, face shield with a drape or other effective alternative, or respiratory protection, for any reason, shall be at least six feet apart from all other persons unless the unmasked employee is tested at least twice weekly for COVID-19. Testing is not an alternative to face coverings when face coverings are otherwise required.

Physical Distancing

Where possible, the District will ensure at least six feet of physical distancing at all times in the workplace. Physical distancing will be accomplished in part by:

- Reducing the number of staff working on-site by alternating schedules and allowing employees to work remotely.
- To limit interaction in the workplace, online meetings and phone calls will be utilized when possible.
- Rearrange and/or remove furniture/chairs to provide at least 6 feet of physical distance between workstations/work areas.
- Occupancies will be evaluated throughout the District and signage posted in break rooms, work rooms, and conference rooms to limit the number of staff in an enclosed area at one time. Individuals will be kept as far apart as possible when there are situations where six feet of physical distancing cannot be achieved.
- Place signs, stickers, or stanchions in common areas (e.g., front reception area, school office, public common areas, etc.) to help manage physical distancing and provide other COVID-19 infection prevention information, such as the requirement for face coverings, to the general public who may enter school grounds and buildings.
- Install cleanable solid plexiglass partitions at fixed work locations where it is not possible to maintain the physical distancing requirements at all times.

Engineering Controls

The District maximizes, to the extent feasible, the quantity of outside air for our buildings with mechanical or natural ventilation systems by:

- Regularly inspecting and performing maintenance as needed on mechanical ventilation systems to ensure that each unit's filtration capacity is operating at its highest possible level, as specified by the manufacturer.

- Air filters are being treated with a surface coating, SD Pro Plus, applied with an electrostatic sprayer to further reduce the spread of contaminants.
- Allowing windows and doors to remain open to increase outside airflow, when weather and air quality conditions are permitting.

Correction of COVID-19 Hazards

Each work and school site has an established COVID-19 Task Force consisting of employees from that location. The Task Force is responsible for conducting a COVID-hazard assessment that effectively evaluates potential workplace exposures and hazards, known as the COVID-19 Response Plan, for their site and creating a plan that lists the hazards that were discovered and solutions used to address and/or correct the hazards.

The COVID-19 Task Force evaluates risk factors in the following 5 categories:

- Medical Screening
- Physical Distancing
- Personal Hygiene
- Protective Equipment
- Environmental Cleaning

Critical to ongoing implementation and timely updates to the plan, site staff are encouraged to communicate with their supervisor regarding any concerns or changes needed to existing COVID-19 prevention controls.

Regular inspections using the *Appendix A COVID-19 Site Inspection Form* will be required at each work site and campus to identify unhealthy conditions, work practices, and work procedures related to COVID-19 and to ensure compliance with the District's COVID-19 policies and procedures. Any unsafe conditions, work practices or work procedures identified will be corrected in a timely manner based on the severity of the COVID-19 hazards.

Employee Responsibility

During this COVID-19 public health emergency, District employees have a collective responsibility to ensure the protection of all people in the workplace by staying abreast of current public health guidelines to mitigate exposure to the coronavirus disease (COVID-19).

- Employees are expected each workday to self-screen at home for COVID-19 symptoms. The District has implemented a daily COVID-19 Attestation Monitoring Protocol that includes a reporting process for employees to complete prior to entering a District facility. An employee should stay home if they are sick, follow public health agency guidelines, and contact their administrator or supervisor without fear of reprisal.
- Employees who are out ill with fever or acute respiratory symptoms that affect normal breathing who have not been tested for the COVID-19 virus or who have tested negative for the COVID-19 virus, should consult with their physician before physically returning to work.
- Employees who test positive for the COVID-19 virus or have been in close contact with someone who tested positive should stay home and contact Brenda Arenas in Human Resources as soon as possible.
- When an employee discovers they have been in close contact with a person who may have contracted the COVID-19 infection (has tested positive or is experiencing COVID-19 related symptoms) the employee should report the exposure to Human Resources as soon as possible.
- Employees who return to work following an illness should promptly report any recurrence of symptoms to their immediate supervisor and Human Resources.
- Employees should practice physical distancing by using video or telephonic meetings as much as practicable, and maintaining a distance of at least 6 feet between persons at the workplace when possible.
- Employees should avoid shared workspaces (desks, offices, and cubicles) and work items (phones, computers, other work tools, and equipment) when possible. If employees must share workspaces, clean and disinfect shared workspaces and work items before and after use.
- Employees should wash hands with soap and water for at least 20 seconds after interacting with other persons and after contacting shared surfaces or objects. Employees may also use hand sanitizer if they do not have immediate access to a sink or hand washing facility, however, hand sanitizer is not effective if the hands are soiled.
- Employees should cover coughs and sneezes and avoid touching eyes, nose, and mouth with unwashed hands.

- Employees should avoid sharing personal items with coworkers (i.e., dishes, cups, utensils, towels).
- Employees should notify their administrator or supervisor if any washing facilities do not have an adequate supply of suitable cleansing agents, water and single-use towels or blowers.
- Employees should not bring cleaning products and/or disinfectants into the workplace that have not been approved by the Director of Maintenance & Operations or Director of Risk Management and Environmental Safety.

Personal Protective Equipment (PPE)

While engineering and administrative controls such as physical distancing, physical barriers, staggered schedules, and wearing face coverings are considered more effective in minimizing exposure to COVID-19, PPE may also be needed to prevent certain exposures. While correctly using PPE can help prevent some exposures, it should not take the place of other prevention strategies.

Examples of PPE include: gloves, goggles, gowns, face shields, face masks, shoe covers and respiratory protection. The District will evaluate the need for PPE, and provide such PPE as needed pursuant to CCR Title 8 Section 3380. The District will also evaluate the need for respiratory protection in accordance with CCR Title 8 section 5144 when physical distancing requirements are not feasible or maintained. Any PPE used by employees shall not be shared.

During an outbreak of an infectious disease, such as COVID-19, recommendations for PPE specific to occupations or job tasks may change depending on the updated risk assessments for workers, and information on PPE effectiveness in preventing the spread of COVID-19.

Cleaning & Disinfection of High Traffic – High Touch Common Areas

The District recognizes that high traffic – high touch common areas in the workplace need, to the extent possible, cleaning and disinfecting to limit the spread of the COVID-19 virus.

The District will assign personnel and establish routine schedules to clean and disinfect common surfaces and objects in the workplace. This includes, but is not limited to, classroom technology devices, containers, counters, tables, desks, chairs, benches, door handles, knobs, drinking fountains, refrigerators, vending machines, portable restroom and bathroom surfaces, and trash cans. Shared District Vehicles will be disinfected in between users.

The process of disinfecting includes providing disinfecting products that are EPA approved for use against the virus that causes COVID-19 and following the manufacturer's instructions for all cleaning and disinfection products (e.g., safety requirements, PPE, concentration, dwell time).

The District has made available disinfectant and disposable towels to any employee who chooses to use, on a voluntary basis, in between established cleaning/disinfecting schedules. The disinfectant does not require PPE to use. Directions for use and replenishing supplies will be provided to staff when the disinfectant is requested.

District Response to COVID-19 Cases

The District will consult with the CDC, state health care agencies, and the Riverside County Department of Public Health to ensure mitigation practices and response protocols are aligned with current expectations as information about the COVID-19 virus continues to be examined and understood.

Investigating and Responding to COVID-19 Cases

As soon as the District is notified of a COVID-19 Case, an investigation will be conducted to obtain specific information regarding the Case, the last date the Case was at the workplace and what areas the Case occupied to determine if there were any potential exposures in the workplace. In the event of any potential COVID-19 exposures, notifications containing no personally identifying information of the COVID-19 Case will be given within 24 hours to the following individuals:

- All employees who may have had COVID-19 exposure and their authorized representatives.
- Independent contractors and other employees present at the workplace during the high-risk exposure period.

The District offers COVID-19 testing at no cost to all employees who had potential COVID-19 exposure in the workplace, which can be conducted during normal working hours.

In the event the District is required to provide testing due to a workplace exposure or outbreak, the District will communicate the plan for providing testing and inform affected employees of the reason for testing, the notification process and timeline to receive test results.

When testing is not required, employees may voluntarily obtain testing using their health plan at approved clinics, or for free at any County testing centers.

Exclusion of COVID-19 CASES

When a COVID-19 Case is reported, the District will limit transmission in the workplace by:

- Ensuring that COVID-19 Cases are excluded or isolated from the workplace until our return-to-work requirements as outlined in this CPP are met.
- Ensuring that COVID-19 contacts (employees with exposure to a COVID-19 Case) are excluded from the workplace for 14 days after the last known exposure to the COVID-19 case and provided instructions for quarantine.
- Continuing and maintaining an employee's earnings, seniority, and all other employee rights and benefits whenever it has been demonstrated that the COVID-19 exposure is work-related.
- Affected employees will remain in a fully paid status and will be notified of potential sources of leave.
- Providing employees at the time of exclusion with information of available benefits.

Return to Work Criteria

Employees who have tested positive for COVID-19 may not report to work or be on any district property until they have completed the isolation period described below. Employees will not be required to provide a negative COVID-19 test result or healthcare provider's note to return to work.

COVID-19 Cases with COVID-19 symptoms shall not return to work until:

- At least 24 hours have passed since a fever of 100.4 or higher has resolved without the use of fever-reducing medications;
- COVID-19 symptoms have improved; and
- At least 10 days have passed since COVID-19 symptoms first appeared.

COVID-19 Cases who tested positive but never developed COVID-19 symptoms shall not return to work until:

- A minimum of 10 days have passed since the date of the specimen collection of their first positive COVID-19 test.

A negative COVID-19 test shall not be required for an employee to return to work. If an order to isolate or quarantine an employee is issued by local or state health officials, the employee

shall not return to work until the period of isolation or quarantine is completed or the order is lifted. If no period was specified, then the period shall be 10 days from the time the order to isolate was effective, or 14 days from the time the order to quarantine was effective.

Cleaning and Disinfecting – Confirmed COVID-19 Case

- Temporarily close the general area where the infected employee worked until cleaning is completed, if feasible.
- If possible, open outside doors and windows and use ventilating fans to increase air circulation in the area.
- Wait 24 hours or as long as practical before cleaning and disinfecting the area.
- Clean and disinfect the entire general area where the infected employee worked and may have been for longer than 15 minutes, including breakrooms, restrooms and travel areas, with a cleaning agent approved for use by the EPA against the coronavirus.
- District custodial staff cleaning the area should be equipped with the proper personal protective equipment for COVID-19 disinfection depending on both the duration of time the infected person was in the area and the last date the infected person was in the area (PPE could include disposable gown, gloves, eye protection, and mask).

Reporting, Recordkeeping, and Access

The District will report information about COVID-19 cases at our workplace to the local health department, the District's Third Party Administrator, and/or Cal/OSHA whenever required by law, and provide any related information requested by these entities.

The District will maintain records of the steps taken to implement the IIPP COVID-19 Protection Program (CPP) in accordance with CCR Title 8 section 3205. The CPP shall be made available at the workplace to employees, authorized employee representatives, and to representatives of Cal/OSHA immediately upon request.

The information collected during the investigation of all COVID-19 cases will be recorded and tracked. The information will be made available to employees, authorized employee representatives, or as otherwise required by law, with personal identifying information removed.

Training and Instruction

Employee Training

The District will provide effective training and instructions that include:

- The District's COVID-19 policies and procedures to protect employees from COVID-19 hazards.
- Information regarding COVID-19-related benefits to which employees may be entitled under applicable federal, state, or local laws.
- The fact that:
 - COVID-19 is an infectious disease that can be spread through the air.
 - COVID-19 may be transmitted when a person touches a contaminated object and then touches their eyes, nose, or mouth.
 - An infectious person may have no symptoms
- Methods of physical distancing of at least six feet and the importance of combining physical distancing with the wearing of face coverings.
- The fact that particles containing the virus can travel more than six feet, especially indoors, so physical distancing must be combined with other controls, including face coverings and hand hygiene, to be effective.
- The importance of frequent hand washing with soap and water for at least 20 seconds and using hand sanitizer when employees do not have immediate access to a sink or hand washing facility, and that hand sanitizer does not work if the hands are soiled.
- Proper use of face coverings and the fact that face coverings are not respiratory protective equipment. Face coverings are intended to primarily protect other individuals from the wearer of the face covering.
- COVID-19 symptoms, and the importance of obtaining a COVID-19 test and not coming to work if the employee has COVID-19 symptoms.
- Proper use of PPE for identified groups with potential for higher exposure.

The training may consist of reviewing written documentation, online video training and/or acknowledge receipt of the District's Injury and Illness COVID-19 Prevention Program (CPP).

PART 2

COVID-19 School Guidance Checklist

On January 14, 2021, the California Department of Public Health (CDPH) released the COVID-19 School Guidance Checklist to correspond with its updated Reopening In-Person Instruction Framework & Public Health Guidance. Part 2 of the Perris Union High School District's CSP is the completed checklist in the CDPH format as well as an attachment to provide additional information for each element within the checklist.

COVID-19 School Guidance Checklist

January 14, 2021

CALIFORNIA
ALL

Your Actions
Save Lives

Date: _____

2021 COVID-19 School Guidance Checklist

Name of Local Educational Agency or Equivalent: _____

Number of schools: _____

Enrollment: _____

Superintendent (or equivalent) Name: _____

Address: _____

Phone Number: _____

Email: _____

Date of proposed reopening: _____

County: _____

Grade Level (check all that apply)

Current Tier: _____
(please indicate Purple, Red, Orange or Yellow)

TK 2nd 5th 8th 11th

K 3rd 6th 9th 12th

1st 4th 7th 10th

Type of LEA: _____

This form and any applicable attachments should be posted publicly on the website of the local educational agency (or equivalent) prior to reopening or if an LEA or equivalent has already opened for in-person instruction. For those in the Purple Tier, materials must additionally be submitted to your local health officer (LHO), local County Office of Education, and the State School Safety Team prior to reopening.

The email address for submission to the State School Safety for All Team for LEAs in Purple Tier is:

K12csp@cdph.ca.gov

LEAs or equivalent in Counties with a case rate $\geq 25/100,000$ individuals can submit materials but cannot re-open a school until the county is below 25 cases per 100,000 (adjusted rate) for 5 consecutive days.

For Local Educational Agencies (LEAs or equivalent) in ALL TIERS:

I, _____, post to the website of the local educational agency (or equivalent) the COVID Safety Plan, which consists of two elements: the **COVID-19 Prevention Program (CPP)**, pursuant to CalOSHA requirements, and this **CDPH COVID-19 Guidance Checklist** and accompanying documents,

which satisfies requirements for the safe reopening of schools per CDPH [Guidance on Schools](#). For those seeking to open while in the Purple Tier, these plans have also been submitted to the local health officer (LHO) and the State School Safety Team.

I confirm that reopening plan(s) address the following, consistent with guidance from the California Department of Public Health and the local health department:

Stable group structures (where applicable): How students and staff will be kept in stable groups with fixed membership that stay together for all activities (e.g., instruction, lunch, recess) and minimize/avoid contact with other groups or individuals who are not part of the stable group.

Please provide specific information regarding:

How many students and staff will be in each planned stable, group structure? (If planning more than one type of group, what is the minimum and maximum number of students and staff in the groups?)

If you have departmentalized classes, how will you organize staff and students in stable groups?

If you have electives, how will you prevent or minimize in-person contact for members of different stable groups?

Entrance, Egress, and Movement Within the School: How movement of students, staff, and parents will be managed to avoid close contact and/or mixing of cohorts.

Face Coverings and Other Essential Protective Gear: How CDPH's face covering requirements will be satisfied and enforced for staff and students.

Health Screenings for Students and Staff: How students and staff will be screened for symptoms of COVID-19 and how ill students or staff will be separated from others and sent home immediately.

Healthy Hygiene Practices: The availability of handwashing stations and hand sanitizer, and how their safe and appropriate use will be promoted and incorporated into routines for staff and students.

Identification and Tracing of Contacts: Actions that staff will take when there is a confirmed case. Confirm that the school(s) have designated staff persons to support contact tracing, such as creation and submission of lists of exposed students and staff to the local health department and notification of exposed persons. Each school must designate a person for the local health department to contact about COVID-19.

Physical Distancing: How space and routines will be arranged to allow for physical distancing of students and staff.

Please provide the planned maximum and minimum distance between students in classrooms.

Maximum: _____ feet

Minimum: _____ feet. If this is less than 6 feet, please explain why it is not possible to maintain a minimum of at least 6 feet.

Staff Training and Family Education: How staff will be trained and families will be educated on the application and enforcement of the plan.

Testing of Staff: How school officials will ensure that students and staff who have symptoms of COVID-19 or have been exposed to someone with COVID-19 will be rapidly tested and what instructions they will be given while waiting for test results. Below, please describe any planned periodic asymptomatic staff testing cadence.

Staff asymptomatic testing cadence. Please note if testing cadence will differ by tier:

Testing of Students: How school officials will ensure that students who have symptoms of COVID-19 or have been exposed to someone with COVID-19 will be rapidly tested and what instructions they will be given while waiting for test results. Below, please describe any planned periodic asymptomatic student testing cadence.

Planned student testing cadence. Please note if testing cadence will differ by tier:

Identification and Reporting of Cases: At all times, reporting of confirmed positive and suspected cases in students, staff and employees will be consistent with [Reporting Requirements](#).

Communication Plans: How the superintendent will communicate with students, staff, and parents about cases and exposures at the school, consistent with privacy requirements such as FERPA and HIPAA.

Consultation: (For schools not previously open) Please confirm consultation with the following groups

Labor Organization

Name of Organization(s) and Date(s) Consulted:

Name: _____

Date: _____

Parent and Community Organizations

Name of Organization(s) and Date(s) Consulted:

Name: _____

Date: _____

If no labor organization represents staff at the school, please describe the process for consultation with school staff:

For Local Educational Agencies (LEAs or equivalent) in PURPLE:

Local Health Officer Approval: The Local Health Officer, for (state County) _____. County has certified and approved the CRP on this date: _____. If more than 7 business days have passed since the submission without input from the LHO, the CRP shall be deemed approved.

Additional Resources:

[Guidance on Schools](#)

[Safe Schools for All Hub](#)

ATTACHMENT TO COVID-19 SCHOOL GUIDANCE CHECKLIST

Providing Additional Information

The Perris Union High School District plans to offer specialized cohort in-person instruction based upon the following criteria and in conjunction with this COVID-19 Safety Plan (CSP):

1. Specialized cohorts that began in November 2020 (pilot cohorts) will remain in full distance learning until the Regional Stay Home Order is lifted. Once lifted, these cohorts will begin in-person within two weeks.
2. When the adjusted case rate falls below 50 per 100,000 people per day, up to 25% of specialized cohorts required under the Safe Schools for All Plan would begin within one month, as practicable.
3. When the adjusted case rate falls below 25 per 100,000 people per day, all specialized cohorts as required Safe Schools for All Plan would begin within one month.
4. The district may also consider other at-risk students for specialized cohorts in addition to those required to be included by the Safe Schools for All Plan.
5. Students qualifying for specialized cohorts will not be required to participate in-person if they prefer to continue with full distance learning.

Stable Group Structures (where applicable)

Students and staff will be kept in stable groups with fixed membership that stay together for all activities, minimizing contact with other groups or individuals who are not part of that stable group. This will be accomplished by following the guidance related to cohorts provided by CDPH.

Specialized cohorts will be organized in stable groups of no more than 14 students and no more than two supervising adults (or a configuration of no more than 16 individuals total in the cohort). In order to limit the possibility of infection, school sites will further limit cohort mixing by scheduling cohorts to meet in classrooms and buildings that are spread apart throughout the campus. Staff and students within cohorts will be required to follow all elements within the CSP including proper physical distancing, masking and other safety measures.

The District will use the following procedures that were previously developed to facilitate specialized cohorts to ensure stable groups as determined by California Department of Education, Riverside County Public Health (RCPH) Department and the Center for Disease Control:

Student Procedures

1. Students will be assigned to specialized cohorts that will meet twice weekly on either Monday and Wednesday or Tuesday and Thursday.
2. Students will attend school two days a week from 8:00 a.m. to 12:00 p.m.
3. Students and employees will not share food.
4. Students will not share electronic devices.
5. Limit use of shared equipment (laminated testing protocols) and clean between use.
6. Student work is to be turned in electronically when possible.
7. Use electronic documents instead of handouts when possible.
8. Students will not use classroom libraries at this time.
9. Parent(s) and students must sign a waiver to participate in a cohort.
10. Parent(s) must complete a daily passive self-check prior to sending a student to school.
11. Students must wear a cloth/disposable face covering at all times when in the presence of others. According to the guidelines provided by CDPH, students excluded from this requirement are those who have a medical exemption, including those who require respiratory protection, or are unable to wear face coverings due to the nature of their disability.
12. Students will have their temperature checked at the gate prior to entering campus by the cohort teacher (Note: Parents/Guardians may not leave students prior to temperature check clearance).
13. Students will be provided a bagged lunch to take home.

Staff Procedures

1. All staff must complete the daily COVID-19 Report to Work Site Attestation form electronically prior to physically reporting to their school site. If a staff member is not cleared through the form, the staff member must contact the Human Resources Department.
2. All adults must adhere to the District's Face Covering and Social Distancing Policy at all times.
3. Gloves, face shields, goggles, booties and/or disposable gowns (PPE) will be provided by site administration upon request.
4. Gloves, face shields, and gowns will be provided for staff for toileting students.
5. Related service providers will wear gloves, face shields, and gowns when working with students, and will change personal protective equipment (PPE) for new clean PPE between sessions when providing services to students from different cohorts. Related service providers will be assigned to work within as few cohorts as possible.

6. Staff will be responsible to ensure supplies are assigned to individual students (pens, textbooks, pencils, paper, manipulatives, etc.), so that supplies are not shared between students.

Entrance, Egress, and Movement Within the School

The following protocols will be utilized as it relates to movement of students, staff and parents to avoid close contact and/or mixing of cohorts:

Entrance and Egress: To minimize contact, arrival and departure times will be staggered. Additionally, drop-off and pick-up locations will be spread out, using as many locations as practicable. Staff will be present at each entrance and exit, and throughout campus to ensure physical distancing is maintained.

School Bus Transportation: Students will be spaced between each other and the driver will be maximized to the greatest extent practicable. A minimum of two windows will be open at all times. Each school bus will be equipped with extra unused face coverings for students who may have inadvertently failed to bring one.

Movement Within the School: Congregate movement through hallways and other similar settings will be minimized as much as practicable. Social distancing markers and signage will provide visual reminders to students and staff. Lobbies and waiting areas in administration buildings will be arranged to maintain social distancing, with signage posted indicating the modified capacity and applicable outdoor waiting procedures. Restrooms will also have modified limited capacity, with signage indicating this capacity.

Face Coverings and Other Essential Protective Gear

Face coverings will be required for use by all students and staff at all times, while at school, in accordance with CDPH guidelines unless a person is exempt as explained in the guidelines. The [CDPH Guidance for the Use of Face Coverings](#) document will be provided to staff and families of students. Additionally, staff will teach and reinforce the use of face coverings, or in limited instances, face shields with drapes. The district will provide face coverings to all students and staff if they do not have their own, or if their face coverings are in need of replacement. When Cal/OSHA standards require respiratory protection, the appropriate N95 or K95 mask will be provided for staff following the district's Respiratory Protection Plan.

Health Screenings for Students and Staff

The following procedures will be followed for symptoms of COVID-19:

Staff Procedures

Staff members are required to self screen each day and complete the daily COVID-19 Report to Work Site Attestation form electronically prior to reporting to their assigned work location. In the event that a staff member is experiencing symptoms the daily attestation form instructs them to contact the Human Resources department prior to entering District property. Upon contacting Human Resources, the staff member will undergo additional screening and questions to determine whether they are able to attend work.

Staff who report to multiple locations throughout any given work day are also required to complete a daily site visitation log.

Staff members who begin experiencing symptoms after arriving to work will immediately notify their supervisor, will be sent home, and instructed to contact Human Resources. Staff members will be unable to return to work until clearance to do so is provided by the Human Resources department.

Student Procedures

In order to ensure the safety of all students and reduce the risk of possible spread, students who are not feeling well or are showing any COVID-19 symptoms before school are required to stay home. Parents are required to do a symptom check (including temperature check) each day before sending their student to school.

According to Public Health, the following symptoms could be indicative of COVID-19: Fever of 100.4 or higher, new onset of cough, shortness of breath or trouble breathing, new loss of taste or smell, headache, sore throat, fatigue or muscle pain, nausea/vomiting/diarrhea, red or itchy eyes, congestion, or runny nose. If a student has a medical condition that may include one or more of the listed COVID-19 symptoms, parents will be required to provide current medical documentation.

Any student who demonstrates or complains of any COVID-like symptoms, will need to be picked up immediately and depending on their symptoms, will need to remain home for at least 24 hours or longer (parents will be provided with written documentation of their symptoms and return to school timelines). For the safety of all students, sick or ill students cannot remain on campus.

Students must be picked up within 30 minutes if they are ill/have symptoms of COVID-19. Parents are required to provide at least one (or more) local contact numbers of an individual(s) (over the age of 18) who will be available to pick up the ill

or symptomatic student. Ill or symptomatic students will be isolated from other students while waiting to be picked up.

Healthy Hygiene Practices

Hand sanitizer will be available in all classrooms and other common areas. Frequent handwashing will also be encouraged with handwashing stations available in restrooms with limited capacity for appropriate social distancing. Signage for both hand sanitizer stations and handwashing stations will be posted with instructions on the appropriate use.

Identification and Tracing of Contacts

The procedures detailed below are utilized when there is a confirmed case of COVID-19. Preventative measures are also described to limit exposure at school sites and district locations.

Staff Procedures

Staff members exhibiting symptoms of COVID-19 are instructed not to report to work and to contact Human Resources for next steps. In the event a confirmed case has been identified, the Human Resources department will interview the staff member to identify all possible contacts based upon the criteria established by CDPH and CDC. Following these guidelines, the potential contacts will then be contacted and instructed to begin the required quarantine period, currently 14 days, before they will be eligible to return to in person duties. Contacts will be provided with additional information via email to help them understand the purpose of their quarantine period and steps to take should they begin to exhibit symptoms of infection.

To assist with contact tracing, the COVID-19 Report to Work Site Attestation form previously described is used to know which staff members have been physically present on any given day. Additionally, Site Visit Logs are required for use by itinerant staff members to document all school sites entered during their day.

At the conclusion of the 14 day quarantine window, the Human Resources department will follow up and verify that the contact has not experienced any symptoms for the last 72 hours prior to allowing the employee to return to in person duties. In the event that a contact becomes a confirmed positive case, staff members are instructed to notify Human Resources who will then complete the necessary contact tracing and instruct the employee to follow the self-isolation protocol.

Student Procedures

Students exhibiting symptoms of COVID-19 are instructed not to report to school and parents/caregivers are advised to contact site administration. In the event a confirmed case has been identified, the Pupil Services department or site health staff will verify symptoms, and provide education as it relates to COVID-19, including isolation procedures. Through this interview process, they will also determine any potential contacts based upon the criteria established by CDPH and CDC.

Following these guidelines, if any of the potential contacts are other students who have been on campus, they will then be contacted and instructed to begin the required quarantine period, currently 14 days. Contacts will be provided with additional information to help them understand the purpose of their quarantine period and steps to take should they begin to exhibit symptoms of infection. If any of the potential contacts are staff members who have been on campus, they will be referred to the Human Resources department and the procedures relating to staff will be followed.

At the conclusion of the 14 day quarantine window, the Pupil Services department will follow up with any students who have been quarantined as a result of being in contact with an exposed person on a school campus. They will verify that the contact has not experienced any symptoms for the last 72 hours prior to allowing them to return to school.

All cases and contacts will be tracked using shared spreadsheets between Human Resources, Risk Management, and Pupil Services. This is then accessed by the Risk Management department for additional follow up and tracking as needed, notifications as required by Cal/OSHA and pursuant to AB685, reporting to the local health department as required by SB1159, and to coordinate and track any required testing. Risk Management utilizes the COVID-19 Report to Work Site Attestation form, Site Visit Logs, and Contractor/Vendor logs to assist with tracking, notification and testing requirements.

Physical Distancing

Classroom space will be arranged to allow for the maximum space for students and staff. Student desks will be arranged to face the same direction and spaced at least six-feet apart. Teacher desks will be placed at least six-feet from student and other staff desks. Short-term exposures of less than 6 feet between students and staff will be permitted in limited circumstances (e.g., a teacher assisting a student one-on-one), but the duration will be minimized and masks must be worn. Social

distancing markers and signage throughout campus will provide visual reminders to students and staff

Staff Training and Family Education

The District shall provide an orientation meeting either live (virtually) or video recording for staff members that includes an overview of specialized cohorts. Staff members shall have an opportunity to ask questions. Staff members shall also receive training in the following areas:

- Maintaining proper physical distancing, masking, and other safety measures as outlined by CDPH;
- Availability and proper use of Personal Protective Equipment (PPE);
- Disinfectant spray and/or wipes;
- Procedures for toileting, diapering, and exposure to bodily fluids;
- Symptoms and protocol for identifying and reporting symptoms of COVID-19; and safely providing medical services.

The District will also provide this training and orientation to all families who are participating in the specialized cohorts in English or Spanish. Parents will be required to sign confirmation that they have read and reviewed the plan prior to the start of the specialized cohorts. The school will also provide a video on the website for parents to review the orientation and training at their convenience.

Testing of Staff

Staff are required to complete a daily attestation confirming they do not have any symptoms consistent with COVID-19, or that they have not been in close contact with another individual who has tested positive or has symptoms of COVID-19 within a 72-hour period. Staff who cannot certify to these criteria are not permitted to enter any school site or district location. If a staff member does have symptoms of COVID-19, or has tested positive for COVID-19, they are instructed to contact Human Resources and complete a home isolation period in accordance with state and local health department regulations. If a staff member has been in close contact with an individual who has tested positive for COVID-19, they are also required to contact Human Resources and complete a home quarantine period in accordance with state and local health department regulations. Human Resources provides the appropriate isolation or quarantine procedures and documents this information for Risk Management. Human Resources verifies the employees' home isolation or quarantine are symptom-free for a minimum of 72-hours at the conclusion of the exclusion period, prior to allowing them to return to work.

Risk Management will continue to provide COVID-19 testing options for staff when an outbreak within a PUHSD workplace has occurred, pursuant to Cal/OSHA Emergency Temporary Standards. Testing options include (1) a self-administered Curative mouth swab test, monitored by a trained PUHSD employee, at the employee’s work location, or (2) testing provided by the employee’s healthcare provider, the Riverside County Department of Public Health, a community testing site, drug store or private lab, or any other free testing provider as long the results are provided by the employee to Risk Management. If the employee has recently tested positive for COVID-19 and they provide those results to Risk Management, they are not required to retest within a 3-month period unless they are exhibiting symptoms consistent with COVID-19.

Risk Management will also provide COVID-19 testing for staff when in-person instruction begins, including in-person specialized cohorts as required by Governor Newsom’s Safe Schools for All Plan. Testing will be conducted consistent with the requirements of the California Department of Public Health and in testing cadences based upon the tier assignment for Riverside County as shown in the table below.

| Yellow CR <1.0* TP <2% | Orange CR 1-3.9* TP 2-4.9% | Red CR 4-7* TP 5-8% | Purple CR >7-13.9* TP >8% | CR >14* |
|-------------------------------------|---|---|---|---|
| Symptomatic and response testing. | Symptomatic and response testing. | Symptomatic and response testing + Every 2 weeks asymptomatic testing. | Symptomatic and response testing + Every 2 weeks asymptomatic testing. | Symptomatic and response testing + Weekly asymptomatic (PCR or twice weekly antigen testing)** |

TP = test positivity

* The case rates above are adjusted case rates.

** Weekly asymptomatic testing assumes the use of a PCR test. If antigen testing is used, testing should be at a twice weekly cadence.

Staff who have tested positive for active infection with SARS-CoV-2 virus within the last 90 days are exempt from asymptomatic testing.

Further, when a staff member has symptoms of COVID-19 or has been exposed to someone with COVID-19, instructions for home isolation or home quarantine in accordance with state and local health department regulations will be provided by Human Resources.

Testing of Students

Similar to testing for staff, Risk Management will coordinate testing for students in conjunction with district nursing and health staff. Testing for students will commence when in-person instruction begins, including in-person specialized cohorts as required by Governor Newsom’s Safe Schools for All Plan. Testing will be conducted consistent with the requirements of the California Department of Public Health and in testing cadences based upon the tier assignment for Riverside County as shown in the table below.

| Yellow CR <1.0* TP <2% | Orange CR 1-3.9* TP 2-4.9% | Red CR 4-7* TP 5-8% | Purple CR >7-13.9* TP >8% | CR >14* |
|-------------------------------------|---|---|---|--|
| Symptomatic and response testing. | Symptomatic and response testing. | Symptomatic and response testing + Every 2 weeks asymptomatic testing. | Symptomatic and response testing + Every 2 weeks asymptomatic testing. | Symptomatic and response testing + Weekly asymptomatic (PCR or twice weekly antigen testing)**. |

TP = test positivity

* The case rates above are adjusted case rates.

** Weekly asymptomatic testing assumes the use of a PCR test. If antigen testing is used, testing should be at a twice weekly cadence.

Students who have tested positive for active infection with SARS-CoV-2 virus within the last 90 days are exempt from asymptomatic testing.

Further, when a student has symptoms of COVID-19 or has been exposed to someone with COVID-19, instructions for home isolation or home quarantine in accordance with state and local health department regulations will be provided to families by district nurse, site health staff or other designated staff member.

Identification and Reporting of Cases

At all times, reporting of confirmed positive and suspected cases in students, staff and employees will be consistent with Reporting Requirements. COVID-19 case reporting will be provided to the Riverside County Department of Public Health for any student or employee who was present at a school site or any district location within the 10 days preceding a positive test for COVID-19. Case reporting will comply with the Public Health Directive provided by the California Department of Public Health on January 14, 2021, Required COVID-19 Case Reporting by Schools.

Communication Plans

The superintendent, or appropriate designees, will communicate with students, staff, and parents about cases and exposures at school sites and any district locations in accordance with the requirements provided by the California Department of Public Health and the Riverside County Department of Public Health. Communication to staff will also comply with Cal/OSHA Emergency Temporary Standards for potential workplace exposure notifications and when testing is required as a result of an outbreak within a PUHSD workplace.

Overview

The California Department of Public Health (CDPH) developed the following framework to support school communities as they decide when and how to implement in-person instruction for the 2020-2021 school year. This document is rooted in the [scientific evidence](#) available to date and supports twin goals: **safe** and **successful** in-person instruction.

Understanding and evidence about the transmission and epidemiology of SARS-CoV-2, the virus that causes COVID-19, has evolved significantly over the course of the pandemic. Schools throughout the state are now in various stages of instruction including fully distance learning, fully in-person learning, and hybrid instruction based on local conditions.

Key mitigation strategies, studied in multiple settings and used successfully in schools nationally and internationally, allow for safe in-person instruction. The thoughtful implementation of mitigation strategies, specific to school context, provides a careful and effective pathway forward as community transmission rates fluctuate.

Information about the latest science of COVID-19 transmissions, including evidence regarding the lower risk of transmission for elementary aged students compared to middle and high-school aged students, is available [here](#) as an evidence summary. However, new evidence and data about COVID-19 transmission, including variations by age, and the effectiveness of disease control and mitigation strategies continues to emerge regularly.

Recommendations regarding in-person school reopening and closure should be based on the latest available evidence as well as state and local disease trends and we will update this guidance as needed to reflect new evidence.

This document is intended to provide an update to the *COVID-19 and Reopening In-Person Learning Framework for K-12 Schools in California, 2020-2021 School Year (July 17, 2020)* guidance. This document also provides a consolidation of content from other CDPH COVID-19 and school-related guidance and supersedes previous CDPH COVID-19 and Cal/OSHA school guidance.

AUTHORITY

This guidance is a public health directive that applies to all public and private schools operating in California. Under operative [executive orders](#) and provisions of the California Health and Safety Code, schools must comply with orders and guidance issued by the California Department of Public Health and relevant

local health departments (LHDs) to limit the spread of COVID-19 and protect public health.

Governmental and non-governmental entities at all levels have issued guidance and directives relating to the safe reopening of schools for in-person instruction. Schools may comply with guidance from other federal, state, local, and non-governmental sources, to the extent those guidelines are not weaker than or inconsistent with state and local public health directives.

This updated directive also incorporates two other public health directives issued January 14, 2021, related to: (1) reporting details of any positive case of a person who has been on campus to LHDs and (2) reporting to CDPH whether and to what degree all public and private schools have reopened to serve students in-person on campus. These directives are attached as Appendices 3 and 4.

SUMMARY OF CHANGES AND ADDITIONS

CDPH developed this comprehensive framework to support school communities as they determine how to implement in-person instruction for the remainder of the 2020-2021 school year.

This document is intended to consolidate and update prior state public health guidance and orders related to schools. Specifically, this document supersedes the following guidance, orders, and frequently asked questions:

- *COVID-19 Industry Guidance: Schools and School-Based Programs* (first published in May 2020; last updated August 3, 2020).
- *The COVID-19 and Reopening In-Person Learning Framework for K-12 Schools in California, 2020-2021 School Year* (July 17, 2020).
- The Elementary Education Waiver process and the associated School Waiver Letter and Cover Form and Local Health Officer Waiver Notice Form (all issued on August 3, 2020).
- CDPH Schools Frequently Asked Questions (first issued August 3, 2020; last updated October 20, 2020).

This update provides both K-12 schools and LHDs additional guidance for providing in-person instruction, including:

1. Criteria and processes for school reopenings under the [Blueprint for a Safer Economy](#) framework. (Updated on January 19, 2021 to clarify language in the Re-open definition.)
2. Considerations intended to help school community leaders plan for and prepare to resume in-person instruction including steps to take when a

- student or staff member is found to have COVID-19 symptoms during the school day and while participating in before and after school programs.
3. Response to confirmed COVID-19 infections when:
 - a. a case of COVID-19 is confirmed in a student or staff member; and
 - b. a cluster or outbreak of COVID-19 at a school is being investigated.
 4. Physical distancing in classrooms.
 5. Implementation of stable groups of students and staff.

This document does not modify or supersede the [Guidance Related to Cohorts for Children and Youth](#) (first issued on August 25, 2020; last updated September 4, 2020), which applies to groups of children and youth in controlled, supervised, and indoor environments. The Cohort Guidance continues to allow schools that are not permitted to reopen under state or local public health directives and schools (and any grades at schools) that have not yet reopened if permitted to do so to serve students in-person in small, stable cohorts, as specified in the Cohort Guidance.

DEFINITIONS

Schools and Local Educational Agencies (LEAs): As used throughout this document, refer to county offices of education or their equivalent, school districts, charter schools, and the governing authorities of private schools (including nonpublic nonsectarian schools).

Transitional Kindergarten: Means the first year of a two-year kindergarten program that uses a modified kindergarten curriculum that is age and developmentally appropriate. As used throughout this document, “kindergarten” is inclusive of transitional kindergarten.

Cohorts: In this document, “cohorts” has a specific meaning, which are groups of students who are meeting for targeted supports and intervention services, under the direction of an LEA, while the school is closed to in-person instruction and in addition to distance learning. Sometimes these groups are also called “learning hubs” or “pods.” Regardless of the name, all of the provisions in the [Cohorting Guidance](#) must be followed for such cohorts to meet, whether they are operated by LEAs, non-profits, or other providers, as a maximum of 16 individuals (students and staff). In this document, “cohort” does not refer to the more general “stable groups” that are described in the Stable Group Guidance section below.

Reopen for in-person instruction:

What does it mean to be “open” or “reopened”? The term “open” or “reopen” refers to operations for at least one grade at the school that are permitted only

if the county satisfies the eligibility requirements for schools to “open” or “reopen.” Specifically, the school must have given all students in at least one grade the option to return for in-person instruction for at least part of the school-week to be considered to “open” or “reopen.” This includes a school that has offered all students in at least one grade the option of receiving in-person instruction for only certain days during the week (commonly referred to as a “hybrid” model). Schools that were operating only in the manner permitted under the Cohorting Guidance are therefore not “open” or “reopened.”

In addition, if only some students were being served in-person in a school in a county in the Red Tier or lower (e.g., only students with disabilities) and all students in at least one grade did **not** have the option to return in-person as described above, the school has not “opened” or “reopened.” In such circumstances, if the school is located in a county that shifts to the Purple Tier, the school may continue serving the students in-person as it did while in the Red Tier, but it may not bring additional students back for in-person instruction and services, unless it adheres to the Cohort Guidance for the students newly brought back in-person.

Is a school “reopened” if it was previously permitted to reopen but became ineligible to reopen before actually reopening? No. Schools must have actually reopened for in-person instruction (using the definition above) while the county was in the Red Tier in order to remain open if the county moves back to Purple Tier. If the county is in the Purple Tier on the day the school plans to reopen for in-person instruction, the school must wait until it is eligible again.

If a school was implementing a phased reopening (e.g., only opened grades 9-10 for in-person instruction with set plans to phase in grades 11 and 12) while the county was in the Red Tier, the school site may continue their phased reopening if the county reverts back to the Purple Tier, if authorized by local health officer (LHO). This is only applicable to individual school sites. If a school district has a phased reopening of their schools, the schools in that district that did not open for in-person instruction may not re-open until the county meets the reopening criteria.

This also applies to schools subject to the updated Elementary Reopening Process (see below) applicable to the Purple Tier. Even if the school previously received a waiver under the former Elementary Education Waiver Process or meets the conditions to reopen under the updated Elementary Reopening Process, if it has not yet reopened and the county case rate (CR) exceeds the criteria described below, the school must delay reopening until the county case rate drops below the threshold.

In-Person School Reopening

The two subsections below describe the requirements for all schools, including those that have already reopened and those that have not. The Blueprint for a Safer Economy continues to inform the school reopening process. The Blueprint for a Safer Economy is based on Tiers, defined using the CR, the 7-day average of daily COVID-19 cases per 100,000 population, and the test positivity in a county. This Schools Framework uses the adjusted case rate, as described in the Blueprint.

Under this updated guidance, all schools must complete and post to their website homepages a COVID-19 Safety Plan (CSP), described below in COVID-19 Safety Plan for In-person Instruction section (page 10) prior to reopening for in-person instruction. Schools that have already reopened are required to post their CSPs by February 1, 2021. The CSP is intended to consolidate requirements to develop written plans pursuant to CDPH guidance first issued in May 2020 and the Cal/OSHA Emergency Temporary Standards finalized in November 2020.

Of note, the Cal/OSHA Emergency Temporary Standards require a written plan called the Cal/OSHA COVID-19 Prevention Program (CPP) (see the COVID-19 Safety Plan for In-person Instruction for more information); therefore, schools are expected to have already created this written plan. In order to align with Cal/OSHA standards and minimize burden to schools, the CPP for the school is the first component of the CSP.

As described below, under the updated Elementary Reopening Process, schools must also submit a copy of the CSP to the LHD and the State Safe Schools for All Team before they reopen elementary schools if they are operating within a jurisdiction or county that is in the Purple Tier.

REQUIREMENTS FOR SCHOOLS THAT HAVE ALREADY REOPENED

The *COVID-19 and Reopening In-Person Learning Framework for K-12 Schools in California, 2020-2021 School Year* (July 17, 2020 Framework) permitted schools to reopen for in-person instruction at all grades if they are located in counties in the Red, Orange, or Yellow Tiers under the Blueprint for a Safer Economy. Operations for schools that are already open must adhere to the School Reopening Guidance section below.

Schools that have already reopened for in-person instruction must, by February 1, 2021, complete and post a COVID-19 Safety Plan (CSP) to their website homepage or, in the case of schools that do not maintain websites, in another

publicly accessible manner, to continue operating in-person instruction, as described in the Covid-19 Safety Plan for In-Person Instruction section.

Schools that have reopened are not required to close if the county moves to the Purple Tier or goes over a CR of 25 per 100,000 population. See School Closure Determinations below for more information.

CRITERIA TO REOPEN FOR IN-PERSON INSTRUCTION

Red, Orange, and Yellow Tiers. Consistent with the July 17 Framework, schools may reopen at all grades if they are located in counties in the Red, Orange or Yellow Tiers under the Blueprint for a Safer Economy. Operations once reopened must adhere to the updated Sector Guidance for School and School-Based Program reflected in this document (see below). Schools that reopen under this paragraph must complete and post a CSP to their website homepage before reopening for in-person instruction, as described in the CSP Posting and Submission Requirements for In-Person Instruction [section](#).

Purple Tier. Schools may not reopen for grades 7-12 if the county is in Purple Tier. Subject to the limitation in the bullet immediately below, schools serving grades K-6 may reopen for in-person instruction in the Purple Tier, including during a State of California Regional Stay at Home Order, if they complete and post a CSP to their website homepage and submit the CSP to their local health officer (LHO) and the State Safe Schools for All Team and there are no identified deficiencies, as described in the Covid-19 Safety Plan (CSP) Posting and Submission Requirements for In-Person Instruction [section](#) below.

- **K-6 schools in counties in Purple Tier with CR>25:** Schools serving students in grades K-6 may not reopen for in-person instruction in counties with adjusted CR above 25 cases per 100,000 population per day. They may post and submit a CSP, but they are not permitted to resume in-person instruction until the adjusted CR has been less than 25 per 100,000 population per day for at least 5 consecutive days. This case rate reflects [recommendations](#) from the Harvard Global Health Institute analysis of safe school reopening policy. Please find additional information on how the adjusted CR is calculated [here](#). Recognizing that re-opening for in-person instruction takes time to routinize and improve safety, and that some schools may have already been conducting in-person learning successfully and had time to optimize all their policies and procedures to support minimal disease transmission on-site and detect new cases, schools who have already opened, as defined above, with minimal or no in-school transmission, may remain open and may consider increasing testing per CDPH supported testing [framework](#).

These new criteria and the requirements below replace the Elementary Education Waiver (issued August 3) that allowed LHOs to grant a waiver to school applicants for grades K-6 if specific criteria were satisfied. All waivers approved prior to this date remain valid.

COVID-19 SAFETY PLAN (CSP) FOR IN-PERSON INSTRUCTION

The COVID-19 Safety plan (CSP) consists of two parts: (1) the Cal/OSHA COVID-19 Prevention Program (CPP) and (2) the COVID-19 School Guidance Checklist.

Cal/OSHA Prevention Program (CPP)

On December 1, 2020, Cal/OSHA's Emergency Temporary Standards requiring employers to protect workers from hazards related to COVID-19 went into effect. The regulations require that employers, including schools, establish and implement a written CPP to address COVID-19 health hazards, correct unsafe or unhealthy conditions, and provide face coverings. Employers can also create a written CPP by incorporating elements of this program into their existing Injury and Illness Prevention Program (IIPP), if desired. Cal/OSHA has posted FAQs and a one-page fact sheet on the regulation, as well as a model COVID-19 prevention program.

- Cal/OSHA [Frequently Asked Questions](#)
- Cal/OSHA [Fact Sheet](#)
- Cal/OSHA Prevention Program Template - [Example](#)

COVID-19 School Guidance Checklist

In addition to the CPP, a COVID-19 School Guidance Checklist must be included and be posted online and submitted as outlined below.

COVID-19 SAFETY PLAN (CSP) POSTING AND SUBMISSION REQUIREMENTS FOR IN-PERSON INSTRUCTION

The Tiers from the Blueprint for a Safer Economy Framework inform the process needed for submission of CSPs for maintaining and/or resuming in-person instruction as described below and in Table 1.

Yellow (Tier 4/Minimal), Orange (Tier 3/Moderate), and Red (Tier 2/Substantial):

- For schools that have already reopened and are located in a county that is in the Yellow, Orange, or Red Tier, the LEA must post the CSP publicly on its website homepage by February 1, 2021.
- For those schools that have not reopened, and the county has been in the Purple Tier, the county must be in the Red Tier for 5 consecutive days before the school may reopen.
- For schools that have not reopened, the LEA must complete and post the CSP publicly on its website homepage at least 5 days prior to providing in-person instruction.
- While developing and prior to posting a CSP, it is strongly recommended that the LEA (or equivalent) consult with labor, parent, and community organizations. Examples of community organizations include school-based non-profit organizations and local organizations that support student enrichment, recreation, after-school programs, health services, early childhood services, or provide family support.

Purple (Tier 1/Widespread):

- For schools that have already reopened and are located in a county or LHD that is in the Purple Tier, the LEA must post the CSP publicly on its website homepage by February 1, 2021.
- Schools serving grades K-6 not already open, may reopen for in-person instruction if the LEA completes and posts a CSP to its website homepage and submits the CSP to their LHD and the State Safe Schools for All Team and does not receive notification of a finding that the CSP is deficient within 7 business days of submission. Under these circumstances, schools serving grades K-6 may only reopen for their K-6 grade students, even if their school serves non-K-6 grade students (e.g., a 6-8 school).
 - While developing and prior to submitting a CSP, the LEA must consult with labor, parent, and community organizations. Examples of community organizations include school-based non-profit organizations and local organizations that support student enrichment, recreation, after-school programs, health services, early childhood services or provide family support.
 - The COVID-19 School Guidance Checklist requires that the LEA provide evidence of consultation with labor, parent, and community organizations.
 - The LEA must sign an attestation confirming the names and dates that the organizations were consulted. If school staff are not represented by a labor organization, then the applicant must describe the process by which it consulted with school staff.

- The LEA must confirm publication of the CSP on the website of the LEA.
- The LEA must submit the CSP on behalf of all schools within their direct administrative authority, with site-specific precautions noted within the CSP to address considerations unique to specific school sites, as applicable. For example, a school district must submit a consolidated CSP for every school under its direct administrative authority, and must outline site-specific precautions insofar as there are features unique to the site that raise greater risks of COVID-19 transmission.
- If a group of private, faith-based, or charter schools within a single county are subject to the same governing authority (e.g., an archdiocese, charter management organization, etc.), the governing authority may submit the CSP on behalf of those schools, but must address site-specific considerations consistent with the bullet above. Otherwise, independent, private, faith-based, or charter schools that are affiliated with a broader network should post and submit the CSP for each school.
- LHDs and the State Safe Schools for All Team have 7 business days to provide feedback to the LEA regarding deficiencies in the CSP.
- The school may reopen on the eighth business day after submitting the CSP if the LHD and/or State Safe Schools for All Team do not provide notification that the CSP is unsafe within 7 business days of submission.
- If the LHD and/or State Safe Schools for All Team identify any deficiencies during the 7-business-day review period, the LEA will receive feedback on what they need to improve in order to be able to reopen for in-person instruction.
- After the LEA responds to feedback and re-submits the plan, the entity that identified the deficiency will have 7 business days to review revisions.
- If the LHD has noted a deficiency in a submitted CSP and has required a response prior to opening for in-person instruction, the LHD must notify the State Safe Schools for All Team.
- The school may reopen on eighth business day after submitting the revisions if the LHD and the State Safe Schools for All Team do not provide additional feedback.
- As noted above, schools serving grades K-6 may not reopen for in-person instruction in jurisdictions with CR above 25 cases per 100,000 population per day.

| Table 1. School reopening actions for in-person instruction, by Tier | | | |
|--|--|--|---|
| Yellow CR <1.0* TP <2% | Orange CR 1-3.9* TP 2-4.9% | Red CR 4-7* TP 5-8% | Purple CR >7* TP >8% |
| - CSP posted publicly for K-12 th grades 5 days prior to in-person instruction. | - CSP posted publicly for K-12 th grades 5 days prior to in-person instruction. | - CSP posted publicly for K-12 th grades 5 days prior to in-person instruction. - Must be in Red 5 days prior to reopening. | - <u>Already reopened</u> : CSP posted publicly by 02/01/21. - <u>Not previously open</u> : - CSP posted publicly for K-6, and submitted concurrently to LHD and State Safe Schools for All Team. - 7 business days for review. - 7 th -12 th grade reopening not permitted if CR>7*. - K-6 th grade reopening not permitted if CR>25*, though CSP can be posted and submitted for review. - Note: Targeted in-person instruction may be offered pursuant to the Cohorting Guidance. |

*Adjusted case rate.

While not required, LEAs are strongly encouraged to post on their website, along with the CSP, the detailed plans describing how they will meet the requirements outlined in the CSP elements. This can provide transparency to school community members making decisions about participation in in-person learning.

The email address for submission of the CSP to the State Safe Schools for All Team is: K12csp@cdph.ca.gov.

Cohorting Guidance for Specialized Services

This updated guidance does not modify or supersede the applicability of the [Cohorting Guidance](#) to school settings. More information regarding the minimum health and safety guidelines that must be followed to provide in-person services and supervision to children and youth in cohorts is set forth in the Cohorting Guidance, which applies across multiple sectors serving youth, including childcare and schools that are not reopened for in-person instruction.

The stable groups described in the Cohorting Guidance, and described below in the Stable Group Guidance decreases opportunities for exposure to or transmission of the virus; reduces the numbers of exposed individuals if COVID-19

is introduced into the cohort; facilitates more efficient contact tracing in the event of a positive case; and allows for targeted testing and quarantine of a single cohort instead of potential schoolwide closures in the event of a positive case or cluster of cases.

The Cohorting Guidance provides a way for schools not yet permitted to reopen under state and local public health directives or that have not yet reopened even though permitted to reopen to provide in-person supervision, instruction, targeted support services, and facilitation of distance learning for some students, especially high-need student groups and students who may not be able to benefit fully from distance learning offerings.

Existing state law requires public schools to provide in-person instruction to the greatest extent possible (Education Code section 45304(b)). State law further requires that distance learning ensure access to connectivity and devices that allow students to participate in the educational program and complete assigned work. In addition, state law requires that students with disabilities and English learners receive educational and related services to which they are entitled under the law, among other requirements (Education Code section 45303(b) (1), (4) & (5)). The Cohorting Guidance therefore provides an important avenue for schools that have not yet reopened under this guidance to provide supervision, instruction and support to small cohorts of students to ensure students receive necessary services even while students are generally participating in distance learning.

ADDITIONAL REOPENING CONSIDERATIONS

Availability of Distance Learning for Students Who Request It. Schools should continue to offer distance learning for students who request it.

Thoughtful, Phased Implementation. K-12 school sites should employ a phased-in model as a part of their reopening plan. Phased reopening plans for in-person instruction may include, but are not limited to:

- Shifting from a full distance learning model to hybrid.
- Gradually allowing for specified grades and/or a percentage of each grade to resume in-person learning, beginning with the youngest and most disproportionately impacted students.
- Allowing for a gradual number of students, at a specified capacity, per grade or school site.

If a school with a phased-in model has opened for in-person instruction, and the county changes to the Purple Tier or to a CR>25, the school may continue the phased reopening.

Staff Access to Campus if Not Reopened for In-Person Instruction. Teachers, school and support staff, and administrators may return to work physically without students on site while counties are not open for in-person instruction, provided that those on site follow the school's COVID-19 Safety Plan consistent with Cal/OSHA regulations.

Boarding Schools. Residential components of boarding schools are to remain closed (with the exception of residential components of boarding schools that are currently operating with the permission of local health authorities, and those serving wards or dependents of the juvenile courts) regardless of the Tier status of their county until further guidance is issued. The non-residential components of boarding schools (e.g., in-person instruction for day students) are governed by the same guidelines as other K-12 schools.

School Reopening Guidance

All guidance, as schools plan and prepare to resume in-person instruction, should be implemented as outlined in the In-Person School Reopening section, including the development of a CSP.

LAYERS OF SAFETY: INFECTION MITIGATION STRATEGIES

A key goal for safe schools is to reduce or eliminate in-school transmission. A helpful conceptual framing as schools plan for and implement safety measures for in-person instruction, is the layering of mitigation strategies. Each strategy (face coverings, stable groups, distancing, etc.) decreases the risk of in-school transmission; but no one layer is 100% effective. It is the combination of layers that are most effective and have been shown to decrease transmissions.

As schools plan for reopening for in-person instruction and as they continue to work on operations once open, it may be helpful to understand the mitigation strategies with stronger evidence supporting their use. We have ordered the list below such that the interventions known at this time to be more effective in reducing the risk of transmission appear before the ones that are helpful but may have a potentially smaller effect or have less evidence of efficacy. Of note, though scientific comparative assessments are limited, the top three items are likely of similar importance:

1. Face coverings.
2. Stable groups.
3. Physical distancing.
4. Adequate ventilation.
5. Hand hygiene.

6. Symptom and close contact exposure screening, with exclusion from school for staff or students with symptoms or with confirmed close contact.
7. Surveillance or screening testing.

Frequent disinfection, which was thought at the beginning of the pandemic to be a key safety component, can pose a health risk to children and students due to the chemicals used and has proven to have limited to no impact on COVID-19 transmission. Disinfection with specified products (see [Cleaning and Disinfection section](#)), is recommended for schools after a case has been identified in the school, in the spaces where the case spent a large proportion of their time (e.g., classroom, or administrator's office if an administrator). Please see [Cleaning and Disinfection section](#) for additional details.

Of note, adults (>18 years old) appear to be more infectious overall than children, making staff-to-staff transmission an important focus for safety efforts. A specific situation that has resulted in exposure and transmission among staff in multiple schools is eating and drinking indoors without being physically distant (for instance, in break rooms or common areas). Specific messaging and support to staff to prevent this scenario are strongly recommended.

The following sections outline specific actions school sites should take to keep students and staff safe.

GENERAL MEASURES

Establish and continue communication with local and state authorities to determine current disease levels and control measures in your community. For example:

- Consult with your LHO, or designated public health staff, who are best positioned to monitor and provide advice on local conditions. A directory can be found [here](#).
- Collaborate with other schools and school partners in your region, including the county office of education.
- Access State Technical Assistance resources available for schools and for LHDs to support safe and successful in-person instruction, available on the [Safe Schools for All Hub](#).
- Regularly review updated guidance from state agencies, including [CDPH](#) and [California Department of Education](#).

Per Cal/OSHA requirements noted above, establish a written CPP at every facility, perform a comprehensive risk assessment of all work areas and work tasks, and designate a person at each school to implement the plan.

FACE COVERINGS

Face coverings must be used in accordance with [CDPH guidelines](#) unless a person is exempt as explained in the guidelines.

- Information contained in the [CDPH Guidance for the Use of Face Coverings](#) should be provided to staff and families of students. The face covering guidance applies to all settings, including schools. The guidance discusses the circumstances in which face coverings must be worn and the exemptions, as well as any policies, work rules, and practices employers have adopted to ensure the use of face coverings.
- Teach and reinforce use of [face coverings](#), or in limited instances, [face shields with drapes](#).
- Students and staff should be frequently reminded not to touch the face covering and to [wash their hands](#) frequently.
- Information should be provided to all staff and families in the school community on [proper use, removal, and washing of cloth face coverings](#).
- Training should also include policies on how people who are exempted from wearing a face covering will be addressed.
- **Students in all grade levels K-12 are required to wear face coverings at all times, while at school, unless [exempted](#).**
 - A cloth face covering or face shield should be removed for meals, snacks, naptime, or when it needs to be replaced. When a cloth face covering is temporarily removed, it should be placed in a clean, safe area, clearly marked with the student's name and date, until it needs to be put on again.
- Participants in youth and adult sports should wear face coverings when participating in the activity, even with heavy exertion as tolerated, both indoors and outdoors.
- The face covering guidance recognizes that there are some people who cannot wear a face covering for a number of different reasons. People are exempted from the requirement if they are under age 2, have a medical or mental health condition or disability that would impede them from properly wearing or handling a face covering, those with a communication disability, or when it would inhibit communication with a person who is hearing impaired. Those with communication disabilities or caregivers of those with communication disabilities can consider wearing a clear mask or cloth mask with a clear panel when appropriate.
- Persons exempted from wearing a face covering due to a medical condition, as confirmed by school district health team and therapists, must wear a non-restrictive alternative, such as a face shield with a drape on the bottom edge, as long as their condition permits it.

- Schools must develop protocols to provide a face covering to students who inadvertently fail to bring a face covering to school to prevent unnecessary exclusions.
- Schools should offer alternative educational opportunities for students who are excluded from campus because they will not wear a face covering.
- In order to comply with this guidance, schools must exclude students from campus if they are not exempt from wearing a face covering under [CDPH guidelines](#) and refuse to wear one provided by the school.
- Employers must provide and ensure staff use face coverings and all other required personal protective equipment in accordance with CDPH guidelines.
- The California Governor's Office of Emergency Services (CalOES) and CDPH are and will be working to support procurement and distribution of face coverings and needed personal protective equipment to schools. Additional information can be found [here](#).
- The Department of General Services negotiated statewide master contracts, which LEAs may leverage to reduce costs and secure supply chains. Additional information can be found [here](#).
- Face covering policies apply on school buses and any vehicle affiliated with the LEA used to transport students, staff, or teachers to and/or from a school site.
- Classrooms, school buses, and shared school office spaces used by persons who cannot tolerate face coverings are less safe for others who share that environment. Schools may want to consider notifying others who share spaces with unmasked or sub-optimally masked individuals about the environment. Also consider employing several additional mitigation strategies (or fortifying existing mitigation strategies) to optimize safety. These may include increasing the frequency of asymptomatic tests offered to unmasked or sub-optimally masked individuals, employing longer social distances, installing clear physical barriers, reducing duration of time in shared environments, and opting for either outdoor or highly-ventilated indoor educational spaces, as possible.

Staff

- All staff must use face coverings in accordance with [CDPH guidelines](#) unless Cal/OSHA standards require respiratory protection.
- For staff who come into routine contact with others, CDPH recommends the use of disposable 3-ply surgical masks, which are more effective than cloth face coverings.

- In limited situations where a face covering cannot be used for pedagogical or developmental reasons, (e.g., communicating or assisting young children or those with special needs) a face shield with a drape (per [CDPH guidelines](#)) can be used instead of a face covering while in the classroom as long as the wearer maintains physical distance from others. Staff must return to wearing a face covering outside of the classroom.
- Workers or other persons handling or serving food must use gloves in addition to face coverings.
- Employers should consider where disposable glove use may be helpful to supplement frequent handwashing or use of hand sanitizer; examples are for workers who are screening others for symptoms or handling commonly touched items.

STABLE GROUP GUIDANCE CONSIDERATIONS BY GRADE LEVEL

Stable groups provide a key mitigation layer in schools. A stable group is a group with fixed membership that stays together without mixing with any other groups for any activities.

Guidance from other agencies, including the federal Centers for Disease Control and Prevention (CDC), sometimes refers to them as “cohorts”¹ or “pods.”

Implementing stable groups of students and staff reduces the numbers of exposed individuals if COVID-19 is introduced into the group, decreases opportunities for exposure to or transmission of the virus; facilitates more efficient contact tracing in the event of a positive case; and allows for targeted testing and quarantine of a small group instead of potential schoolwide closures in the event of a positive case or cluster of cases.

How can an elementary school create stable groups?

- Students can be placed into stable groups that stay together all day with their core teacher (and any aide or student teacher who is present). If there are counselors or teachers of electives, they should ideally be assigned to only one group or conduct their classes / counseling virtually.

¹ The CDC’s use of the term is different from the use of “cohort” within California’s guidance. “Cohort” is specifically defined in the Cohort Guidance as a group no larger than 16 individuals. To avoid any confusion, this guidance uses “stable group” instead of “cohort” for this concept.

- Students should eat lunch and go to recess with their group at times that are staggered and separated from other groups.
- There are different approaches to organizing stable groups. Students can be divided into smaller groups that attend school in person on a rotating schedule. Here are a few examples:
 - A group of students comes to school for in-person instruction on Monday and Tuesday. Another attends on Thursday and Friday.
 - On the alternating days, they learn remotely.
 - Some LEAs or schools have students attend school in-person during alternating weeks.
 - Other LEAs or schools have one group of students attend school in person in the morning and another group attend school in person in the afternoon.

These approaches create even smaller groups that stay together and do not mix with one another. Electives or counseling can be conducted virtually to limit the number of staff in direct contact with any given stable group.

How can a middle or high schools school create stable groups?

- Students can be placed into groups that remain together all day during in-person instruction. Middle or high school groups are often larger than elementary school groups. Because middle and high school curricula differ from elementary school curricula, teachers are not usually assigned to one stable group of students, creating an opportunity for mixing across stable groups or students. The following guidance provides examples of approaches to minimizing crossover of staff across stable groups of students.
- The CDC guidance notes that schools may keep a single group together in one classroom and have educators rotate between groups, or have smaller groups move together in staggered passing schedules to other rooms they need to use (e.g., science labs) without allowing students or staff to mix with others from distinctive groups.
- Teachers and supports staff from different content areas can work in teams that share students, preferably in a dedicated space, separate from others. For example: math, science, English, and history teachers might work as a team with a set group of students they share.
- When combined with block schedules that reduce the number of courses students take in any one day, the number of educators and students who interact can be minimized further.
- It is also possible to keep students in one stable group that stays together with one or two instructors who teach them directly part of the day and

support their instruction from others who teach them virtually during other parts of the day.

- Electives can be offered virtually or organized so that no group of students takes more than one elective in a term and the elective teachers do not work with more than one or two groups.
- Stable groups could switch schedules or even membership after a break at the quarter, trimester, or semester in ways that support students being able to take additional classes without substantial group mixing.
- The school year can be divided into even smaller time units – 4 to 8 weeks for example – in which students study one or two subjects intensively, completing all of the work they might normally have completed in a semester or a year. They stay in stable groups with only 1 or 2 teachers during this time. At the end of unit, they switch schedules and groups to take 1 or 2 other courses, and so on throughout the year.
- Additional examples of approaches to creating stable groups of students that limit the risk of transmission across large groups of students are available [here](#).

OTHER CONSIDERATIONS:

- **Schedule for Access and Inclusion:** The construction of stable groups can increase or decrease equity or segregation across the school campus, so consider how to support inclusion and access for all student populations as you organize students for learning.
- **Schedules as Tools for Physical Distancing:** To the extent possible, schools should think about how to reconfigure the use of bell schedules to streamline foot traffic and maintain practicable physical distancing during passing times and at the beginning and end of the school day. Create staggered passing times when students must move between rooms minimize congregated movement through hallways as much as is practicable.
- **Restructure Electives:** Elective teachers who move in and out of stable groups can become points of exposure for themselves and the students they work with. Some models have made elective teachers part of middle and high school stable groups, while others have used them only for remote instruction. Other options include ensuring elective teachers maintain longer distance from students (e.g., 12 feet).

IMPLEMENTING DISTANCING INSIDE AND OUTSIDE THE CLASSROOM

Arrival and Departure

- Maximize space between students and between students and the driver on school buses and open windows to the greatest extent practicable. Two windows on a bus should be opened fully at a minimum.
- Minimize contact at school between students, staff, families and the community at the beginning and end of the school day. Prioritize minimizing contact between adults at all times.
- Stagger arrival and drop off-times and locations as consistently as practicable to minimize scheduling challenges for families.
- Designate routes for entry and exit, using as many entrances as feasible. Put in place other protocols to limit direct contact between people as much as practicable.
- Ensure each school bus is equipped with extra unused face coverings for students who may have inadvertently failed to bring one.

Classroom Space

- Maximize space between seating and desks. Distance teacher and other staff desks at least 6 feet away from student and other staff desks.

Figure 1. Classroom with adequate spacing between students

Distance student chairs at least 6 feet away from one another, except where 6 feet of distance is not possible after a good-faith effort has been made. Upon request by the local health department and/or State Safe Schools Team, the superintendent should be prepared to demonstrate that good-faith effort, including an effort to consider all outdoor/indoor space options and hybrid learning models. Please reference Figures 1 and 2 for examples of adequate and inadequate spacing. Under no circumstances should distance between student chairs be less than 4 feet. If 6 feet of distance is not possible, it is recommended to optimize ventilation and consider using other separation techniques such as

Figure 2. Classroom without adequate spacing between students

partitions between students or desks, or arranging desks in a way that minimizes face-to-face contact.

- Short-term exposures of less than 6 feet between students and staff are permitted (e.g., a teacher assisting a student one-on-one), but the duration should be minimized and masks must be worn.

- Consider redesigning activities for smaller groups and rearranging

furniture and play spaces to maintain separation.

- Staff should develop instructions for maximizing spacing and ways to minimize movement in both indoor and outdoor spaces that are easy for students to understand and are developmentally appropriate.
- Prioritize the use and maximization of outdoor space for activities where possible.
- Activities where there is increased likelihood for transmission from contaminated exhaled aerosols such as band and choir practice and performances are permitted outdoors only, provided that precautions such as physical distancing and use of face coverings are implemented to the maximum extent (see below in Non-classroom spaces).
- Consider using cleanable privacy boards or clear screens to increase and enforce separation between staff and students.

Non-Classroom Spaces

- Limit nonessential visitors, volunteers and activities involving other groups at the same time. School tours are considered a non-essential activity and increase the risk of in-school transmission.
- Limit communal activities. Alternatively, stagger use, properly space occupants and clean in between uses.
- Consider use of non-classroom space for instruction, including regular use of outdoor space, weather permitting. For example, consider part-day instruction outside.
- Minimize congregate movement through hallways as much as practicable. For example, establish more ways to enter and exit a campus, create staggered passing times when necessary or when students cannot stay in one room and use visual reminders on the floor

that students can follow to enable physical distancing while passing and waiting in line. In addition, schools can consider eliminating the use of lockers, which can become congregating areas.

- Serve meals outdoors or in classrooms instead of cafeterias or group dining rooms where practicable. Where cafeterias or group dining rooms must be used, keep students together in their stable groups, ensure physical distancing, hand hygiene before and after eating, and consider assigned seating. If indoor meal times are paired with recess or outdoor time, consider having half of a stable group of students eat while the other half is outdoors and then switch. Serve individually plated or bagged meals. Avoid sharing of foods and utensils and buffet or family-style meals.
- Consider holding recess activities in separated areas designated by group.
- School athletic activities and sports should follow the [CDPH Outdoor and Indoor Youth and Adult Recreational Guidance](#). Note that risk of infection transmission increases for indoor activities; indoor sports are higher risk than outdoor sports due to reduced ventilation. And transmission risk increases with greater exertion levels; greater exertion increases the rate of breathing and the quantity of air that is inhaled and exhaled with every breath.
- Outdoor singing and band practice are permitted, provided that precautions such as physical distancing and mask wearing are implemented to the maximum extent possible. Playing of wind instruments (any instrument played by the mouth, such as a trumpet or clarinet) is strongly discouraged. School officials, staff, parents, and students should be aware of the increased likelihood for transmission from exhaled aerosols during singing and band practice, and physical distancing beyond 6 feet is strongly recommended for any of these activities.

VENTILATION

- Ensure sufficient ventilation in all school classrooms and shared workspaces per American Society of Heating, Refrigerating, and Air-Conditioning Engineers (ASHRAE) [guidance](#) on ventilation.
 - Contact a mechanical engineer, heating, ventilation, and air conditioning (HVAC) design professional, or mechanical contractor in order to evaluate your ventilation system in regards to the ASHRAE guidance.
 - If opening windows poses a safety or health risk (e.g., by allowing pollen in or exacerbating asthma symptoms) to persons in the

- facility, consider alternatives. For example, maximize central air filtration for HVAC systems by using filters with a minimum efficiency reporting value (MERV) of at least 13.
- Consider installing portable high-efficiency air cleaners, upgrading the building's air filters to the highest efficiency possible, and making other modifications to increase the quantity of outside air and ventilation in classrooms, offices and other spaces.
 - If not able to properly ventilate indoor instructional spaces, outdoor instruction is preferred (use caution in poor air quality conditions).
- Ventilation considerations are also important on school buses; use open windows as much as possible to improve airflow.
 - Specific practices to avoid:
 - Classrooms or buses with no ventilation.
 - Classrooms or buses with increased airflow across occupants (e.g., air conditioners or fans blowing into the classroom or overhead fans creating air currents across occupants).

PROMOTE HEALTHY HAND HYGIENE PRACTICES

- Teach and reinforce [washing hands](#), avoiding [contact with one's eyes, nose, and mouth](#), and [covering coughs and sneezes](#) among students and staff.
 - Teach students and remind staff to use tissue to wipe their nose and to cough/sneeze into a tissue or their elbow.
 - Students and staff should wash their hands frequently throughout the day, including before and after eating; after coughing or sneezing; after classes where they handle shared items, such as outside recreation, art, or shop; and before and after using the restroom.
 - Students and staff should wash their hands for 20 seconds with soap, rubbing thoroughly after application. Soap products marketed as "antimicrobial" are not necessary or recommended.
 - Staff should model and practice handwashing. For example, use bathroom time in lower grade levels as an opportunity to reinforce healthy habits and monitor proper handwashing.
 - Students and staff should use fragrance-free hand sanitizer when handwashing is not practicable. Sanitizer must be rubbed into

- hands until completely dry. Note: frequent handwashing is more effective than the use of hand sanitizers.
- Ethyl alcohol-based hand sanitizers are preferred and should be used when there is the potential of unsupervised use by children.
- Isopropyl alcohol-based hand sanitizers are more toxic when ingested or absorbed into skin.
- Do not use hand sanitizers that may contain methanol which can be hazardous when ingested or absorbed.
 - Children under age 9 should only use hand sanitizer under adult supervision. Call Poison Control if consumed: 1-800-222-1222.
- Consider portable handwashing stations throughout the school site and near classrooms to minimize movement and congregating in bathrooms to the extent practicable.
- Develop routines enabling students and staff to regularly wash their hands at staggered intervals.
- Ensure adequate supplies to support healthy hygiene behaviors, including soap, tissues, no-touch trashcans, face coverings, and hand sanitizers with at least 60 percent ethyl alcohol for staff and children who can safely use hand sanitizer.

CLEANING AND DISINFECTION

The section below provides recommendations for cleaning and disinfection. “Cleaning” involves water and soap or a detergent, does not use disinfecting agents, and significantly decreases germs on surfaces and decreases infectious risks. “Disinfection” kills germs on surfaces using specific agents (see below for those approved for use). If a case has been identified, the spaces where the case spent a large proportion of their time (e.g., classroom, or administrator’s office if an administrator) should be disinfected. Frequent disinfection can pose a health risk to children and students due to the strong chemicals often used and so is not recommended in the school setting unless a case has been identified.

- Staff should clean frequently-touched surfaces at school and on school buses daily.
- Buses should be thoroughly cleaned daily and after transporting any individual who is exhibiting symptoms of COVID-19. Drivers should be provided cleaning materials, including but not limited to wipes and disposable gloves, to support cleaning of frequently touched surfaces during the day.
- Frequently touched surfaces in the school include, but are not limited to:
 - Sink handles.

- Shared tables, desks, or chairs.
 - If a school has morning and afternoon stable groups, the desks and tables are considered shared and should be cleaned before the next group arrives.
 - Desks or chairs do not need daily cleaning if only used by one individual during the day.
- Door handles.
- Shared technology and supplies.
- If used, outdoor playgrounds/natural play areas only need routine maintenance. Make sure that children wash or sanitize their hands before and after using these spaces. When hand hygiene is emphasized, cleaning of outdoor structures play is not required between cohorts.
- When choosing disinfection products after an in-school COVID-19 case has been identified (see “What to do if there is a case of COVID-19 in a School”), use those approved for use against COVID-19 on the [Environmental Protection Agency \(EPA\)- approved list “N”](#) and follow product instructions.
 - To [reduce the risk of asthma](#) and other health effects related to disinfection, programs should select disinfectant products on list N with asthma-safer ingredients (hydrogen peroxide, citric acid or lactic acid) as recommended by the US EPA Design for Environment program.
 - Avoid products that contain peroxyacetic (peracetic) acid, sodium hypochlorite (bleach) or quaternary ammonium compounds, which can cause asthmatic attacks.
 - Follow label directions for appropriate dilution rates and contact times. Provide workers training on the chemical hazards, manufacturer’s directions, Cal/OSHA requirements for safe use, and as applicable and as required by the Healthy Schools Act.
 - Custodial staff and any other workers who clean and disinfect the school site must be equipped with proper personal protective equipment, including gloves, eye protection, respiratory protection, and other appropriate protective equipment as required by the product instructions. All products must be kept out of the reach of children and stored in a space with restricted access.
 - Establish a cleaning schedule in order to avoid both under- and over-use of cleaning products.
- Ensure safe and correct application of disinfectant and keep products away from students.

- Ensure proper ventilation during cleaning and disinfecting. Introduce fresh outdoor air as much as possible for example by opening windows where practicable. When disinfecting, air out the space before students arrive; disinfection should be done when students are not present.
- [Take steps](#) to ensure that all water systems and features (for example, drinking fountains and decorative fountains) are safe to use after a prolonged facility shutdown to minimize the risk of [Legionnaires' disease](#) and other diseases associated with water.

CHECK FOR SIGNS, SYMPTOMS AND EXPOSURES

- Actively encourage staff and students who are sick or who have recently had [close contact](#) with a person with COVID-19 to stay home. Develop policies that encourage sick staff and students to stay at home without fear of reprisal, and ensure staff, students and students' families are aware of these policies.
- Implement symptom and exposure screening for all staff and students at home each day before leaving for school.
- Students or staff exhibiting symptoms of COVID-19 at school (fever of 100.4 degrees or higher, cough, difficulty breathing, or other [COVID-19 symptoms](#)) must be immediately isolated in a private area until they can leave school or be picked up by a parent or guardian. Ill students and staff should be recommended to be tested for COVID-19 as soon as possible.
- Policies should not penalize students for missing class.

Symptom and Exposure Screening

Daily screening for COVID-19 symptoms and for exposure to someone with COVID-19 prior to leaving for school can prevent some people with COVID-19 from coming to school while infectious, thus preventing in-school transmission. Screening does not prevent asymptomatic cases from being at school and spreading SARS-CoV2, the virus that causes COVID-19.

CDPH recommends that:

1. Parents be provided with the list of [COVID-19 symptoms](#) and instructed to keep their child at home if the child is feeling ill or has symptoms of COVID-19, even if symptoms are very mild, and to get their ill child tested for SARS-CoV2.
2. Staff members be provided with the list of COVID-19 symptoms and be instructed to call in sick and stay home if having symptoms of COVID-19 and to get tested for SARS-CoV2.

Note: If a student or staff member has chronic allergic or asthmatic

symptoms (e.g., cough or runny nose), then a change in their symptoms from baseline would be considered a positive symptom.

Implementation of home symptom and exposure screening

- There are several implementation options, each with benefits and challenges. Implementing a daily reminder system for home screening, such as a text message or through an online screening application, can support families and staff to review the symptom list each day before leaving for school and confirm that they do not have symptoms of COVID-19 and have not had close contact with a known case. This is likely the easiest and most effective approach, but families or staff may not all have technology access to support this. For those who do not, a list of screening questions on paper can be provided for daily review at home. Schools do not need to monitor compliance with home screening.

Symptoms at School

- Identify an isolation room or area to separate anyone who exhibits 1 or more symptoms of COVID-19 while at school.
- Staff and students should self-monitor throughout the day for signs of illness; staff should observe students for signs or symptoms of illness to support students who are less able to self-monitor or less likely to self-report.
- Any students or staff exhibiting 1 or more symptoms should be required to wait in the previously identified isolation area until they can be transported home or to a healthcare facility, as soon as practicable.
- If a student is exhibiting 1 or more symptoms of COVID-19, staff should communicate with the parent/caregiver and refer to the student's health history form and/or emergency card.
- Unless the LHD recommends otherwise, there is no need to exclude asymptomatic contacts (students or staff) of the symptomatic individual from school until test results for the symptomatic individual are known.

Return to school after exclusion for symptoms at home or in school:

- Ensure that students, including students with disabilities, have access to instruction when out of class, as required by federal and state law.
- Testing of symptomatic students and staff can be conducted through local health care delivery systems or other testing resources, as fits the context of the local health jurisdiction. Advise staff members and students with symptoms of COVID-19 infection not to return for in-person instruction until they have met [CDPH criteria](#) to discontinue home isolation for those with symptoms:

- At least 24 hours have passed since resolution of fever without the use of fever-reducing medications; and
- Other symptoms have improved; and
- They have a negative test for SARS-CoV-2, OR a healthcare provider has provided documentation that the symptoms are typical of their underlying chronic condition (e.g., allergies or asthma) OR a healthcare provider has confirmed an alternative named diagnosis (e.g., Streptococcal pharyngitis, Coxsackie virus), OR at least 10 days have passed since symptom onset.

STAFF-TO-STAFF INTERACTIONS

- Ensuring staff maintain physical distancing of six feet from each other is critical to reducing transmission between adults.
- Ensure that all staff use face coverings in accordance with [CDPH guidelines](#) and Cal/OSHA standards.
- Support staff who are at higher risk for severe illness or who cannot safely distance from household contacts at higher risk, by providing options such as telework, where appropriate, or teaching in a distance learning context.
- Conduct all staff meetings, professional development training and education, and other activities involving staff with physical distancing measures in place, outside, or virtually, where physical distancing is a challenge.
- Minimize the use of and congregation of adults in staff rooms, break rooms, and other settings. Try to provide space outside whenever possible.

LIMIT SHARING

- Consider suspending or modifying use of site resources that necessitate sharing or touching items. For example, consider suspending use of drinking fountains and instead encourage the use of reusable water bottles.
- Limit use and sharing of objects and equipment, items such as electronic devices, clothing, toys, games, and art supplies to the extent practicable, or limit use of supplies and equipment to one group of children at a time and clean between uses.
 - Cleaning shared objects between uses (for example with microfiber cloths or baby wipes) can help to physically remove germs on surfaces.
 - Ensure adequate supplies to minimize sharing of high-touch materials.

- Keep each student's individual belongings separated and in individually labeled storage containers, cubbies or areas.

TRAIN ALL STAFF AND EDUCATE FAMILIES

- Train all staff and provide educational materials to families in the following safety actions:
 - [Proper use, removal, and washing of face coverings](#).
 - Physical distancing guidelines and their importance.
 - Symptoms screening practices.
 - COVID-19 specific [symptom](#) identification.
 - How COVID-19 is spread.
 - Enhanced sanitation practices.
 - The importance of staff and students not coming to work they have symptoms, or if they or someone they live with or they have had close contact with has been diagnosed with COVID-19.
 - For staff, COVID-19 specific [symptom](#) identification and when to seek medical attention.
 - The employer's plan and procedures to follow when staff or students become sick at school.
 - The employer's plan and procedures to protect staff from COVID-19 illness.

Consider conducting the training and education virtually, or, if in-person, outdoors, and ensure a minimum of six-foot distancing is maintained.

MAINTAIN HEALTHY OPERATIONS

- Monitor staff absenteeism and have a roster of trained back-up staff where available.
- Monitor symptoms among your students and staff on school site to help isolate people with symptoms as soon as possible.
- Designate a staff liaison or liaisons to be responsible for responding to COVID-19 concerns. Other staff should know who the liaisons are and how to contact them. The liaison should be trained to coordinate the documentation and tracking of possible exposures, in order to notify local health officials, staff and families in a prompt and responsible manner. This will support local health department contact tracing efforts.
- Maintain communication systems that allow staff and families to self-report symptoms and receive prompt notifications of exposures, exclusions, and closures, while maintaining confidentiality, as required by

FERPA and state law related to privacy of educational records. Additional guidance can be found [here](#).

- Consult with [CDPH K-12 School Testing Guidance](#) if routine testing is being considered by a LEA.
- Support students who are at higher risk for severe illness or who cannot safely distance from household contacts at higher risk, by providing options such as distance learning.

What to do if there is a Confirmed or Suspected Case of COVID-19 in a School

What measures should be taken when a student, teacher or staff member has symptoms, is a contact of someone infected, or is diagnosed with COVID-19?

| | Student or Staff with: | Action | Communication with school community |
|----|--|--|--|
| 1. | COVID-19 symptoms (e.g., fever, cough, loss of taste or smell, difficulty breathing) Symptom screening: per CDC Symptom of COVID-19 . | <ul style="list-style-type: none"> • Send home if at school. • Recommend testing (If positive, see #3, if negative, see #4). • School/classroom remain open. | <ul style="list-style-type: none"> • No action needed. |
| 2. | Close contact (†) with a confirmed COVID-19 case. | <ul style="list-style-type: none"> • Send home if at school. • Exclude from school for 10 days from last exposure, per CDPH quarantine recommendations. • Recommend testing 5-7 days from last exposure (but will not shorten 10-day exclusion if negative). • School/classroom remain open. | <ul style="list-style-type: none"> • Consider school community notification of a known exposure. No action needed if exposure did not happen in school setting. |
| 3. | Confirmed COVID-19 case infection. | <ul style="list-style-type: none"> • Notify the LHD. • Exclude from school for 10 days from symptom onset date or, if asymptomatic, for 10 days from specimen collection date. • Identify school contacts (†), inform the LHD of identified contacts, and exclude | <ul style="list-style-type: none"> • School community notification of a known case. • Notification of persons with |

| | | | |
|----|---|--|---|
| | | <p>contacts (possibly the entire stable group (††)) from school for 10 days after the last date the case was present at school while infectious.</p> <ul style="list-style-type: none"> • Recommend testing asymptomatic contacts 5-7 days from last exposure and immediate testing of symptomatic contacts (negative test results will not shorten 10-day exclusion). • Disinfection and cleaning of classroom and primary spaces where case spent significant time. • School remains open. | <p>potential exposure if case was present in school while infectious</p> |
| 4. | <p>Symptomatic person tests negative or a healthcare provider has provided documentation that the symptoms are typical of their underlying chronic condition.</p> | <ul style="list-style-type: none"> • May return to school after 24 hours have passed without fever and symptoms have started improving. • School/classroom remain open. | <ul style="list-style-type: none"> • Consider school community notification if prior awareness of testing. |

(†) A contact is defined as a person who is within 6 feet from a case for more than 15 minutes cumulative within a 24-hour period, regardless of face coverings. In some school situations, it may be difficult to determine whether individuals have met this criterion and an entire stable group, classroom, or other group may need to be considered exposed, particularly if people have spent time together indoors.

(††) See Stable Group Guidance for definition of a stable group. In some situations, (e.g., when seating charts are used, face covering is well adhered to, and teachers or staff have observed students adequately throughout the day), contact tracing and investigation may be able to determine more precisely whether each stable group member has been exposed. In this situation, those who were not close contacts could continue with in-person instruction.

CONFIRMED COVID-19 CASE

Although the LHD may know of a confirmed or probable case of COVID-19 in a student or staff member before the school does, it is possible that the school may be made aware of a case before the LHD via a parent or staff member report.

The following are the interim COVID-19 case definitions from the Council of State and Territorial Epidemiologists'.

Confirmed case: Meets confirmatory laboratory evidence (detection of SARS-CoV-2 RNA in a clinical or autopsy specimen using a molecular amplification test).

Probable case: Meets clinical criteria AND epidemiologic linkage(‡) with no confirmatory lab testing performed for SARS-CoV-2; OR meets presumptive laboratory evidence (detection of SARS-CoV-2 by antigen test in a respiratory specimen); OR meets vital records criteria with no confirmatory laboratory evidence for SARS-CoV-2.

(‡) Epidemiologically-linked cases include persons with close contact with a confirmed or probable case of COVID-19 disease; OR a member of a risk stable group as defined by public health authorities during an outbreak. This includes persons with identifiable connections to each other such as sharing a defined physical space e.g., in an office, facility section or gathering, indicating a higher likelihood of linked spread of disease than sporadic community incidence.

Local Health Department Actions

1. Interview the case to identify the infectious period and whether case was infections while at school; identify household and community close contacts, particularly any close contacts at school.
2. It may be necessary to consider the entire class or members of the case's stable group exposed, as it can be challenging to determine who may have had contact with the case within 6 feet for at least 15 cumulative minutes in a 24-hour period. In some situations, case investigations may be able to determine individual members of a stable group are close contacts, and allow those who are not identified as close contacts to continue in-person instruction.
3. Notify the school COVID-19 coordinator or point person at the school that a case of COVID-19 in a student or staff member has been reported and provide guidance to identify and generate a line list of close contacts at the school.
4. Notify all close contacts at the school and instruct them to follow [CDPH COVID-19 Quarantine Guidance](#). (or follow LHO orders, if relevant and/or more stringent).
5. Recommend that all close contacts be tested; symptomatic contacts should be prioritized for immediate testing, and asymptomatic contacts should be recommended to be tested 5-7 days from last exposure.
6. Contacts who test negative must still complete the required quarantine as defined in the [CDPH guidance](#).
7. Contacts who test positive are required to isolate until at least 10 days

have passed since symptom onset; and at least 24 hours have passed since resolution of fever without the use of fever-reducing medications; and other symptoms have improved. If asymptomatic, cases should be isolated for 10 days after the specimen collection date of their positive test.

8. Investigate COVID-19 cases in school students and staff to determine if in-school transmission likely occurred and whether any school-related factors could have contributed to risk of infection. Assist schools to update protocols as needed to prevent additional cases.

School Actions

1. Schools must adhere to required reporting requirements and notify, as indicated, the LHD of any newly reported case of COVID-19 in a student or staff member if the LHD has not yet contacted them about the case.
2. If the case is present at school at the time the school is notified, the case must go home and be excluded from school for at least 10 days from symptom onset date or, if asymptomatic, 10 days from the date the specimen was collected for the positive test.
3. Send a notice, developed in collaboration with the LHD, to parents and staff to inform them that a case of COVID-19 in a student or staff member has been reported and that the school will work with the LHD to notify exposed people. (see sample notification #1 in Appendix 2).
4. Arrange for cleaning and disinfection of the classroom and primary spaces where case spent significant time (see Cleaning and Disinfection above for recommendations). This does not need to be done until students and staff in the area have left for the day.
5. Implement online/distance learning for student cases if they are well enough to participate.

School closure determinations should be made in consultation with the LHO according to the section “School Closure Determinations.” A school with confirmed cases and even a small cluster of COVID-19 cases can remain open for in-person education as long as contact tracing identifies all school contacts for exclusion and testing in a timely manner, any small cluster is investigated and controlled rapidly, and the LHO agrees that the school can remain open.

MEASURES FOR WHEN A CLUSTER OR OUTBREAK IS BEING INVESTIGATED AT A SCHOOL

When either a school or LHD is aware that an [outbreak](#) may be underway, the LHD should investigate, in collaboration with the school, to determine whether

these cases had a common exposure at school (e.g., a common class or staff member, bus ride, or other common exposures outside of school).

CDPH defines a school [outbreak](#) as 3 or more confirmed or probable cases of staff or students occurring within a 14-day period who are epidemiologically-linked in the school, are from different households and are not contacts of each other in any other investigation cases (e.g., transmission likely occurred in the school setting).

The objectives of a school outbreak investigation are to identify and isolate all cases and to identify, quarantine, and test contacts to prevent further transmission of COVID-19 at the school. In addition, the investigation will attempt to ascertain whether the cases had a common exposure at school (e.g., a common class or teacher, bus ride, or other common exposures in the school setting). The investigation may also reveal common exposures outside of the school setting.

As noted above, an outbreak investigation is also an opportunity to understand the circumstances that may have allowed for transmission in the school setting. It is recommended that investigations determine whether there is adherence to key mitigation strategies to prevent school transmission. If gaps are identified, schools should take steps to strengthen strategies to prevent future outbreaks.

Local Health Department Actions

1. Review interviews (or re-interview as needed) of clustered cases to identify common exposures and determine whether the cluster suggests an outbreak with transmission at the school. If data suggest an outbreak, then notify the school about starting an investigation.
2. Provide the school with guidance on identifying and creating a line list of all school cases and contacts, including illness onset date, symptoms, date tested, test results, etc. (see sample data collection notification in Appendix 2).
3. Consult with CDPH as needed for technical assistance, testing, and other resources.
4. Form an outbreak investigation team with a lead investigator and including one or more school staff members to assist with the investigation.
5. Identify all potential exposures and close contacts and implement testing of contacts, prioritizing symptomatic contacts for testing.
6. Testing may be recommended for those who were not identified as close contacts but could potentially have been exposed; the fastest pathway to get test results rapidly should be used.
7. All symptomatic contacts should be considered probable cases and be

interviewed to identify prioritized close contacts and exposures while awaiting their test results.

8. Implement isolation of all cases and symptomatic contacts and quarantine of all asymptomatic contacts of confirmed and probable cases.
9. Investigate to determine if in-school transmission likely occurred and whether any school-related factors could have contributed to risk of transmission. Assist schools to update and strengthen protocols as needed to prevent additional cases.
10. Determine, in collaboration with the school, whether the school meets closure criteria. See School Closure Determinations (page 36).
11. Determine, in collaboration with the school, when the school should be closed for 14 days even if the conditions outlined in School Closure Determinations below have not been reached. This may be when: 1) the investigation shows that cases or symptomatic students or staff members continue to be identified and school-based transmission of SARS-CoV2 is likely ongoing despite implementation of prevention and control measures; or 2) other local epidemiologic data support school closure.

School Actions

1. Notify parents/guardians and school staff of a cluster/outbreak investigation related to the school and encourage them to follow public health recommendations (see sample notification #2 in Appendix 3).
2. Identify, as part of the CSP, one or more school staff member who can liaise with the LHD regarding the cluster/outbreak investigation by confirming which classes and stable groups included confirmed cases or symptomatic students and staff members, and if recent events or gatherings involved any cases or symptomatic persons.
3. Identify absenteeism among those in affected classes or stable groups, and coordinate with the LHD to contact these absentees to screen for symptoms of COVID-19 if they were exposed to a case during the cases infectious period.
4. Coordinate with the LHD to share a line list of cases and contacts with dates present at or absent from school.
5. Arrange for cleaning and disinfection of classrooms or other areas where cases or symptomatic students or staff members spend significant time.
6. Coordinate with the LHD on notifications to the school community, including specific notifications of stable groups or classrooms regarding their exclusion status and instructions.
7. Coordinate with the LHD on whether and when the school should be

closed and reopened.

8. Notify the school community if the school is to be closed for 14 days due to widespread and/or ongoing transmission of SARS-CoV2 at the school or in the general community, and repeat recommendations for prevention and control measures (see sample notification #3 in Appendix 2).
9. Implement online/distance teaching and learning during school closure.
10. Arrange for cleaning and disinfection of entire school before reopening in the case of closure.

School Closure Determinations

What are the criteria for closing a school to in-person learning?

Individual school closure, in which all students and staff are not on campus, is recommended based on the number of cases and stable groups impacted, which suggest that active in-school transmission is occurring. Closure should be done in consultation with the LHO. Situations that may indicate the need for school closure:

- Within a 14-day period, an [outbreak](#) has occurred in 25% or more stable groups in the school.
- Within a 14-day period, at least three [outbreaks](#) have occurred in the school AND more than 5% of the school population is infected.
- The LHO may also determine school closure is warranted for other reasons, including results from public health investigation or other local epidemiological data.

Length of closure: 14 days, or according to a decision made in consultation with the LHO.

The State Safe Schools for All Technical Assistance teams (TA teams), comprised of experts across multiple state agencies, will be available to assist schools with disease investigation for those with outbreaks that cannot find resources to investigate the outbreaks. The TA teams will also be available to help schools that close in order to identify and address any remediable safety issues.

If a school is closed, when may it reopen?

Schools may typically reopen after 14 days and if the following have occurred:

- Cleaning and disinfection
- Public health investigation
- Consultation with the LHD

What are the criteria for closing a LEA?

A school district should close if 25% or more of schools in a district have closed due to COVID-19 within a 14-day period and in consultation with the LHD.

If a LEA is closed, when may it reopen?

LEAs may typically reopen after 14 days, in consultation with the LHD.

K-12 School Testing

OVERVIEW

Used in conjunction with other mitigation strategies, testing for SARS-CoV-2 provides an additional tool to support safe and successful K-12 in-person instruction. Testing can allow for early identification of cases and exclusion from school to prevent transmission. However, it should not be used as a stand-alone approach to prevent in-school transmission. A negative test provides information only for the moment in time when the sample is collected. Individuals can become infectious shortly after having a negative test, so it is important to maintain all other mitigation strategies even if a recent negative test has been documented.

There are several circumstances under which a student or staff member might undergo testing. Below, we outline these circumstances and considerations for testing implementation in K-12 schools.

DEFINITIONS

Symptomatic testing: This testing is used for individuals with symptoms of COVID-19, either at home or at school. In this situation, the school guidance requires that these individuals stay home and isolate in case they are infectious. The Guidance includes the possibility of return to school in the case of a negative test for SARS-CoV-2 and 24 hours after fever is resolved and symptoms are improving.

Response testing: This testing is used to identify positive individuals once a case has been identified in a given stable group. Response-based testing can be provided for symptomatic individuals or for asymptomatic individuals with known or suspected exposure to an individual infected with SARS-CoV-2.

Asymptomatic testing: This testing can be used for surveillance, usually at a cadence of every 2 weeks or less frequently, to understand whether schools have higher or lower rates of COVID19 rates than the community, to guide decisions about safety for schools and school administrators, and to inform LHDs about district level in-school rates. Asymptomatic testing can also be used for screening, usually at a higher cadence (weekly or twice weekly) than

surveillance testing, to identify asymptomatic or pre-symptomatic cases, in order to exclude cases that might otherwise contribute to in-school transmission. Screening testing is indicated for situations associated with higher risk (higher community transmission, individuals at higher risk of transmission (e.g., adults and high school students transmit more effectively than elementary aged students).

TESTING STRATEGY APPROACH

Asymptomatic testing considerations

The science regarding the extent to which asymptomatic testing will achieve the goal of safe and successful schools is still under development. Empirically, schools that have successfully implemented the core mitigation strategies outlined in the School Guidance are operating safely, with limited or no in-school transmission, under a range of asymptomatic testing approaches. The approaches range from no additional asymptomatic [testing](#), to testing a sample of staff and students [monthly](#), to testing all students and staff [every other week](#). Modeling studies show that masking alone and cohorting alone can decrease symptomatic infections more than weekly testing of students and school staff. Taken together, these data suggest that a range of potential testing approaches can be considered for implementation as part of a comprehensive safety strategy.

The state of California has put into place support for the testing cadences in Table 3, through supplemental testing supplies, shipment, laboratory capacity, enrollment and reporting technology, training, and assistance with insurance reimbursement.

The increased levels of testing in the higher Tiers in Table 3 reflect the higher likelihood that someone in the school community might be infected due to higher levels of circulating virus in the surrounding community. For the purposes of the testing cadence differences, the Deep Purple Tier begins at a CR of >14.

Table 3. Testing Cadences with Support from the State of California for K-12 schools

| | Yellow CR <1.0* TP <2% | Orange CR 1-3.9* TP 2-4.9% | Red CR 4-7* TP 5-8% | Purple CR >7-13.9* TP >8% | Deep Purple CR >14* |
|--------------|-------------------------------------|---|------------------------------------|--|------------------------------------|
| Staff | Symptomatic and response testing. | Symptomatic and response testing. | Symptomatic and response testing + | Symptomatic and response testing + | Symptomatic and response testing + |

| | | | | | |
|----------------------|-----------------------------------|-----------------------------------|--|--|---|
| | | | Every 2 weeks asymptomatic testing. | Every 2 weeks asymptomatic testing. | Weekly asymptomatic (PCR or twice weekly antigen testing)**. |
| Students K-12 | Symptomatic and response testing. | Symptomatic and response testing. | Symptomatic and response testing + Every 2 weeks asymptomatic testing. | Symptomatic and response testing + Every 2 weeks asymptomatic testing. | Symptomatic and response testing + Weekly asymptomatic (PCR or twice weekly antigen testing)**. |

TP = test positivity

* The case rates above are adjusted case rates.

** Weekly asymptomatic testing assumes the use of a PCR test. If antigen testing is used, testing should be at a twice weekly cadence.

Students or staff who have tested positive for active infection with SARS-CoV-2 virus within the last 90 days are exempt from asymptomatic testing.

Any school currently open is subject to the minimum testing requirement standards established by [Cal/OSHA](#). These standards include response testing for exposed cases and outbreak testing for everyone weekly until no longer considered an outbreak. Please refer to Cal/OSHA [guidance](#) for complete details.

Vaccines for K-12 Schools

CDPH strongly recommends that all persons eligible to receive COVID-19 vaccines receive them at the first opportunity. Currently, people under 16 are not eligible for the vaccine since trials for that group are still underway.

In addition to vaccines required for school entry, CDPH strongly recommends that all students and staff be immunized each autumn against influenza unless contraindicated by personal medical conditions, to help:

- Protect the school community.
- Reduce demands on health care facilities.

- Decrease illnesses that cannot be readily distinguished from COVID- 19 and would therefore trigger extensive measures from the school and public health authorities.

Because vaccine implementation for schools is rapidly evolving, we are providing a separate vaccine guidance document that will be available on the Safe Schools for All Hub [here](#).

SCHOOL EXPOSURE TO A CASE OF COVID-19 NOTIFICATION

K-12 SCHOOL NAME/LETTERHEAD

From School Principal (or Designee)

Date

Dear Parents/Guardians,

We would like to inform you that we have been notified about a confirmed case of COVID-19 (Coronavirus Disease 2019) in a member of our school community. The individual who tested positive (the “case”) was last on school premises on [DATE]. All school areas where the case spent time will be cleaned and disinfected before they are in use again.

Our school is working with the [LOCAL HEALTH DEPARTMENT] to follow up with the case and will reach out to all persons who are identified as having had close contact with the case to recommend home quarantine and COVID-19 testing. If you or your child are not contacted, it means that you or your child were not identified as exposed to the case.

Please remind your child to use their face covering, stay at least 6 feet from other people, and wash their hands often with soap and water for at least 20 seconds.

Symptoms of COVID-19 may appear 2-14 days after exposure to the virus and include:

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

Anyone with COVID-19 symptoms should be tested. However, many infected people do not develop symptoms, which is why it is recommended that exposed people be tested whether they have symptoms or not.

Ensuring the health and safety of our students, teachers, and staff members is of the utmost importance to us. If you have any questions or concerns, please contact [CONTACT NAME] at XXX-XXX-XXXX.

Sincerely,

COVID-19 SCHOOL OUTBREAK NOTIFICATION

TK-12 SCHOOL NAME/LETTERHEAD

From School Principal (or Designee)

Date

Dear Parents/Guardians, Teachers, and Staff Members,

We would like to inform you that we are working with the [LOCAL HEALTH DEPARTMENT] on their investigation of a COVID-19 outbreak in our school community. Our school is working with the [LOCAL HEALTH DEPARTMENT] to follow up with all cases and symptomatic contacts to identify all exposed persons and recommend home quarantine and testing. If you or your child are not contacted, it means that you or your child were not exposed to either a case or a symptomatic contact.

If you are a parent/guardian, please remind your child to use their face covering, stay at least 6 feet from other people, and wash their hands often with soap and water for at least 20 seconds.

Symptoms of COVID-19 may appear 2-14 days after exposure to the virus and include:

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

Anyone with COVID-19 symptoms should be tested. However, many infected people do not develop symptoms, which is why it is recommended that exposed people be tested whether they have symptoms or not.

Ensuring the health and safety of our students, teachers, and staff members is of the utmost importance to us. If you have any questions or concerns, please contact [CONTACT NAME] at XXX-XXX-XXXX.

Sincerely,

SCHOOL CLOSURE DUE TO COVID-19 NOTIFICATION

TK-12 SCHOOL NAME/LETTERHEAD

From School Principal (or Designee)

Date

Dear Parents/Guardians, Teachers, and Staff Members,

We are informing you that we are closing our school, starting on [DATE] due to the ongoing COVID-19 outbreak and likely continuing transmission at our school. In consultation with the [LOCAL HEALTH OFFICER], we have been advised that the school should be closed for 14 days to prevent further transmission of COVID-19 and to clean and disinfect the school before reopening on [DATE].

During school closure, the school will switch to online teaching to continue our classes; please see attached information sheet on how students can sign in to continue their schoolwork online. The [LOCAL HEALTH DEPARTMENT] will also continue to follow-up with cases and contacts during school closure to ensure isolation and quarantine and testing.

If upon school reopening, your child is feeling ill or having a fever or symptoms of COVID-19, even if symptoms are very minor, please do not send your child to school and consider getting your ill child tested for COVID-19. If your child is well without any symptoms, please remind your child before going back to school to use their face covering, stay at least 6 feet from other people, and wash their hands often with soap and water for at least 20 seconds. School staff should call in sick and stay home if having a fever or symptoms of COVID-19 and consider getting tested.

Symptoms of COVID-19 may appear 2-14 days after exposure to the virus and include:

- Fever or chills
- Cough
- Shortness of breath or difficulty breathing
- Fatigue
- Muscle or body aches
- Headache
- New loss of taste or smell
- Sore throat
- Congestion or runny nose
- Nausea or vomiting
- Diarrhea

Ensuring the health and safety of our students, teachers, and staff members is of the utmost importance to us. If you have any questions or concerns, please contact [CONTACT NAME] at XXX-XXX-XXXX.

Sincerely,

Appendix 3: Public Health Directive

REPORTING DETAILS OF POSITIVE CASES

Required COVID-19 Case Reporting By Schools

January 14, 2021

Following school closures that occurred in spring 2020 in response to the COVID-19 pandemic, the California Department of Public Health (“CDPH”) developed the “COVID-19 and Reopening In-Person Learning Framework for K-12 Schools in California, 2020-2021 School Year” (July 17, 2020) to support school communities as they decided when and how to implement in-person instruction for the 2020-2021 school year. Public and private K-12 schools throughout the state are currently in various stages of instruction including distance learning, in-person learning, and hybrid instruction based on local conditions.

New evidence and data about COVID-19 transmission coupled with the experiences of schools both nationally and internationally demonstrates that schools, particularly elementary schools, can operate in-person instruction safely with the correct safety protocols in place. Concurrently with this directive, CDPH issued updated, consolidated guidance for K-12 schools (including public, private, and charter) to support school re-openings and safe implementation of in-person instruction for students and staff.

Under current guidance, schools that have already reopened are permitted to continue offering in-person instruction, and additional schools are expected to reopen under the forthcoming K-12 school guidance. To be equipped to prevent and mitigate ongoing community COVID-19 transmission, a comprehensive and coordinated approach for the secure sharing of vital data and information regarding COVID-19 infections among school employees and students is necessary, especially in light of current epidemiological conditions.

The sharing of identified case information data with public health professionals is therefore necessary to ensure that state and local public health experts can respond to confirmed cases of COVID-19 who have been present at a school site, to track and understand the extent of disease transmission within the state, and to support communities with appropriate prevention strategies and support. Accordingly, to monitor and prevent the spread of COVID-19, it is necessary for CDPH and local health jurisdictions to have accurate information about COVID-19 infections among school employees and students. Specifically, the prompt, secure, and confidential sharing of information about individuals within the school community who have tested positive for COVID-19 is critical to ensure that public health authorities can rapidly respond by:

1. Instituting necessary case investigation and contact tracing;
2. Focusing public health resources to effectively provide comprehensive support to the affected schools related to further investigation, mitigation strategies, and operational plans;
3. Assessing and monitoring the practices and activities that may have led to the infection or transmission of COVID-19;
4. Taking appropriate measures to protect the health of both the school community and population-at-large; and
5. Ensuring that CDPH and local health jurisdictions have the information necessary to accurately assess the impact of school reopening on COVID-19 transmission and case rates to effectively update operative public health guidance and directives as necessary.

Schools are authorized under the Family Educational Rights and Privacy Act (FERPA) to disclose personally identifiable information without parental consent to local health departments regarding COVID-19 testing and cases. (20 USC § 1232g(b)(1)(I).) In response to the COVID-19 pandemic, California has been under a State of Emergency since March 4, 2020. California continues to see the dire effects of this pandemic through limited ICU capacities and new cases and deaths each day. The COVID-19 pandemic poses an extreme threat to the health and safety of all Californians. Even with protocols in place to mitigate the transmission of COVID-19, the presence of an individual who has tested positive of COVID-19 on a K-12 public or private school campus is an emergency that poses a risk to health or safety of students and employees present on the campus. Reporting to the local health officer the presence of a positive case of COVID-19 in an individual who is or has been present on a K-12 public or private school campus is necessary to protect the health and safety of students and

employees present on the campus. California law (17 C.C.R. section 2508) also requires anyone in charge of a K-12 public or private school kindergarten to report at once to the local health officer the presence or suspected presence of any of the communicable disease, which includes COVID-19.

Accordingly:

- Effective immediately, every local educational agency (school district, county office of education, and charter school) and private school in California shall notify its local health officer of any known case of COVID-19 among any student or employee who was present on a K-12 public or private school campus within the 10 days preceding a positive test for COVID-19. Specifically, the local educational agency or private school shall report the following information:
 - The full name, address, telephone number, and date of birth of the individual who tested positive;
 - The date the individual tested positive, the school(s) at which the individual was present on-site within the 10 days preceding the positive test, and the date the individual was last on-site at any relevant school(s); and
 - The full name, address, and telephone number of the person making the report.
- This information shall be reported to the local health officer by telephone within twenty-four hours from the time an individual within the local educational agency or private school is first made aware of a new case.
- This reporting shall continue until this directive is modified or rescinded.

Information reported to the local health officer pursuant to this directive shall not be disclosed except to (1) the California Department of Public Health; (2) to the extent deemed necessary by the local health officer for an investigation to determine the source of infection and to prevent the spread of COVID-19, including with health officers in other jurisdictions as necessary to monitor, investigate, prevent, and/or control the spread of COVID-19; (3) if required by state or federal law; or (4) with the written consent of the individual to whom the information pertains or the legal representative of the individual.

This reporting does not replace or supersede any other statutory or regulatory requirements that require reporting of COVID-19 cases and/or outbreaks to other entities or institutions, such as Cal/OSHA.

Appendix 4: Public Health Directive

REPORTING DETAILS OF IN-PERSON INSTRUCTION

COVID-19 School Reopening Status Reporting

January 14, 2021

Following school closures that occurred in spring 2020 in response to the COVID-19 pandemic, the California Department of Public Health (CDPH) developed the “COVID-19 and Reopening In-Person Learning Framework for K-12 Schools in California, 2020-2021 School Year” (July 17, 2020) to support school communities as they decided when and how to implement in-person instruction for the 2020-2021 school year. Schools throughout the state are currently in various stages of instruction including distance learning, in-person learning, and hybrid instruction based on local conditions.

New evidence and data about COVID-19 transmission and experience nationally and internationally demonstrate that schools, particularly elementary schools, can operate safely for in-person instruction with the correct safety protocols in place. Concurrently with this directive, CDPH issued updated, consolidated guidance for public and private K-12 schools to support school reopenings and safe implementation of in-person instruction for students and staff.

Under the guidance, schools that have already reopened are permitted to continue offering in-person instruction, and additional schools will reopen through the early spring. To be equipped to prevent and mitigate ongoing community COVID-19 transmission, it is necessary for CDPH and local health jurisdictions to have accurate information about which school sites are serving students in-person and to which degree such in-person services are being provided, especially in light of evolving epidemiological conditions.

This information will assist public health authorities maintain awareness of possible locations where case transmission may occur and can rapidly respond

to any confirmed positive cases of individuals who have been on-site at schools offering in-person instruction and services. It is also necessary to focus public health resources to support schools, including COVID-19 testing support, contact tracing, and technical assistance related to mitigation strategies and operational plans, to make the most efficient and effective use of those resources. Finally, this information will assist CDPH and local health jurisdictions to accurately assess the impact of school reopening on COVID-19 and update operative public health guidance and directives as necessary.

Accordingly:

- Beginning January 25, 2021, every local educational agency (school district, county office of education, and charter school) and private school in California shall notify the California Department of Public Health whether it is serving students in-person. Specifically, the local educational agency or private school shall report the following information:
 - In-person instruction is provided full-time, including whether provided for all grades served by the local educational agency or private school or only certain grade spans.
 - In-person instruction is provided only part-time (hybrid model), including whether provided for all grades served by the local educational agency or private school or only certain grade spans.
 - In-person instruction and services are provided only pursuant to the Guidance Related to Cohorts issued by the California Department of Public Health.
 - No in-person instruction and services are provided (distance learning only).

- This reporting shall continue every other Monday (or the Tuesday immediately following, if the Monday is a state holiday) until this directive is modified or rescinded.

- This information shall be reported via a web form that will be made available by the California Department of Public Health.

- The California Department of Public Health will provide this information to local health officers and, once the information is processed, will make this information publicly available on the Safe Schools For All Hub website.
